Architecture and Artifacts of the Pennsylvania Germans: Constructing Identity in Early America ,

Architecture and Landscape of the Pennsylvania Germans, 1720-1920 Sally McMurry, Nancy Van

Dolsen, 2011-03-08 The phrase Pennsylvania German architecture likely conjures images of either the continental three room house with its huge hearth and five plate stoves or the huge Pennsylvania bank barn with its projecting overshoot. These and other trademarks of Pennsylvania German architecture have prompted great interest among a wide audience from tourists and genealogists to architectural historians, antiquarians and folklorists. Since the nineteenth century, scholars have engaged in field measurement and drawing, photographic documentation and careful observation, resulting in a scholarly conversation about Pennsylvania German building traditions. What cultural patterns were being expressed in these buildings? How did shifting social, technological and economic forces shape architectural changes? Since those early forays, our understanding has moved well beyond the three room house and the forebay barn. In *Architecture and Landscape of the Pennsylvania Germans, 1720-1920*, eight essays by leading scholars and preservation professionals not only describe important architectural sites but also offer original interpretive insights that will help advance understanding of Pennsylvania German culture and history. Pennsylvania Germans' lives are traced through their houses, barns, outbuildings, commercial buildings, churches and landscapes. The essays bring to bear years of field observation as well as engagement with current scholarly perspectives on issues such as the nature of ethnicity, the social construction of landscape and recent historiography about the Pennsylvania Germans. Dozens of original measured drawings appearing here for the first time in print document important works of Pennsylvania German architecture, including the iconic Bertolet barns in Berks County, the Martin Brandt farm complex in Cumberland County, a nineteenth century Pennsylvania German housemill and urban houses in Lancaster. Lestz, 1992 **Lancaster County** Ed Klimuska, Keith Baum, Jerry Irwin, 1975 Our local experts tell the whole story of this remarkable area. **The Pennsylvania Dutch Country** Irwin Richman, 2004 Taking the name Pennsylvania Dutch from a corruption of their own word for themselves, Deutsch, the first German settlers arrived in Pennsylvania in 1683. By the time of the American Revolution, their influence was such that Benjamin Franklin, among others, worried that German would become the commonwealth's official language. The continuing influence of the Church, peoples the Amish and Mennonites, and others who constitute the still vibrant Dutch culture can be seen today in icons of Americana, from apple pie to log cabins. *Architecture and Landscape of the Pennsylvania Germans, 1720-1920* Vernacular Architecture Forum (U.S.). Meeting, 2004 [Many Identities, One Nation](#) Liam Riordan, 2010-11-24 The richly diverse population of the mid-Atlantic region distinguished it from the homogeneity of Puritan New England and the stark differences of the plantation South that still dominate our understanding of early America. In *Many Identities, One Nation*, Liam Riordan explores how the American Revolution politicized religious, racial and ethnic identities among the diverse inhabitants of

Pennsylvania Delaware and New Jersey Attending to individual experiences through a close comparative analysis Riordan explains the transformation from British subjects to U S citizens in a region that included Quakers African Americans and Pennsylvania Germans In the face of a gradually emerging sense of nationalism varied forms of personal and group identities took on heightened public significance in the Revolutionary Delaware Valley While Quakers in Burlington New Jersey remained suspect after the war because of their pacifism newly freed slaves in New Castle Delaware demanded full inclusion and bilingual Pennsylvania Germans in Easton Pennsylvania successfully struggled to create a central place for themselves in the new nation By placing the public contest over the proper expression of group distinctiveness in the context of local life Riordan offers a new understanding of how cultural identity structured the early Jacksonian society of the 1820s as a culmination of the American Revolution in this region This compelling story brings to life the popular culture of the Revolutionary Delaware Valley through analysis of wide ranging evidence from architecture folk art clothing and music to personal papers newspapers and local church tax and census records The study s multilayered local perspective allows us to see how the Revolutionary upheaval of the colonial status quo penetrated everyday life and stimulated new understandings of the importance of cultural diversity in the Revolutionary nation

The English School (Volumes I and II) Malcolm Seaborne, Roy Lowe, 2022-07-30 Britain has a rich heritage of school buildings dating from the later Middle Ages to the present day. While some of these schools have attracted the attention of architectural historians, they have not previously been considered from the educational viewpoint. Even schools of little or no architectural interest are important sociologically since the changing architecture of schools reflects changing ideas about how children should be educated and organized for teaching purposes. Documentary material relating to education is often fragmentary and buildings may thus constitute the only real source of knowledge about the development of particular schools and can also throw light on general educational history. Originally published in 1971 and 1977, these books are therefore not only a major contribution to architectural history but also a study in the development of educational ideas and practices from the fourteenth to the twentieth century.

Making Sense of the Industrial Revolution Steven King, Geoffrey Timmins, 2001-07-06 This comprehensive and innovative book on the Industrial Revolution uses carefully chosen case studies illustrated with extracts from contemporary documents to offer new perspectives on the process and impact of industrialization. The authors look at the development of economic structures, the financing of the Industrial Revolution, technological advances, markets and demand, and agricultural progress. The book also deals with changes in demography, the household, families and the built environment.

Alkoholkonsum am Beginn des Industriezeitalters (1700-1850): Die Region Manchester Gunther Hirschfelder, 2003 Das Leben am Beginn des Industriezeitalters war hart und viele Menschen tranken Unmengen von Alkohol, um das Elend zu vergessen, so lautet die gängige Forschungsmeinung. Dass alles ganz anders war, belegt die Studie von Gunther Hirschfelder. Mit seiner Untersuchung der Trinkgewohnheiten nimmt der Autor den Kulturwandel der Zeit zwischen 1700 und 1850 in den Blick. Im Fokus stehen die beiden frühneuzeitlichen Zentren schlechthin: das rheinische Aachen und das nordenglische Manchester, die erste Fabrikstadt der Welt. Als einbandige Ausgabe ist das Werk schon im Frühjahr 2002 angekündigt worden. Wegen zahlreicher Bearbeitungen wird es jetzt in zwei Bänden vorgelegt, die sukzessive erscheinen und auch getrennt bestellt werden können.
