A History Of The Warfare Of Science With Theology In Christendom Andrew Dickson White, 2023 Andrew Dickson White a founding member of Cornell University released *A History of the Warfare of Science with Theology in Christendom* in two volumes in 1896 The original purpose of White s 1874 lecture on *The Battlefields of Science* is stated in the introduction White expanded on this idea in a book titled *The Warfare of Science* that same year He traces the growing separation of science from theology in numerous domains in these books According to science historian Lawrence M Principe No credible historians of science now continue to support the warfare thesis The foundations of the warfare thesis may be found in the writings of two persons John William Draper and Andrew Dickson White from the late 19th century Scientists have known for years that White and Draper s claims are more propaganda than history according to science historian and atheist Ronald Numbers who wrote in a collection about errors committed by White and others The battle paradigm was based on a terrible oversimplification that required all facets of the history of science and religion to fit into one ill chosen conceptual box As a result many scholars ignored the vast amount of historical information that simply didn t fit into that box

Why Did Europe Conquer the World? Philip T. Hoffman, 2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914 Europeans conquered 84 percent of the globe But why did Europe establish global dominance when for centuries the Chinese Japanese Ottomans and South Asians were far more advanced In *Why Did Europe Conquer the World* Philip Hoffman demonstrates that conventional explanations such as geography epidemic disease and the Industrial Revolution fail to provide answers Arguing instead for the pivotal role of economic and political history Hoffman shows that if certain variables had been different Europe would have been eclipsed and another power could have become master of the world Hoffman sheds light on the two millennia of economic political and historical changes that set European states on a distinctive path of development military rivalry and war This resulted in astonishingly rapid growth in Europe's military sector and produced an insurmountable lead in gunpowder technology The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize Debunking traditional arguments *Why Did Europe Conquer the World* reveals the startling reasons behind Europe's historic global supremacy **Oxford University Gazette** University of Oxford, 1911 **Warfare State** David Edgerton, 2005-12-08 A challenge to the central theme of the existing histories of twentieth century Britain that the British state was a welfare state this book argues that it was also a warfare state which supported a powerful armaments industry This insight implies major revisions to our understanding of twentieth century British history from appeasement to wartime industrial and economic policy and the place of science and technology in government David Edgerton also shows how British intellectuals came to think of the state in terms of welfare and decline and includes a devastating analysis of C P Snow's two cultures This groundbreaking book offers a new post welfarist and post declinist account of Britain and an original analysis of the relations of science technology industry and the military It will be essential reading for those working on the history and historiography of twentieth century Britain the historical sociology of war and the history of science and technology
