Meilinger, 2000      The Evolution of the US Air Force Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general      **Air Power History** , 2004      **Air Power** Stephen Budiansky, 2005-03-29 No single human invention has transformed war more than the airplane not even the atomic bomb Even before the Wright Brothers first flight predictions abounded of the devastating and terrible consequences this new invention would have as an engine of war Soaring over the battlefield the airplane became an unstoppable force that left no spot on earth safe from attack Drawing on combat memoirs letters diaries archival records museum collections and eyewitness accounts by the men who fought and the men who developed the breakthrough inventions and concepts acclaimed author Stephen Budiansky weaves a vivid and dramatic account of the airplane s revolutionary transformation of modern warfare On the web <http://www.budiansky.com>      **Air Power and Warfare** Elwood L. White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that
