Limits Of Adjustment In Africa:

Issues in the Contemporary Politics of Sub-Saharan Africa G. Harrison, 2002-06-19 Graham Harrison investigates contemporary African politics by privileging the dynamics of political struggle and resistance Through the analysis of peasant politics debt and structural adjustment democratization and identity politics the author shows the importance of resistance and agency Detailed studies of Mozambique Nigeria and Burkina Faso demonstrate how political organization and resistance have been closely ingrained in particular post colonial trajectories An original and refreshing approach to the study of African politics this will be a useful textbook for upper level undergraduates and postgraduate students Unleashing

Africa's Resilience: Pan-Africanist Renaissance In a New African Century Costantinos Berhutesfa Costantinos, 2014-04-22 Africa includes five of the world's fastest growing economies as well as a treasure chest of natural resources Those very things however have caused multinational corporations to flock to the continent in an attempt to take control of those resources An African renaissance is hard to conceptualize but that is exactly what is beginning to effect real change with the assistance of both public officials and ordinary citizens This study theorizes an African renaissance as the dynamic interaction of strategy and process and seeks to motivate researchers to shift analysis in that direction This shift emphasizes the task of broadly structuring African renaissance as a geopolitical system is more important than that of promoting it within a specific program of nations Unleashing Africa's Resilience provides the necessary tools for research based policymaking and the critical thinking needed to help Africa build a vibrant economy and become a more prominent player on the world stage

South Africa Pushed to the Limit Hein Marais, 2013-07-04 Since 1994 the democratic government in South Africa has worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people's skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa's vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma's rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country's continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens *South Africa Pushed to the Limit* presents a riveting benchmark analysis of the incomplete journey beyond apartheid

International Law and Boundary Disputes in Africa Gbenga Oduntan, 2015-06-26 Africa has experienced a number of territorial disputes over land and maritime boundaries due in part to its colonial and post colonial history This book explores the legal political and historical nature of disputes over territory in the African continent and critiques the content and application of contemporary International law to the resolution of African territorial and border disputes Drawing on central concepts of public international law such as sovereignty and jurisdiction and socio political

concepts such as colonialism ethnicity nationality and self determination this book interrogates the intimate connection that peoples and nations have to territory and the severe disputes these may lead to Gbenga Oduntan identifies the major principles of law at play in relation to territorial and boundary disputes and argues that the predominant use of foreign based adjudicatory mechanisms in attempting to deal with African boundary disputes alienates those institutions and mechanisms from African people and can contribute to the recurrence of conflicts and disputes in and among African territories He suggests that the understanding and application of multidisciplinary dispute resolution mechanisms and strategies can allow for a more holistic and effective treatment of boundary disputes As an in depth study into the legal socio political and anthropological mechanisms involved in the understanding of territorial boundaries and a unique synthesis of an African jurisprudence of international boundaries law this book will be of great use and interest to students researchers and practitioners in African and Public International Law International Relations and decision makers in need of better understanding the settlement of disputes over territorial boundaries in both Africa and the wider world Education in West Africa Emeфа Takyi-Amoako,2015-05-21 Education in West Africa is a comprehensive critical reference guide to education in the region Written by regional experts the book explores the education systems of Benin Burkina Faso Cameroon Cape Verde Chad The Gambia Ghana Guinea Guinea Bissau Ivory Coast Liberia Mali Mauritania Niger Nigeria Senegal Sierra Leone and Togo It critically examines the development of education provision in each country whilst exploring both local and global contexts Including a comparative introduction to the issues facing education in the region as a whole this handbook is an essential reference for researchers scholars international agencies and policy makers at all levels
