The Behaviour Manual: An Educator's Guidebook Samuel Strickland, 2022-06-09. The Behaviour Manual: An Educator's Guidebook offers over 100 strategies, approaches, and teaching methods that will help any school leader, middle leader, teacher, ECT, or ITT to proactively lead on behaviour. It has been designed to help the entire profession and anyone at any level and all ranges of experience. The book is divided into three broad sections. Section one examines the role of the Mothership, the school, and the role that leaders at any level can play. Section two looks at the role of the Satellites, the key areas that make up the school, and the integral role that middle leaders play. The final section looks at the micro level, focusing on the role that teachers play, and offers a plethora of approaches teachers can employ. Each of the 100 strategies is unpacked over a one or two page spread. Within each spread is an outline of what the approach is; it is then unpacked to detail how it works or can be applied, and each spread finishes with a cautionary warning and an advice tip. This book is deliberately written to help to offer support to offer advice, and there is bluntly no waffle, no padding, and no fluff. If you want a book that you can pick up easily, read and digest a key approach or strategy in less than 5-10 minutes, then this is for you. It is grounded in expertise, experience, research, and deliberately written in a clear, straightforward, and open style that leaves you in no doubt regarding how any of the given approaches works and could be employed in your school setting.

Variation and Co-operative Communication Strategies in Air Traffic Control English. Eveline Wyss-Bühlmann, 2005. The aim of this study is to establish the co-operative communication strategies that are used in air traffic control (ATC) conversations. The research deals with the question: what kind of co-operative communication strategies do pilots and controllers employ in a speech situation with a restricted use of vocabulary which generally does not permit any deviations from standard phraseology? The strategies in ATC speech are then compared to those used by second language learners. Faerch and Kasper's 1983 taxonomy of communication strategies will serve as a basis for this comparison. The author analyses authentic speech samples from various ATC workstations at Zurich Airport and evaluates various aspects of phraseology training of air traffic controllers.
