History Of The Natural World:

Ancient Natural History Roger French, 2005-08-08 Ancient Natural History surveys the ways in which people in the ancient world thought about nature The writings of Aristotle Theophrastus Strabo Pliny are examined as well as the popular beliefs of their contemporaries Roger French finds that the same natural historical material was used to serve the purposes of both the Greek philosopher and the Christian allegorist or of a taxonomist like Theophrastus and a collector of curiosa like Pliny He argues convincingly that the motives of ancient writers on nature were rarely scientific and indeed that there was not really any science at all in the ancient world This book will make fascinating reading for students academics and anyone who is interested in the history of science or in the ancient history of ideas *Emblems and the Natural World* Paul J. Smith, Karl A.E. Enenkel, 2017-09-11 Since its invention by Andrea Alciato the emblem is inextricably connected to the natural world Alciato and his followers drew massively their inspiration from it For their information about nature the emblem authors were greatly indebted to ancient natural history the medieval bestiaries and the 15th and 16th century proto emblematics especially the imprese The natural world became the main topic of for instance Camerarius's botanical and zoological emblem books and also of the applied emblematics in drawings and decorative arts Animal emblems are frequently quoted by naturalists Gesner Aldrovandi This interdisciplinary volume aims to address these multiple connections between emblematics and Natural History in the broader perspective of their underlying ideologies scientific artistic literary political and or religious Contributors Alison Saunders Anne Rolet Marisa Bass Bernhard Schirg Maren Biederbick Sabine Kalff Christian Peters Frederik Knegtel Agnes Kusler Aline Smeesters Astrid Zenker Tobias Bulang Sonja Schreiner Paul Smith and Karl Enenkel **The Illustrated History of the Natural World** Oliver Goldsmith, 1857 Describes the habits and behavior of a wide array of animals **A History of the Earth and Animated Nature ...** Oliver Goldsmith, 1857 *Earth's Deep History* Martin J. S. Rudwick, 2016-11-03 Mammoths and dinosaurs tropical forests in northern Europe and North America worldwide ice ages continents colliding and splitting apart comets and asteroids crashing catastrophically onto the Earth these are just some of the surprising features of the eventful history of our planet stretched out over several billion years But how was it all discovered how was the evidence for the Earth's long history collected and interpreted and what sorts of people put together this reconstruction of a deep past that no human beings could ever have witnessed In *Earth's Deep History* Martin J. S. Rudwick tells the gripping story of the gradual realization that the Earth's history has not only been unimaginably long but also astonishingly eventful in utterly unexpected ways Rudwick the world's premier historian of the Earth sciences is the first to make the story of the discovery of the Earth's deep history attractively accessible to readers without prior knowledge of either the history or the science and in so doing he reveals why it matters to us today
