## History Of Nasa:

**Research in NASA History: A Guide to the NASA History Program**, 1997      Research in NASA History: A Guide to the NASA History Program, 1992      NASA Spaceflight Roger D. Launius, Howard E. McCurdy, 2017-10-11 This book presents the first comprehensive history of innovation at NASA bringing together experts in the field to illuminate how public private and international partnerships have fueled new ways of exploring space since the beginning of space travel itself Twelve case studies trace the messy risky history of such partnerships exploring the role of AT all have challenged conventional methods of doing the public s business in space Together these essays offer new insights into how innovation happens with invaluable lessons for policymakers investors economists and members of the space community      **Research in NASA History** Steven J. Dick, Stephen J. Garber, Jane H. Odom, 2009 As the National Aeronautics and Space Administration NASA celebrated its 50th anniversary in 2008 historians as well as scientists and engineers could look back on a record of accomplishment Much has been written about the evolution of NASA s multifaceted programs and the people who carried them out Yet much remains to be done and we hope this publication will facilitate research in this important field As an active internal function NASA history also marks its 50th year in 2009 As is evident from this publication the various NASA Centers carry out historical and archival functions Research in NASA History describes the efforts of NASA to capture and record the events of its past and to make that past accessible to NASA personnel the historical community and researchers It describes the research opportunities and accomplishments of NASA s Agencywide history program It also offers a concise guide to the historical documentary resources available at NASA Headquarters in Washington DC at NASA facilities located around the country and through the federal records systems This third edition of Research in NASA History replaces the first two editions published in 1992 and 1997 respectively Those editions were preceded by History at NASA 1986 prepared by Sylvia Fries and the Guide to Research in NASA History first issued in 1976 and written by Alex Roland second through seventh editions As an introduction to the field of space history researchers may wish to consult Critical Issues in the History of Spaceflight NASA SP 2006 4702 edited by Steven J Dick and Roger D Launius and published in 2006 Readers will find there some measure of the riches that await researchers in NASA history      *When Biospheres Collide: A History of NASA's Planetary Protection Programs* Michael Meltzer, 2012-01-27 PRINT FORMAT ONLY NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price This new book from the NASA History Series tackles an interesting duo of biological problems that will be familiar to anybody who has seen photos of Apollo astronauts quarantined after their return to Earth Namely how do we avoid contaminating celestial bodies with Earthly germs when we send spacecraft to study these bodies and how do we avoid spreading foreign biological matter from space when our robotic and human spacefarers return to Earth Biological matter from an external system could potentially cause an unchecked epidemic either on Earth or in space so strict precautions are necessary Each time a space vehicle visits

another world it runs the risk of forever changing that extraterrestrial environment We are surrounded on Earth by a m  
 lange of different microorganisms and if some of these hitchhike onboard a space mission they could contaminate and start  
 colonies on a different planet Such an occurrence would irrevocably alter the nature of that world compromise all future  
 scientific exploration of the body and possibly damage any extant life on it By inadvertently carrying exotic organisms back to  
 Earth on our spacecraft we also risk the release of biohazardous materials into our own ecosystem Such concerns were  
 recognized by scientists even before the 1957 launch of Sputnik This book presents the history of planetary protection by  
 tracing the responses to the above concerns on NASA s missions to the Moon Mars Venus Jupiter Saturn and many smaller  
 bodies of our solar system The book relates the extensive efforts put forth by NASA to plan operations and prepare space  
 vehicles that return exemplary science without contaminating the biospheres of other worlds or our own To protect  
 irreplaceable environments NASA has committed to conducting space exploration in a manner that is protective of the bodies  
 visited as well as of our own planet
