Line Of Chance

James Bent, Kenneth K. Humphreys

Line Of Chance:

On Line Cornelia H. Butler, M. Catherine de Zegher, 2010 *On Line Drawing Through the Twentieth Century* explores the radical transformation of drawing that began during the last century as numerous artists critically re-examined the traditional concepts of the medium. In a revolutionary departure from the institutional definition of drawing and from reliance on paper as the fundamental support material, artists instead pushed the line into real space, expanding the medium's relationship to gesture and form and connecting it with painting, sculpture, photography, film, and dance. Published in conjunction with an exhibition at The Museum of Modern Art, *On Line* presents a discursive history of mark-making through nearly 250 works by 100 artists, including Aleksandr Rodchenko, Alexander Calder, Karel Malich, Eva Hesse, Anna Maria Maiolino, Richard Tuttle, Mona Hatoum, and Monika Grzymala, among many others. Essays by the curators illuminate individual practices and examine broader themes such as the exploration of the line by the avant-garde and the relationship between drawing and dance.

Forbidden Line Paul Stanbridge, 2016-12-01 A work of enormous scope and ambition from a writer who combines style, wit, and a rare sense of the ridiculousness of the human condition. Incomparable Alex Pheby, Wellcome Book Prize shortlisted author of *Playthings*, *Forbidden Line* the debut novel by Paul Stanbridge is a monster. A unique retelling of Don Quixote and the fourteenth-century Peasants' Revolt, it's also a gleeful hybrid of science, pseudo-science, absurd theory, and ingenious philosophy. Above all, it's a story about love, companionship, and two friends, Don and Is. This profoundly odd couple careers around Essex and London, insulting drinkers, abusing drivers, curing plague, and fighting each other, and everyone around them. They are on a quest as far as Don is concerned to reveal the truth about history and to uncover the secrets of the hyperfine transition of hydrogen. But Is, like the rest of us, isn't really sure what Don is talking about. All he wants to do is get through to the next day and back to his family. Both of which turn into extremely tricky propositions as Don takes him ever deeper into danger and the very structure of reality begins to turn against them. Both *Forbidden Line* is a fiercely clever novel; it will make you question everything, and it will make you glad to be human. It is a dazzling achievement.

Effective Project Management Through Applied Cost and Schedule Control James Bent, Kenneth K. Humphreys, 1996-05-01 This work outlines a state-of-the-art project control and trending programme focusing on advanced applied cost and schedule control skills for all phases of a project at both owner and contractor level. It contains information on the three major aspects of the total project programme: the techniques and procedures utilized for a project, the exper

At the Front Line Mark Johnston, 2002-07-18 *At the Front Line* draws on a plethora of letters, diaries, and documents written by over 300 Australian soldiers in the field to present a picture of the hardships and triumphs of their wartime experience. Mark Johnston analyses the suffering of front-line soldiers caused not only by the opposing force but also by the conditions imposed by their own army. The book details the physical and psychological pressures of life at the front and shows how soldiers survived or surrendered to unbearable environments, fear, boredom, and the constant threat of impending death.

The myths of mateship and equanimity are brought under scrutiny Much hostility can be explained by competition between ranks and the perceived hostility of superiors The author investigates the immense strain that led to many breakdowns and the characteristic forbearance that saw so many others through

Millions of tons of plastic slip into oceans every year Some floats and travels slowly with the currents endangering the health of marine animals The rest is hardly visible but is far more dangerous Tiny bits of plastic sprinkle the ocean s surface or mix into the sandy seafloor and beaches It ends up inside birds fish and other animals harming them and ultimately humans Experts struggle with fear and hope as they work to stop the flood of plastic threatening living organisms across the globe

Bulletin United States. Bureau of Mines,1915 **The Practice of Classical Palmistry** Madame La Roux,1993-01-01

One of the best introductions to classical palmistry ever Teaches you how to read the palm and fingers and focuses on the lines as singular expressions of the personality before the palm as a whole is integrated into a reading The author discusses howto do a reading and work with clients and provides case studies Self study questions are given to allow the student to examine his or her own hand in terms of the material in each chapter Illustrations Drawing the Line Philip M.

Rosoff,2016-11-03 Unlike the rest of the advanced industrialized world the United States does not have a national healthcare system that guarantees that all residents have access to medical services Over the past century a number of unsuccessful attempts have been made to create and implement a unified coordinated healthcare system Piecemeal progress has been made such as with the passage of Medicare Medicaid and the Affordable Care Act However the US still has the dubious distinction of possessing the most expensive healthcare in the world as well as health related outcomes that are shameful for a wealthy country mostly due to the number of people who lack decent care The continuing escalation in medical costs is also threatening the financial stability of the nation In his first book Rationing is Not a Four Letter Word Philip M Rosoff argued that the only way to control costs is to impose rationing and the only way to do so fairly is to have it apply to all The key to rationing is how it is accomplished He outlined a general approach to making rationing decisions that involved a comprehensive explication of procedural fairness and illustrated this with the real life accepted system of solid organ allocation for transplantation In this book he discusses how to decide what should and should not be covered in a generous benefits plan for all He considers a variety of ways this might be done and concludes that the most just approach is to utilize a transparent process in which experts and lay people develop a consensus on what should be covered by focusing on both clinical evidence of need and the effective and appropriate means to address those needs He also considers the various objections and impediments to this proposal and concludes that they are obstacles that can be successfully met
