Lake Biwa:

Lake Biwa: Interactions between Nature and People Hiroya Kawanabe, Machiko Nishino, Masayoshi Maehata, 2020-08-25 Although the first edition had a similar focus more than five years have passed since its publication and the biological and social circumstances of the lake have drastically changed due to for example the further expansion of alien species the decrease of indigenous species the progress of integrated watershed management by the Union of the Kansai Government which was established in 2010 the legislation of the Conservation and Restoration Act of Lake Biwa in 2015 and more The new edition will therefore feature updated and new information on the above and more topics as well as updated and revised data based on the latest research Inventories of respective taxa especially those of small animals are also revised based on the latest studies Furthermore this volume covers the characteristics of the biota of this ancient lake but at the same time it will also approach it as a culture ancient lake Other topics also include water pollution lakeshore development the effects of global warming in the past and present the influence of people and countermeasures by local and national governments Moreover the volume also provides a comprehensive view on the future of Lake Biwa and that of its residents Miraculously enough this ancient lake has kept its water quality clear even until today despite the fact of more than 14 million people living on its shores Finally the book also gives indispensable information to those engaged in improving and conserving water regimes of lakes and other water bodies all over the world and to those interested in the culture and history of Japan Lake Biwa is not only one of the rarest ancient lakes of the world but the people's involvement with the lake also goes back a long way This is shown in the diverse culture developed in this area and in the various archaeological finds that date back as early as the Jomon Period nearly 10 000 years ago Today Lake Biwa fulfills an important role as a water resource by providing domestic commercial industrial and agricultural water for over 14 million residents living around the Lake Biwa Yodo River drainage basin This updated volume focuses on the geological and biological features of the lake as well as on the long term interactions between the people and the lake *Terrestrial Ecosystems in a Changing World* Josep G. Canadell, Diane E. Pataki, Louis F. Pitelka, 2007-01-10 Over 100 authors present 25 contributions on the impacts of global change on terrestrial ecosystems including key processes of the earth system such as the CO₂ fertilization effect shifts in disturbances and biome distribution the saturation of the terrestrial carbon sink and changes in functional biodiversity ecosystem services such the production of wheat pest control and carbon storage in croplands and sensitive regions in the world threaten by rapid changes in climate and land use such as high latitudes ecosystems tropical forest in Southeast Asia and ecosystems dominated by Monsoon climate The book also explores new research developments on spatial thresholds and nonlinearities the key role of urban development in global biogeochemical processes and the integration of natural and social sciences to address complex problems of the human environment system *Forest Ecosystems and Environments* Takashi Kohyama, Josep Canadell, Dennis S. Ojima, Louis F. Pitelka, 2006-04-19 Coastal East and Southeast Asia are characterized by

wet growing seasons and species rich forest ecosystems develop throughout the latitudinal and altitudinal gradients In this region the Global Change Impacts on Terrestrial Ecosystems in Monsoon Asia TEMA project was carried out as a unique contribution to the international project Global Change and Terrestrial Ecosystems TEMA aimed to integrate forest ecosystem processes from leaf physiology to meteorological budget and prediction of long term change of vegetation composition and architecture through demographic processes Special attention was given to watershed processes where forest ecosystem metabolism affects the properties and biogeochemical budgets of freshwater ecosystems and where rivers wetlands and lakes are subject to direct and indirect effects of environmental change This volume presents the scaling up concept for better understanding of ecosystem functioning **Data for Science and Technology** Phyllis S.

Glaeser,2013-10-22 Data for Science and Technology covers the proceedings of the Seventh International CODATA Conference This text is comprised of 133 chapters with a total of 180 papers from 400 hundred authors which cover CODATA concerned with environmental and energy questions along with problems of data banking and telecommunications network operations This book provides valuable assessment of data and points out alternatives trends and requirements for the future such as production and use of data in pure applied sciences data for the development of human settlements in a dynamic world informatical analysis of scientific research activities and data on our evolutionary heritage Researchers from all scientific fields will find this book a great source reference material since it presents research from various disciplines

Forging Environmentalism Joanne R Bauer,2015-01-28 Drawing on an unusually rich empirical base this timely and compelling book examines how environmental values are constructed and legitimized within the policy process It trains the spotlight on four environmentally significant countries China Japan India and the United States representing a wide diversity of cultural social economic and political characteristics Through a combination of case studies and comparative analysis the contributors illuminate cultural assumptions standards and analytic techniques that shape environmental actions and policies around the world Forging Environmentalism provides valuable direction regarding what can be done to secure public support for environmental policies Incorporating expert legal economic philosophical sociological and political perspective points the way toward the possibilities for a convergence of environmental norms and values across diverse cultures Aquatic

Biodiversity Koen Martens,2012-12-06 In this age of increased fundamental and applied research on biodiversity no single volume was as yet devoted to the various temporal and spatial aspects of aquatic biodiversity The present book is published in honour of Professor Henri Dumont Ghent Belgium at the occasion of his retirement as Editor in Chief of Hydrobiologia The volume presents a selection of contributions on aquatic biodiversity written by colleagues from the editorial board fellow editors of aquatic journals and former students and collaborators Contributions deal with a wide spectrum of topics related to aquatic biodiversity and cover fields such as actual and palaeolimnology taxonomy and fundamental and applied limnology Even reconnaissance chapters on management and cultural impact of water bodies are included The book combines state of

the art contributions in aquatic sciences *Climatic Change and Global Warming of Inland Waters* Charles R. Goldman, Michio Kumagai, Richard D. Roberts, 2012-11-20 Effects of global warming on the physical chemical ecological structure and function and biodiversity of freshwater ecosystems are not well understood and there are many opinions on how to adapt aquatic environments to global warming in order to minimize the negative effects of climate change *Climatic Change and Global Warming of Inland Waters* presents a synthesis of the latest research on a whole range of inland water habitats lakes running water wetlands and offers novel and timely suggestions for future research monitoring and adaptation strategies A global approach offered in this book encompasses systems from the arctic to the Antarctic including warm water systems in the tropics and subtropics and presents a unique and useful source for all those looking for contemporary case studies and presentation of the latest research findings and discussion of mitigation and adaptation throughout the world Edited by three of the leading limnologists in the field this book represents the latest developments with a focus not only on the impact of climate change on freshwater ecosystems but also offers a framework and suggestions for future management strategies and how these can be implemented in the future Limnologists Climate change biologists fresh water ecologists palaeoclimatologists and students taking relevant courses within the earth and environmental sciences will find this book invaluable The book will also be of interest to planners catchment managers and engineers looking for solutions to broader environmental problems but who need to consider freshwater ecology **Integrative Observations and Assessments**

Shin-ichi Nakano, Tetsukazu Yahara, Tohru Nakashizuka, 2014-06-04 This volume focuses on new trends in monitoring biodiversity in the Asia Pacific region one of the most rapidly changing areas in the world It provides reviews of the challenges in studying the spatial variability of biodiversity across various ecosystems This book also describes newly developed concepts and methods for biodiversity observation including ubiquitous genotyping systematic conservation monitoring of the functions and services of ecosystems and biodiversity informatics These contributions will lead to establishing integrative observations and assessments of biodiversity essential for reporting the current status and for the effective conservation and sustainable use of biodiversity This work will interest biodiversity researchers not only in the Asia Pacific region but also across the entire globe Fish biology in Japan: an anthology in honour of Hiroya Kawanabe Masahide Yuma, Izumi Nakamura, Kurt D. Fausch, 2013-04-17 This volume is a collection of papers assembled to honor Hiroya Kawanabe an eminent Japanese ecologist who studied fishes and other organisms Kawanabe retired from his position as Professor at Kyoto University in March 1996 In the first section of the volume his career is highlighted by a biography describing his life and work a bibliography of his more than 750 lifetime publications and a personal interview with a colleague who has been close to his work throughout his career Papers in the second section of the volume include invited reviews of research on fish ecology in Japan a historical overview of freshwater fishes of Japan and recent studies on sex change among reef fishes The 24 papers in the third section of the volume by Japanese fish biologists and their collaborators

cover a wide variety of topics on fish biology These include papers on evolution genetics systematics reproductive biology early life history life history variation behavior physiology ecology and zoogeography These papers address fishes from lentic lotic and marine ecosystems in Japan Asia Africa North America and in some cases worldwide One of Hiroya Kawanabe s most brilliant and lasting contributions was to foster collaboration between Japanese ecologists and other scientists

Integrated Water Resources Management in Practice Roberto Lenton, 2012-08-21 Better water management will be crucial if we are to meet many of the key challenges of this century feeding the worlds growing population and reducing poverty meeting water and sanitation needs protecting vital ecosystems all while adapting to climate change The approach known as Integrated Water Resources Management IWRM is widely recognized as the best way forward but is poorly understood even within the water sector Since a core IWRM principle is that good water management must involve the water users the understanding and involvement of other sectors is critical for success There is thus an urgent need for practical guidance for both water and development professionals based on real world examples rather than theoretical constructs That is what this book provides Using case studies the book illustrates how better water management guided by the IWRM approach has helped to meet a wide range of sustainable development goals It does this by considering practical examples looking at how IWRM has contributed at different scales from very local village level experiences to reforms at national level and beyond to cases involving trans boundary river basins Using these on the ground experiences from both developed and developing countries in five continents the book provides candid and practical lessons for policy makers donors and water and development practitioners worldwide looking at how IWRM principles were applied what worked and equally important what didn't work and why Published with the Global Water Partnership
