History Of The Us Air Force:

History of the U.S. Air Force David A. Anderton, 1989 Text and photographs chronicle the history of the Air Force from its earliest days as a balloon unit during the Civil War to the present *The History of the US Air Force* Bill Yenne, 1984

Beskriver US Air Force op til midten af 1980'erne **Air Force** Chester G. Hearn, 2008-07-15 From its beginnings in 1907 as the Aeronautical Division of U S Armys Signal Corps which consisted of one officer and two enlisted men the United States Air Force has grown to become the foremost aerial armed force in the world Although they had to fly French and British planes as the fledgling army aeronautical bureaucracy failed to procure any combat worthy American aircraft which arguably did not exist American aviators performed valiantly in World War I with intrepid pilots of the such as Eddie Rickenbacker and Frank Luke leading the way Between the wars all of aviation commercial and military around the world grew by leaps and bounds as the numbers of aircraft in service and their capabilities tremendously increased Although the Army Air Corps as it was known at the time was no better prepared for World War II than the rest of the army it had developed a highly professional corps of experienced officers who would be able to take advantage of the latest American aircraft technology such as the B 17 Flying Fortress and the P 51 Mustang With the end of the war and the creation of an independent armed force in 1947 the United States Air Force leapt into the jet age with such icons as the F 86 Sabre and the remarkable B 52 Stratofortress which soldiers on today more than fifty years after going into service in 1955 and with the youngest of the 744 plane production run being forty years old having been built in 1962 Air Force covers the entire history of the U S Air Force and its development from its beginnings early in the last century to becoming the worlds largest most powerful and most versatile air combat force Special attention is paid to the air forces recent post Vietnam history and an entire chapter is devoted to Americas air force of the future *United States Air Force History Publications* Air Force History and Museums Program (U.S.), 2000 **U.S. Air Force** Dik A. The Evolution of the US Air Force Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general *American Eagles* ,2024-05-07 Featuring the collection of airplanes art photographs and memorabilia of the National Museum of the U S Air Force at Wright Patterson Air Force Base near Dayton Ohio this magnificently illustrated book tells the story of the beginnings of flight through the creation of the U S Air Force as a separate branch of the military to the unbelievable technological achievements of what is the preeminent air power in the world today Here are combat aces Medal of Honor recipients crusty generals and average citizens who served in the Air Force There are philosophers airplane designers test pilots rocket scientists armorers and grease monkeys More

Histories of the United States Air Force and its predecessor organizations have focused on pilots planes and the use of air power While certainly a large part of the service s history and heritage these studies do not tell the whole story In the last dozen years or so a number of people have begun a serious examination of the history of the enlisted members of the U S Air Force Just as it became clear that economic and business histories would not be complete without looking at rank and file workers so those studying USAF history found that a full picture demanded an inclusion of enlisted personnel These enlisted histories though still few in number nonetheless illuminate several important themes and trends in the history and heritage of the USAF enlisted force First enlisted airmen have always been seen and valued primarily for their high level of technical and or occupational skills Whether serving as aircraft mechanics computer operators personnel clerks or military policemen airmen have always been among the most intelligent and highly trained enlisted individuals in the U S military Second the emphasis on skills and training has helped to promote a professionalization of the USAF enlisted force Third the Air Force has always prized an enlisted force with a high percentage of skilled professional career

noncommissioned officers NCOs And finally over its long history the USAF enlisted force has become more diverse in terms of skills race and gender As an organization the U S Air Force has generally supported policies that promoted its ability to recruit train and retain an enlisted force matching the above characteristics The Air Force has not always matched its practices with its rhetoric concerning the enlisted force but overall the trend has been in the direction of emphasizing training education and professionalization Enlisted members particularly senior noncommissioned officers have played crucial roles in supporting the service s vision for its enlisted force Again and again they provided the day to day ground level leadership that held things together in the face of the many challenges confronting the service Through the ups and downs in the provision of pay housing and medical care the Korean and Vietnam Wars the integration of African Americans and women the transition to the all volunteer force and the end of the Cold War U S Air Force NCOs stepped up to the leadership challenges presented them They are a proud group with their own heroes schools professional organizations traditions and memorials As the Air Force looked to its enlisted personnel for crucial leadership in its first half century it will in all probability continue to rely on its enlisted leadership as it enters the twenty first century
