A painting of a stone well with a thatched roof in a lush green landscape. The well is constructed from stacked stones and has a small thatched roof supported by wooden posts. A bucket is hanging from a pulley in the center. The well is surrounded by dense green foliage and trees. In the background, there are rolling green hills under a blue sky with soft white clouds. The overall style is that of a classic children's book illustration.

**Land of Mottob** Jo Hartman,2006-02 Everyone has wished for something How wishes are made are as different as those making them Some blow out candles on a cake some wish upon the first star seen at night and others wish upon a falling star People toss coins in fountains while others toss them into wishing wells Can buttons be used for making wishes instead of coins Enter the Land of Mottob with Becca Join in her adventure along the many paths through the kingdom Meet unusual beings and learn their well kept secrets of granting wishes This quiet kingdom which is under every wishing well has its share of problems from unwanted humans to troublesome creatures living in its underworld Wishes coins and buttons are a part of the magical kingdom waiting for you in this first book *The Land of Mottob* Thicker Than Water Erica

Cirino,2021-10-07 Much of what you ve heard about plastic pollution may be wrong Instead of a great island of trash the infamous Great Pacific Garbage Patch is made up of manmade debris spread over hundreds of miles of sea more like a soup than a floating garbage dump Recycling is more complicated than we were taught less than nine percent of the plastic we create is reused and the majority ends up in the ocean And plastic pollution isn t confined to the open ocean it s in much of the air we breathe and the food we eat In *Thicker Than Water* The Quest for Solutions to the Plastic Crisis journalist Erica Cirino brings readers on a globe hopping journey to meet the scientists and activists telling the real story of the plastic crisis From the deck of a plastic hunting sailboat with a disabled engine to the labs doing cutting edge research on microplastics and the chemicals we ingest Cirino paints a full picture of how plastic pollution is threatening wildlife and human health *Thicker Than Water* reveals that the plastic crisis is also a tale of environmental injustice as poorer nations take in a larger share of the world s trash and manufacturing chemicals threaten predominantly Black and low income communities There is some hope on the horizon with new laws banning single use items and technological innovations to replace plastic in our lives But Cirino shows that we can only fix the problem if we face its full scope and begin to repair our throwaway culture *Thicker Than Water* is an eloquent call to reexamine the systems churning out waves of plastic waste **Blagdon's political**
