The History of the Soviet Atomic Industry Arkadii Kruglov, 2002-08-15 For the first time readers can discover the numerous pioneers of the Soviet nuclear industry including the role of scientific supervisors of Russia's nuclear project and the statesmen who coordinated the function of the atomic industry in the former USSR This is a detailed account translated to English for the first time of the development of

Soviet Atomic Project, The: How The Soviet Union Obtained The Atomic Bomb Lee G Pondrom, 2018-07-25 Political intrigue the arms race early developments of nuclear science espionage and more are all present in this gripping book The book is crisply written and well worth the read The text includes a number of translated segments of official documents plus extracts from memoirs of some of the people involved So although Pondrom sprinkles his opinions throughout there is sufficient material to permit readers to make their own judgements CERN The book describes the lives of the people who gave Stalin his weapon scientists engineers managers and prisoners during the early post war years from 1945 1953 Many anecdotes and vicissitudes of life at that time in the Soviet Union accompany considerable technical information regarding the solutions to formidable problems of nuclear weapons development The contents should interest the reader who wants to learn more about this part of the history and politics in 20th century physics The prevention of nuclear proliferation is a topic of current interest and the procedure followed by the Soviet Union as described in this book will help to understand the complexities involved

Stalin and the Bomb David Holloway, 2008-10-01 The classic and utterly engrossing study of Stalin's pursuit of a nuclear bomb during the Cold War by the renowned political scientist and historian Foreign Affairs For forty years the U S Russian nuclear arms race dominated world politics yet the Soviet nuclear establishment was shrouded in secrecy Then shortly after the collapse of the Soviet Union David Holloway pulled back the Iron Curtain with his marvelous groundbreaking study *Stalin and the Bomb* The New Yorker How did the Soviet Union build its atomic and hydrogen bombs What role did espionage play How did the American atomic monopoly affect Stalin's foreign policy What was the relationship between Soviet nuclear scientists and the country's political leaders David Holloway answers these questions by tracing the dramatic story of Soviet nuclear policy from developments in physics in the 1920s to the testing of the hydrogen bomb and the emergence of nuclear deterrence in the

mid 1950s This magisterial history throws light on Soviet policy at the height of the Cold War illuminates a central element of the Stalinist system and puts into perspective the tragic legacy of this program environmental damage a vast network of institutes and factories and a huge stockpile of unwanted weapons *Encyclopedia of the Cold War* Ruud van Dijk, William Glenn Gray, Svetlana Savranskaya, Jeremi Suri, Qiang Zhai, 2013-05-13 Between 1945 and 1991 tension between the USA its allies and a group of nations led by the USSR dominated world politics This period was called the Cold War a conflict that stopped short to a full blown war Benefiting from the recent research of newly open archives the Encyclopedia of the Cold War discusses how this state of perpetual tensions arose developed and was resolved This work examines the military economic diplomatic and political evolution of the conflict as well as its impact on the different regions and cultures of the world Using a unique geopolitical approach that will present Russian perspectives and others the work covers all aspects of the Cold War from communism to nuclear escalation and from UFOs to red diaper babies highlighting its vast ranging and lasting impact on international relations as well as on daily life Although the work will focus on the 1945 1991 period it will explore the roots of the conflict starting with the formation of the Soviet state and its legacy to the present day Bulletin, 1992 **New East-bloc Evidence on the Cold War in the Third World and the Collapse of Détente in the 1970s**, 1996 **Studies in Intelligence**, 2000 **Reader's Guide to the History of Science** Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn Bulletin of the Institute for the Study of the History and Culture of the USSR, 1954 Russian Strategic Nuclear Forces Oleg Bukharin, Frank Von Hippel, 2004 A comprehensive databook of technical and institutional facts about the Soviet and Russian nuclear arsenal **Cold War Statesmen Confront the Bomb** John Gaddis, Philip Gordon, Ernest May, Jonathan Rosenberg, 1999-04-01 Cold War Statesmen Confront the Bomb Nuclear Diplomacy Since 1945 is a path breaking work that uses biographical techniques to test one of the most important and widely debated questions in international politics Did the advent of the nuclear bomb prevent the Third World War Many scholars and much conventional wisdom assumes that nuclear deterrence has prevented major power war since the end of the Second World War this remains a principal tenet of US strategic policy today Others challenge this assumption and argue that major war would have been obsolete even without the bomb This book tests these propositions by examining the careers of ten leading Cold War statesmen Harry S Truman John Foster Dulles Dwight D Eisenhower John F Kennedy Josef Stalin Nikita Krushchev Mao Zedong Winston Churchill Charles De Gaulle and Konrad Adenauer and asking whether they viewed war and its acceptability differently after the advent of the bomb The book's authors argue almost unanimously that nuclear weapons did have a significant effect on the thinking of these leading

statesmen of the nuclear age but a dissenting epilogue from John Mueller challenges this thesis Ukraine's Nuclear History Polina Sinovets, 2022-02-13 This book presents a comprehensive overview of Ukraine's nuclear history beginning from its experiences within the Russian Empire in the early 20th century through the Soviet period to the emergence of Ukraine as an independent state that inherited the world's third largest nuclear arsenal The book discusses the development of the nuclear infrastructure on Ukrainian soil and offers a rich and nuanced background of how Ukraine became an important and integrated part of the Soviet nuclear infrastructure It further analyzes Ukraine's nuclear disarmament based on extensive primary source material and places the Ukrainian nuclear reversal process in a larger international political context where Russia's the United States and other players' actions are interpreted in the light of the impact on the current nuclear non proliferation regime Finally the book presents the nuclear related development after the nuclear disarmament It describes the integration of Ukraine into the international community and the role of nuclear power in the energy mix of the nation today Concluding Ukraine's adaptation to the new security situation after the Russian annexation of Crimea is described and discussed This volume is a must read for scholars researchers students and policy makers interested in a better understanding of Ukraine's nuclear history the political background of the conflict in Eastern Ukraine as well as of security studies and international relations in general The work on this book has been supported by the Swedish Radiation Authority SSM in the Nuclear History of Ukraine Project 2015-2019

Science and Technology in the Global Cold War Naomi Oreskes, John Krige, 2014-10-31 Investigations of how the global Cold War shaped national scientific and technological practices in fields from biomedicine to rocket science The Cold War period saw a dramatic expansion of state funded science and technology research Government and military patronage shaped Cold War technoscientific practices imposing methods that were project oriented team based and subject to national security restrictions These changes affected not just the arms race and the space race but also research in agriculture biomedicine computer science ecology meteorology and other fields This volume examines science and technology in the context of the Cold War considering whether the new institutions and institutional arrangements that emerged globally constrained technoscientific inquiry or offered greater opportunities for it The contributors find that whatever the particular science and whatever the political system in which that science was operating the knowledge that was produced bore some relation to the goals of the nation state These goals varied from nation to nation weapons research was emphasized in the United States and the Soviet Union for example but in France and China scientific independence and self reliance dominated The contributors also consider to what extent the changes to science and technology practices in this era were produced by the specific politics anxieties and aspirations of the Cold War Contributors Elena Aronova Erik M Conway Angela N H Creager David Kaiser John Krige Naomi Oreskes George Reisch Sigrid Schmalzer Sonja D Schmid Matthew Shindell Asif A Siddiqi Zuoyue Wang Benjamin Wilson

Nuclear Power in Stagnation David Toke, Geoffrey Chun-Fung Chen, Antony Froggatt, Richard Connolly, 2021-03-08 This book studies the extent

to which nuclear safety issues have contributed towards the stagnation of nuclear power development around the world and accounts for differences in safety regulations in different countries In order to understand why nuclear development has not met widespread expectations this book focusses on six key countries with active nuclear power programmes the USA China France South Korea the UK and Russia The authors integrate cultural theory and theory of regulation and examine the links between pressures of cultural bias on regulatory outcomes and political pressures which have led to increased safety requirements and subsequent economic costs They discover that although nuclear safety is an important upward driver of costs in the nuclear power industry this is influenced by the inherent need to control potentially dangerous reactions rather than stricter nuclear safety standards The findings reveal that differences in the strictness of nuclear safety regulations between different countries can be understood by understanding differences in cultural contexts and the changes in this over time This book will be of great interest to students scholars and policymakers working on energy policy and regulation environmental politics and policy and environment and sustainability more generally

The Middle East in 1958 Jeffrey G. A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the

piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime Rockets and People Boris Evseevich Chertok,2005 V 1 no special title v 2 Creating a rocket industry v 3 Hot days of the Cold War v 4 The moon race **Rockets and People, Volume III, Hot Days of the Cold War ,**

Secret Intelligence in the European States System, 1918-1989 Jonathan Haslam,Karina Urbach,2013-12-18 The history of secret intelligence like secret intelligence itself is fraught with difficulties surrounding both the reliability and completeness of the sources and the motivations behind their release which can be the product of ongoing propaganda efforts as well as competition among agencies Indeed these difficulties lead to the Scylla and Charybdis of overestimating the importance of secret intelligence for foreign policy and statecraft and also underestimating its importance in these same areas problems that generally beset the actual use of secret intelligence in modern states But in recent decades traditional perspectives have given ground and judgments have been revised in light of new evidence This volume brings together a collection of essays avoiding the traditional pitfalls while carrying out the essential task of analyzing the recent evidence concerning the history of the European state system of the last century The essays offer an array of insight across countries and across time Together they highlight the critical importance of the prevailing domestic circumstances technological governmental ideological cultural financial in which intelligence operates A keen interdisciplinary eye focused on these developments leaves us with a far more complete understanding of secret intelligence in Europe than we ve had before
