History Wars:

Wars That Changed History Spencer C. Tucker, 2015-09-22 A thorough study of significant wars throughout history and their influence on world affairs from the Egyptian Pharaoh Thutmose III's Campaigns during 1479-1459 BCE through the Iraq War of 2003-2011. For hundreds of years wars have played a determining role in history and have decided the rise and fall of civilizations. Many believe that understanding the causes and consequences of warfare may move humankind towards world peace. This selection of the 50 most consequential wars compiled by award-winning military historian Spencer C. Tucker presents each conflict in chronological order and discusses its causes, its course, and its significance in world history. Through thoughtful essays and supporting visual evidence, this reference work examines the types of weapons systems employed and their effects in the field, the roles played by individual leaders such as Alexander the Great, Julius Caesar, Abraham Lincoln, and Adolf Hitler, and the impact of geography and economics on the battlefield. The work includes fascinating information about warfare, addressing subjects such as how transportation and logistics changed the face of war over time, what invention marked the ascendancy of infantry over cavalry, why World War I remains the most important war in the 20th century, and which war killed nearly half of the population of Germany. Each essay includes the latest interpretations of strategy, agendas, and consequences of the featured event.

The Legacy of Serbia's Great War Alex Tomić,2024-01-05 In the winter of 1915 following the invasion of Serbia by the Central Powers the Serbian Army retreated across the mountains of Albania and Montenegro together with thousands of civilians Around 240 000 lost their lives Today the story of the retreat is little known except in Serbia where it represents the heroic Serbian sacrifice in the Great War In this book Alex Tomic examines the centenary events memorializing the First World War with the retreat at its core and provides a persuasive account of the ways in which the remembrance of Serbian history has been manipulated for political purposes Whether through commemorations ceremonies or grass root initiatives she demonstrates how these have been used as distractions from the more recent unexamined past and in doing so provides an important new perspective on the cultural history of commemoration

Teichler demonstrates their systematic emphasis on the subjectivity of the victim is problematic reproducing simplistic narratives and identities defined by victimization Such fictions of reconciliation venture beyond simplistic narratives and identities defined by victimization offering new opportunities for confronting painful histories Subject Headings Used in the Dictionary Catalogs of the Library of Congress Library of Congress, Library of Congress. the Navy was forced to reconsider its earlier practices and develop new policies in maintenance supply and technical training. Not only did a shortage of technicians plague the Navy but the scarcity of aviation supply and repair facilities in the Pacific soon caused panic in Washington. While the surface Navy's modernization of at sea replenishment was beneficial, it did not solve the problems of sustaining war time aircraft readiness levels sufficient to winning a naval air war. Fisher outlines the drastic institutional changes that accompanied an increase in aviation maintenance personnel from fewer than 10,000 to nearly 250,000 bluejackets, the complete restructuring of the naval aviation technical educational system and the development of a highly skilled labor force. The first comprehensive study on the importance of aircraft maintenance and the aircraft technician in the age of the aircraft carrier, *Sustaining the Carrier War*, provides the missing link to our understanding of Great Power conflict at sea. *The War Went On* Brian Matthew Jordan, Evan C. Rothera, 2020-04-01

In recent years, Civil War veterans have emerged from historical obscurity. Inspired by recent interest in memory studies and energized by the ongoing neorevisionist turn, a vibrant new literature has given the lie to the once obligatory lament that the postbellum lives of Civil War soldiers were irretrievable. Despite this flood of historical scholarship, fundamental questions about the essential character of Civil War veteranhood remain unanswered. Moreover, because work on veterans has often proceeded from a preoccupation with cultural memory, the Civil War's ex-soldiers have typically been analyzed as either symbols or producers of texts. In *The War Went On: Reconsidering the Lives of Civil War Veterans*, fifteen of the field's top scholars provide a more nuanced and intimate look at the lives and experiences of these former soldiers. Essays in this collection approach Civil War veterans from oblique angles, including theater, political and disability history, as well as borderlands and memory studies. Contributors examine the lives of Union and Confederate veterans, African American veterans, former prisoners of war, amputees, and ex-guerrilla fighters. They also consider postwar political elections, veterans' business dealings, and even literary contests between onetime enemies and among former comrades. [Curating America's Painful Past](#) Tim Gruenewald, 2021-07-28

During the global Black Lives Matter protests of 2020, many called upon the United States to finally face its painful past. Tim Gruenewald's new book is an in-depth investigation of how that past is currently remembered at the national museums in Washington, DC. *Curating America's Painful Past* reveals how the tragic past is either minimized or framed in a way that does not threaten dominant national ideologies. Gruenewald analyzes the National Museum of American History (NMAH), the United States Holocaust Memorial Museum (USHMM), the National Museum of African American History and Culture (NMAAHC), and the National Museum of the American Indian (NMAI). The NMAH, the nation's most popular history museum, serves as the benchmark for the imagination of US history and identity. The USHMM, opened in 1993 as the United States' official Holocaust memorial and stands adjacent to the National Mall. Gruenewald makes a persuasive case that the USHMM established a successful blueprint for narrating horrific and traumatic histories. *Curating America's Painful Past* contrasts these two museums to ask why America's painful memories were largely absent from the

memorial landscape of the National Mall and argues that social injustices in the present cannot be addressed until the nation's painful past is fully acknowledged and remembered. It was only with the opening of the NMAAHC in 2016 that a detailed account of atrocities committed against African Americans appeared on the National Mall. Gruenewald focuses on the museum's narrative structure in the context of national discourse to provide a critical reading of the museum. When the NMAI opened in 2004 it presented for the first time a detailed history from a Native American perspective that sought to undo conventional museum narratives. However, criticism led to more traditional exhibitions and national focus. Nevertheless, the museum still marginalizes memories of the vast numbers of Indigenous victims to European colonization and to US expansion. In a final chapter, Gruenewald offers a thought experiment imagining a memory site like the recently opened National Memorial for Peace and Justice in Montgomery, Alabama, situated on the National Mall so the reader can assess how profound an effect projects of national memory can have on facing the past as a matter of present justice.

The Politics of Artists in War Zones Kit Messham-Muir, Uroš Cvorović, Monika Lukowska-Appel, 2023-12-14. What exactly is contemporary war art in the West today? This book considers the place of contemporary war art in the 2020s, a whole generation after 9/11 and long past the War on Terror. Exploring the role contemporary art plays within conversations around war and imperialism, the book brings together chapters from international contemporary artists, theorists, and curators alongside the voices of contemporary war artists through original, edited interviews. It addresses newly emerged contexts in which war is found not only in sites of contemporary conflicts such as Ukraine, Yemen, and Syria but everywhere in western culture, from social media to culture wars. With interviews from official war artists working in the UK, the US, and Australia such as eX de Medici, Australia, and David Cotterrell, UK, as well as those working in post-colonial contexts such as Baptiste Coelho, India, the editors reflect on contemporary processes of memorialisation and the impact of British colonisation in Australia, India, and its relation to historical conflicts. It focuses on three overlapping themes: firstly, the role of memory and amnesia in colonial contexts; secondly, the complex role of official war art; and thirdly, questions of testimony and knowing in relation to alleged war crimes, torture, and genocide. Richly illustrated and featuring three substantial interview chapters, *The Politics of Artists in War Zones* is a hands-on exploration of the complexities and challenges faced by war artists that contextualises the tensions between the contemporary art world and the portrayal of war. It is essential reading for researchers of fine art, curatorial studies, museum studies, conflict studies, and photojournalism.

After the War Leigh S. L. Straw, 2017. In Collie in 1929 a murder-suicide took place. The killer was identified as Andrew Straw. Dressed in war uniform and a slouch hat, a hauntingly familiar face stared out at me from the front page of *Truth*. Andrew Straw bore a striking resemblance to my husband. I had unearthed an unexpected family story. Of the 330,000 Australian men who enlisted and served in World War I, close to 60,000 never returned home. As much as it is important to commemorate the war dead, it is also imperative that we remember the survivors as they moved into peacetime. Of the 32,000 Western Australian men who enlisted, 23,700 returned from the war. These men

tried to create a semblance of a civilian life following the traumas of war War receded from immediate view as these men readjusted to civilian life but its impacts endured Many returned with disabilities mental health problems and a lowered sense of self worth that led some to take their own lives This book charts the emergence of Post Traumatic Stress Disorder PTSD as a diagnosable condition in an Australian context In this deeply personal account historian and writer Leigh Straw seeks a better understanding of what soldiers experienced once the fighting stopped After the War uses the personal struggles of soldiers and their families to increase public understanding of the legacies of World War I in Western Australia and across the nation The scars of war mental and physical can be lifelong for soldiers who serve their country This is a story of surviving life after war Subject Military History History PTSD Psychology WWI Australian Studies **Remembering Asia's World War Two** Mark R. Frost, Daniel Schumacher, Edward Vickers, 2019-03-27 Over the past four decades East and Southeast Asia have seen a proliferation of heritage sites and remembrance practices which commemorate the region's bloody conflicts of the period 1931-45 Remembering Asia's World War Two examines the origins dynamics and repercussions of this regional war memory boom The book analyzes the politics of war commemoration in contemporary East and Southeast Asia Featuring contributions from leading international scholars the chapters span China Japan Malaysia Hong Kong and Singapore covering topics such as the commemoration of the Japanese military's comfort women system forms of dark tourism or commemorative pilgrimages e.g. veterans tours to wartime battlefields and the establishment and evolution of various war related heritage sites and museums Case studies reveal the distinctive trajectories of new and newly discovered forms of remembrance within and across national boundaries They highlight the growing influence of non state actors over representations of conflict and occupation as well as the increasingly interconnected and transnational character of memory making Taken together the studies collected here demonstrate that across much of Asia the public commemoration of the wars of 1931-45 has begun to shift from portraying them as a series of national conflicts with distinctive local meanings to commemorating the conflict as a common pan Asian or even global experience Focusing on non textual vehicles for public commemoration and considering both the local and international dimensions of war commemoration within Remembering Asia's World War Two will be a crucial reference for students and scholars of History Memory Studies and Heritage Studies as well as all those interested in the history politics and culture of contemporary Asia
