

## **Introduction: Meaning, Method, Use and Views of History**

### **Objectives:**

1. To define history;
2. To describe the uses or importance of history;
3. To identify the sources of history;
4. To explain the major views or philosophies in the study of history;
5. To differentiate the various approaches in the study of Philippine history;
6. To give reasons for interpreting Philippine history from the Filipino point of view; and
7. To justify the need to study history in order to understand one's national identity.

### **I. History Defined**

#### **A. Traditional Definitions**

1. History is the record of the past.
2. History is a record of the human past from the time written records began to appear.
  - a. These definitions are weak because they view history as based merely on written records.
  - b. History is actuality; hence it must study the past as it happened. This demands that the historian abandon the present. The practical value of studying and using the past to understand the present is lost. History is studied, written, and taught for its own sake.
  - c. Interviews or oral history and oral traditions, and cultural artifacts are not considered.
  - d. This notion of "no written record, no history" has confined history to the literate and articulate and has resulted in the production of historiographies from upper-class male perspectives.

#### **B. Modern Definition**

1. History is the reconstruction of the past based on written records, oral history, cultural artifacts and folk traditions.
2. It is the imaginative reconstruction of the past, the study of events concerning people in the past.
3. Aside from recording, a historian should do two other important tasks:
  - a. To interpret facts in orderly and intelligible manner, and
  - b. To discover patterns and trends which govern the behavior of people and of nations, and to make generalizations of these.
4. Therefore, history is the interpretative and imaginative study of surviving records of the past, either written or unwritten, in order to determine the meaning and scope of human existence.

### **II. Uses or Importance of History**

#### **A. Bridging the gap between the present and the past**

## History Meaning And Method:

**History: Meaning and Method** Donald V. Gawronski, 1967 *History: Meaning and Method [by] Donald V. Gawronski. Consulting Editor: Russel B. Nye* Donald V. Gawronski, 1969 **Methodology and Method in History (RLE Accounting)** Lee Parker, Finley Graves, 2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study. It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context. Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small. Hence the references in this bibliography are drawn from the literature of general history, economic and business history, legal and social history, and philosophy. The scope and range of its contents are broad; references are taken from texts as well as papers published in over 450 journals. *History - Meaning and Method* Donald V. Gawronski, 1975 **Martin Buber** David Dilling, *Methods and Theories of Art History* Anne D'Alleva, 2005 This is an analysis of complex forms of art history. It covers a broad range of approaches, presenting individual arguments, controversies, and divergent perspectives. The book begins by introducing the concept of theory and explains why it is important to the practice of art history. **Problems and Methods of the History of Religions** Bianchi, Bleeker, Bausani, 2018-08-14 Preliminary Material U. Bianchi, C. J. Bleeker, and A. Bausani. La personalit  morale di Raffaele Pettazzoni. Luigi Salvatorelli. La m thode comparative entre philologie et ph nomnologie. Geo Widengren. The Definition of Religion. On the Methodology of Historical Comparative Research. Ugo Bianchi. The Contribution of the Phenomenology of Religion to the Study of the History of Religions. C. Jouco Bleeker. Islam in the History of Religions. Alessandro Bausani. Problems and Prospects of the Studies on Persian Religion. Gherardo Gnoli. Some Internal and Comparative Problems in the Field of Indian Religions. Corrado Pensa. *Methodology of History* Y. Topolski, 2012-12-06 No discipline has been more praised or more criticized than the writing of history. Cioero claimed that history teaches men how to live. Arisotle denied it the very name of science and regarded poetry as the higher wisdom. At various times history has been assigned a commanding or a demeaning status in the hierarchy of sciences. Today one can admire the increasing precision and sophistication of the methods used by historians. On the other hand, Thucydides' History of the Peloponnesian War still serves as the ideal model of how to reconstruct the historical past. Even those who deny the possibility of an objective reconstruction of the past would themselves like to be recorded by historians objectively or not. Dislike of history and fear of its verdict are not incompatible with reverence and awe for its practitioners, the historians. So man's attitude to history is ambiguous. The controversy about history continues. Widely differing issues are at stake. Historians themselves, however, are the least engaged in the struggle. Rarely does a historian decide to open the door of his study and join in the melee about the meaning of history. More often he slams it shut and

returns to his studies oblivious of the fact that with the passage of time the gap between his scientific work and its audience might widen The historian does not shun the battle he merely chooses his own battleground

**Research Methods for History** Lucy Fairs, 2016-07-08 Historians have become increasingly sensitive to social and cultural theory since the 1980s yet the actual methods by which research is carried out in History have been largely taken for granted Research Methods for History encourages those researching the past to think creatively about the wide range of methods currently in use to understand how these methods are used and what historical insights they can provide This updated new edition has been expanded to cover not only sources and methods that are well established in History such as archival research but also those that have developed recently such as the impact of digital history research The themes of the different chapters have been selected to reflect new trends in the subject including landscape studies material culture and ethics Every chapter presents new insights and perspectives and will open researchers minds to the expanding possibilities of historical research

**Sources and Methods in the History of Sexuality** Anna Clark, Elizabeth W. Williams, 2024-09-12 Sources and Methods in the History of Sexuality outlines some of the challenges of retracing sexual acts identities and desires in the past and shows how historians have responded to these methodological challenges with ingenuity and creativity The volume acknowledges that the history of sexuality poses particularly interesting challenges in relation to sources due the peculiar nature of sexuality On one hand sexuality is frequently hidden and private its practices often unknown denied and evaded its desires fleeting or obsessive its reality confused or illuminated by fantasy yet on the other sexuality consistently breaks into the public sphere through moral panics waves of persecution taxonomizing projects and medical juridical interventions With vivid case studies from renowned contributors the chapters provide different theoretical approaches along with more practical examples of how to study the history of sexuality The volume has a broad chronology from the ancient world to the present an extensive geography covering not only Europe and the Americas but also Latin America and Africa and also includes a variety of gender and sexual expressions The book also privileges texts that offer an intersectional approach asking how sex and sexualities were constructed alongside against other categories of difference With accessible writing this volume encourages the reader to think creatively about how to find evidence of sex sexuality in the past and will be of value to students as well as scholars interested in the history of sexuality
