**The Limits and Possibilities of Schooling** Christopher J. Hurn,1985      **Schools and Society** Jeanne H.

Ballantine,Joan Z. Spade,2008 Presents the most recent theories research terms concepts ideas and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today

International Handbook of Research on Teachers and Teaching Lawrence J. Saha,Anthony Gary Dworkin,2009-04-17 The International Handbook of Research on Teachers and Teaching provides a fresh look at the ever changing nature of the teaching profession throughout the world This collection of over 70 articles addresses a wide range of issues relevant for understanding the present educational climate in which the accountability of teachers and the standardized testing of students have become dominant

**The Politics of Curricular Change** M. Christopher Brown,Roderic R. Land,2005 The Politics of Curricular Change fills an important void in the literature regarding the relationship of multicultural curricular change to race hegemony and power as independent constructs Given the scant corpus of research on how these constructs s

**Managing Elites** Debra J. Schleef,2006 How does one become a member of an elite profession Managing Elites examines how elites in training contest rationalize and ultimately enthusiastically embrace their dominant positions in society Using interviews with 79 law and MBA students the author argues that elite socialization requires both accommodation and resistance to professional ideologies Students develop a collective cynicism about elements of their education learning that their discipline imparts esoteric knowledge but also claiming that they didn t learn anything They struggle with the idea that fellow students are all equally intelligent and therefore deserving of elite status and the continuing emphasis on activities that sort students Students resist that paths to success promoted by school cultures investment banking consulting or becoming partner in a large law firm Such cynicism is indeed ultimately revealed to be temporary as most students end up in full support of these jobs of least resistance Their critiques do however create tensions between competition and cooperation between the individual and the collective and between egalitarianism and elitism Part of elite socialization is learning to deal with these tensions or more specifically to hold contradictory ideals at the same time      Lesson Plans Judson G.

Everitt,2017-12-21 In Lesson Plans Judson G Everitt takes readers into the everyday worlds of teacher training and reveals the complexities and dilemmas teacher candidates confront as they learn how to perform a job that many people assume anybody can do Using rich qualitative data Everitt analyzes how people make sense of their prospective jobs as teachers and how their introduction to this profession is shaped by the institutionalized rules and practices of higher education K 12 education and gender Trained to constantly adapt to various contingencies that routinely arise in schools and classrooms teacher candidates learn that they must continually try to reconcile the competing expectations of their jobs to meet students needs in an era of accountability Lesson Plans reveals how institutions shape the ways we produce teachers and how new teachers make sense of the multiple and complicated demands they face in their efforts to educate students      *Credential*

*Market* Quentin Maire, 2021-09-22 This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation i.e. credentialism Building on a detailed analysis of the International Baccalaureate IB Diploma a senior secondary school certificate offered in over 150 countries Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition Using original data on high school credentials in Australia and internationally the author makes a strong case for certificates to be studied relationally by locating them in the credentialing structures in which they are inserted He systematically applies the comparative method to explain the role of the curriculum family resources school segregation and higher education selection in creating a credential hierarchy His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems credential theory and the IB Diploma *Practical Wisdom and Democratic Education* Samantha

Broadhead, Margaret Gregson, 2018-02-20 This book explores the development of practical wisdom or phronesis within the stories of four mature students studying for degrees in art and design Through an analysis informed by the ideas of Basil Bernstein and Aristotle the authors propose that phronesis or the ability to deliberate well should be an intrinsic part of a democratic education As a number of vocational and academic disciplines require deliberation and the ability to draw on knowledge character and experience it is essential that no student feels their experience puts them at a disadvantage The authors argue that democratic education should allow each participant to feel enhanced included and able to participate in order to create a constructive and reciprocal dialogue This work will be of value to students and scholars interested in democratic education the experiences of non traditional students and the sociology of education *Schools and Society: A Sociological Approach to Education* Jeanne H. Ballantine, Joan Z. Spade, 2014-02-21 Undergraduate students of the sociology of education education and society and education studies **School Matters** RoSusan D. Bartee, M. Christopher

Brown, 2007 There are four types of capital economic human cultural and social The distribution of capital in home and school settings affects the types of educational outcomes and the quality of lifelong opportunities that individuals are able to enjoy Resource availability and accessibility influence the success levels at which teaching and learning is experienced Capital possession or acquisition impacts the ability to navigate the academic pipeline and to recognize the appropriate tools by which to do so Minimal attempts have been taken to address different perspectives related to economic human cultural and social capital This book identifies the various tenets of capital as having shared similarities and or differences as well as reveals how the distribution of capital impacts educational settings More specifically this book reveals that given the increases in the parental education or the cultural capital of African Americans no significant changes have occurred in the number of years that African American children attend schools This finding remains consistent in terms of the sort of cultural capital that they are able to gain In sum the research concludes that cultural capital does assume a significant role in the

transfer of advantages that stem from middle and upper level socioeconomic backgrounds      *Native Americans in the School System* Carol J. Ward, 2005-07-19 Carol Ward examines persistent dropout rates among Native American youth which remain high despite overall increases in Native adult education attainment in the last twenty years Focusing on the experiences of the Northern Cheyenne nation she evaluates historical ethnographic and quantitative data to determine the causes of these educational failures and places this data in an economic political and cultural context She shows that the rate of failure in this community is the result of conflicting approaches to socializing youth the struggle between native capital and human capital development systems With high rates of unemployment poverty and school dropouts the Northern Cheyenne reservation provides some important lessons as Native Americans pursue greater educational success This volume will be of use to policy makers instructors of comparative education Native American studies sociology and anthropology

**Reimagining the Purpose of Schools and Educational Organisations** Anthony Montgomery, Ian Kehoe, 2015-12-22 This book features a diverse set of perspectives all focused towards questioning the role schools actually play in society and more importantly the role they could potentially play Containing papers presented at the 1st International Conference on Reimagining Schooling which took place in Thessaloniki Greece June 2013 bringing together international and multi disciplinary perspectives on the future of education and schools Combines diverse specialties analyzing schools as organizations and questions the purpose of schools The book explores the current purpose of schooling and debates what roles and values young people currently learn from schooling It examines such issues as the impact of Neoliberalism the pursuit of the socially just school and imagining contemporary schools beyond their consumerist mentality Tackling development in the growing economic and social crisis in Europe and offering transformative analysis of the psychology and decision making involved for innovating teaching learning socio economic and policy contexts In addition the book shows different ways young people can be creatively involved in reimagining schooling It also details both innovative and radical ideas that currently exist about school transformation such as building learning partnerships for all and creating synergies across formal and informal settings of learning Raising important questions for the future of the relationship between teacher and pupil and positive and pro active behavior There is a growing realization that schools fail to accommodate diverse types of learning and that their purpose is not simply about education Featuring academics and practitioners from many different disciplines this book boldly questions the values that currently permeate school walls and suggests ways that schooling itself can be made better      *Education during the Time of the Revolution in Egypt* Nagwa Megahed, 2017-11-13 Since the 25th January 2011 revolution Egyptians experienced and engaged in a daily debate Controversially some argued that the conflict and revolts in Egypt and the Arab region were neither coincidental nor the result of a domino effect of collective actions by oppressed people against autocratic regimes Rather these revolts were the result of mobilization efforts made over decades by several activist groups as well as national and international non governmental organizations Contrary to this view others

claim that despite the rapid economic growth of Egypt in the 2000s there was a wide gap in the distribution of wealth and economic return which left the majority of Egyptians suffering from poverty and high rate of unemployment especially among youth Obviously while national and international economic and political dynamics dominated the daily debate education remains the forgotten arena amidst conflict With the exacerbation of conflict between militant extremists and modern states in the region and most recently in many European countries it became more important than ever before to understand the dialectics of education in conflict in different local contexts starting in this book by the Egyptian context The book focuses on education in Egypt during the time of the revolution as perceived by university students youth activists educational professionals government officials and civil society organizations Its chapters reveal the tension contradiction and or coherence among different players as related to their respective role in education for civic engagement national identity global citizenship peace building teacher professional development and women s and students empowerment The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and reality ies during the time of the revolution and its aftermath Lessons of the Locker Room Andrew W. Dr Miracle,C. Roger Rees,2010-08-05 Do sports build character An anthropologist and a sociologist explore the underpinnings of school sports and examine the evidence to support the prevailing assumption that sport is an ennobling experience They find that participation has little effect on positive character development Far from building model citizens their research shows that competitive team sports may foster selfish motives and antisocial behavior Rather than learning self sacrifice and dedication athletes often pick up the message that winning isn t everything it s the only thing **Socializing Justice** Clara Sabbagh,2023 This book offers a comprehensive view of the numerous roles of justice in three education spheres public and globalized schools nonformal education and the family It relies on the quantitative and ethnographic methodological traditions in these fields to identify controversies and illustrate how the forms of justice underlying educational spheres are universal yet sensitive to sociocultural variation The Sociology of Education Jeanne Ballantine,Floyd M Hammack,2015-07-22 A comprehensive and cross cultural look at the sociology of education The text integrates important and diverse topics in the field by showing how they are related The Sociology of Education A Systematic Analysis provides a sociological analysis of education using several theoretical approaches The authors include practical applications and current educational issues to discuss the structure and processes that make education systems work Learning Goals Upon completing this book readers should be able to Learn diverse theoretical approaches in the sociology of education Assess important current or emerging topics including higher education informal education climate and the hidden curriculum the school environment education around the world and educational movements and alternatives Understand how change takes place and what role sociologists play Become involved with educational systems where they can put to use the knowledge available in textbooks **Adolescence and Education** Tim Urdan, Frank Pajares,2002-01-01

In this inaugural volume we solicited chapters from leading scholars in a variety of fields related to education. Our aim was to provide a broad overview of several of the most pressing concerns regarding the education of adolescent students. The volume begins with an historical perspective from Barbara Finklestein who provides background regarding America's changing perceptions of adolescence as a developmental period and how American society has approached the task of educating this age group over time. This is followed by chapters from Carol Midgley and from Sanford Dornbusch and Jeanne Kaufman regarding the organization, purpose and function of schools designed to serve early and late adolescents. Midgley uses an achievement goal theory lens to analyze middle level schools. Dornbusch and Kaufman consider senior high schools adopting a more sociological perspective.

**Navigating Through the Storm** Aharon Aviram, 2010-01-01 This book aims to systematically tackle the most severe crisis to ever beset Western education systems which stems from the growing clash between the Platonic modern civilization still very much at the core of prevailing education systems and the postmodern civilization which has become dominant in Western societies in the last generations. The book counters this crisis by radically and systematically rethinking education for postmodern democracies beginning by comprehensively analyzing the main features of current postmodern storms along with their engulfing socio cultural and educational implications and proceeding to offer a theoretical and practical blueprint designed to harness these storms for optimally realizing the basic Humanistic values that should guide education in liberal democracies: personal autonomy, morality and dialogical belonging.

*No Child Left Behind and the Reduction of the Achievement Gap* Alan R. Sadovnik, Jennifer A. O'Day, George W. Bohrnstedt, Kathryn M. Borman, 2013-10-11 This monumental collection presents the first ever sociological analysis of the No Child Left Behind Act and its effects on children, teachers, parents and schools. More importantly, these leading sociologists consider whether NCLB can or will accomplish its major goal to eliminate the achievement gap by 2014. Based on theoretical and empirical research, the essays examine the history of federal educational policy and place NCLB in a larger sociological and historical context. Taking up a number of policy areas affected by the law including accountability and assessment, curriculum and instruction, teacher quality, parental involvement, school choice and urban education, this book examines the effects of NCLB on different groups of students and schools and the ways in which school organization and structure affect achievement. No Child Left Behind concludes with a discussion of the important contributions of sociological research and sociological analysis integral to understanding the limits and possibilities of the law to reduce the achievement gap.

**The Economics of American Higher Education** William E. Becker Jr., D.R. Lewis, 2012-12-06 Postsecondary educational institutions in the United States are facing increasing financial stress and waning public support. Unless these trends can be changed, higher education can be expected to stagnate. What if anything can be done? As a starting point, advocates of higher education need to more fully recognize the issues associated with the economic mission of higher education and how this mission gets translated into individual student gains, regional growth and social equity. This requires an understanding of the relationship between the

outcomes of higher education and measures of economic productivity and well being This volume addresses topics related to the role of postsecondary education in microeconomic development within the United States Attention is given to the importance of colleges and universities in the enhancement of individual students and in the advancement of the communities and states within which they work Although several of the chapters in this volume are aimed at research teaching universities much of what is presented throughout can be generalized to all of postsecondary education Little attention however is given to the role of higher education in the macroeconomic development of the United States this topic is covered in our related book American Higher Education and National Growth
