Architectures of Hiding Rana Abughannam,Émélie Desrochers-Turgeon,Pallavi Swaranjali,Federica Goffi,2024-01-31 Architecture manifests as a space of concealment and unconcealment lethe and al theia enclosure and disclosure where its making and agency are both hidden and revealed With an urgency to amplify narratives that are overlooked silenced and unacknowledged in and by architectural spaces histories and theories this book contends the need for a critical study of hiding in the context of architectural processes It urges the understanding of inherent opportunities power structures and covert strategies whether socio cultural geo political environmental or economic as they are related to their hideoscapes the constructed landscapes of our built environments participating in the architectures of hiding Looking at and beyond the intentions and agency that architects possess architectural spaces lend themselves as apparatuses for various forms of hiding and un hiding The examples explored in this book and the creative works presented in the interviews enclosed in the

interludes of this publication cover a broad range of geographic and cultural contexts discursively disclosing hidden aspects of architectural meaning The book investigates the imaginative intrigue of concealing and revealing in design processes along with moral responsibilities and ethical dilemmas inherent in crafting concealment through the making and reception of architecture

The Genesis and Geometry of the Labyrinth Patrick Conty, 2002-12-01 A groundbreaking look at the phenomenon of the labyrinth connecting this ancient symbol to modern scientific principles Illustrated with labyrinths from around the world and throughout history Demonstrates how the labyrinth differs from a maze and how it is a tool for interpreting ancient myths and religious beliefs Draws parallels between the labyrinth and quantum physics showing how through the secrets of the labyrinth we can unlock the mystery of life itself The powerful symbol of the labyrinth exists in countless cultures spanning the globe from Africa and ancient Greece to India China and pre Colombian North and South America For centuries they have been used for religious rituals meditation and spiritual and physical healing In the labyrinth humanity finds a model of the quintessential sacred space that depicts the most profound levels of consciousness Its center is regarded in many cultures as a door between two worlds thus providing individuals with the ideal place for self questioning and meditation In a comprehensive exploration of this time honored symbol Patrick Conty shows how the geometrical construction of the ancient labyrinth corresponds exactly with today's modern geometry illustrating that recent developments in math and physics parallel the science of ancient civilizations By looking at the way the two systems complement each other Conty draws new conclusions about the ancient world and how that world can benefit us right now Conty explores not only physical labyrinths but also reveals how the same transcendent principles are at work in Celtic knot work the designs of ancient Chinese cauldrons the tattoos and tracings of primitive art the textiles of Africa Peru and Central America and the geometric patterns in Islamic art

Borges, Language and Reality Alfonso J. García-Osuna, 2018-11-23 This book brings together the work of several scholars to shed light on the Argentine author Jorge Luis Borges complex relationship with language and reality A critical assumption driving the work is that there is as Jaime Alazraki has put it a genuine effort to overcome the narrowness that Western tradition has imposed as a master and measure of reality in Borges writing That narrowness is in large measure a

consequence of the chronic influence of positivist approaches to reality that rely on empirical evidence for any authentication of what is real This study shows that in opposition to such restrictions Borges saw in fiction in literature the most viable means of discussing reality in a pragmatic manner Moreover by scrutinising several of the author's works it establishes signposts for considering the truly complicated relationship that Borges had with reality one that intimately associates the real with human perception insight and language

The Return of the Contemporary Nicolás Campisi, 2024-12-17 In *The Return of the Contemporary* Nicolás Campisi combines the fields of post dictatorship studies and environmental humanities to analyze Latin American cultural production in the neoliberal age Each chapter pairs two authors from different parts of Latin America and the Caribbean who create a common vocabulary in which to frame the various crises of the region's present and recent past such as climate change forced migration the collapse of state institutions and the afterlives of slavery By situating his argument at the intersection of ecocritical and environmental humanities affect studies and the politics of memory and postmemory Campisi presents new comparative methods to show how Latin America's neoliberal crisis prompted significant changes in how the novel as a form imagines a different future

Voicing the Void Sara R. Horowitz, 2012-02-01 CHOICE 1997 Outstanding Academic Books Through new close readings of Holocaust fiction this book takes the field of Holocaust Studies in an important new direction Reading a wide range of narratives representing different nationalities styles genders and approaches Horowitz demonstrates that muteness not only expresses the difficulty in saying anything meaningful about the Holocaust it also represents something essential about the nature of the event itself The radical negativity of the Holocaust ruptures the fabric of history and memory emptying both narrative and life of meaning At the heart of Holocaust fiction lies a tension between the silence that speaks the rupture and the narrative forms that attempt to represent to bridge it This book argues that the central issues in Holocaust historiography and literary criticism are not simply prompted by the fictionality of imaginative literature they are already embedded as self critique in the fictional narratives While the current critical discourse argues either for or against the unrepresentability of these events and thus the appropriateness of imaginative literature this book develops the theme of muteness as the central way in which literary texts explore and provisionally resolve these central issues Focusing on the problem of muteness helps unfold the ambivalences and ambiguities that shape the way we read Holocaust fiction and the way we think about the Holocaust itself

Unhomely Rooms Roberto Ignacio Díaz, 2002 Even as he exposes the cultural fragmentation of Spanish America Díaz's critical gesture allows strangeness to become an integral part not only of individuals as Freud argues in *The Uncanny* but also of national cultural communities

BOOK JACKET Jewish Science Fiction and Fantasy through 1945 Valerie Estelle Frankel, 2021-06-17 Science fiction first emerged in the Industrial Age and continued to develop into its current form during the twentieth century This book analyses the role Jewish writers played in the process of its creation and development The author provides a comprehensive overview bridging such seemingly disparate themes and figures as the ghetto legends of

the golem and their influence on both Frankenstein and robots the role of Jewish authors and publishers in developing the first science fiction magazine in New York in the 1930s and their later contributions to new and developing medial forms like comics and film Drawing on the historical context and the positions Jews held in the larger cultural environment the author illustrates how themes and tropes in science fiction and fantasy relate back to the realities of Jewish life in the face of global anti-Semitism the struggle to assimilate in America and the hope that was inspired by the founding of Israel *The Quantum Labyrinth* Paul Halpern, 2017-10-17 The story of the unlikely friendship between the two physicists who fundamentally recast the notion of time and history In 1939 Richard Feynman a brilliant graduate of MIT arrived in John Wheeler's Princeton office to report for duty as his teaching assistant A lifelong friendship and enormously productive collaboration was born despite sharp differences in personality The soft-spoken Wheeler though conservative in appearance was a raging nonconformist full of wild ideas about the universe The boisterous Feynman was a cautious physicist who believed only what could be tested Yet they were complementary spirits Their collaboration led to a complete rethinking of the nature of time and reality It enabled Feynman to show how quantum reality is a combination of alternative contradictory possibilities and inspired Wheeler to develop his landmark concept of wormholes portals to the future and past Together Feynman and Wheeler made sure that quantum physics would never be the same again

Google and the Culture of Search Ken Hillis, Michael Petit, Kylie Jarrett, 2013 Google and the Culture of Search examines the role of search technologies in shaping the contemporary digital and informational landscape Ken Hillis and Michael Petit shed light on a culture of search in which our increasing reliance on search engines like Google Yahoo and Bing influences the way we navigate Web content and how we think about ourselves and the world around us online and off Even as it becomes the number one internet activity the very ubiquity of search technology naturalizes it as utilitarian and transparent an assumption that Hillis and Petit explode in this innovative study Commercial search engines supply an infrastructure that impacts the way we locate prioritize classify and archive information on the Web and as these search functionalities continue to make their way into our lives through mobile GPS-based platforms and personalized results distinctions between the virtual and the real collapse Google a multibillion-dollar global corporation holds the balance of power among search providers and the biases and individuating tendencies of its search algorithm undeniably shape our collective experience of the internet and our assumptions about the location and value of information Google and the Culture of Search explores what is at stake for an increasingly networked culture in which search technology is a site of knowledge and power This comprehensive study of search technology's broader implications for knowledge production and social relations is an indispensable resource for students and scholars of Internet and new media studies the digital humanities and information technology Provided by publisher
