Making People Behave Elizabeth Burney, 2013-05-13 Anti social behaviour has become a label attached to a huge range

of nuisance and petty crime and rarely out of the headlines as tackling this problem has become a central part of the British government's crime control policy. At the same time anti social behaviour has provided the lever for control mechanisms ranging from the draconian to the merely bureaucratic most notably in the shape of the Anti Social Behaviour Order or ASBO This book seeks to explain why anti social behaviour as a focus of political rhetoric legislative activity and social action has gained such a high profile in Britain in recent years and it provides a critical examination of current policies of enforcement and exclusion It examines both the political roots of the variety of new measures which have been introduced and also the deeper social explanations for the unease expressed about anti social behaviour more generally This updated new edition of Making People Behave takes full account of recent legal and policy changes including the Respect agenda as well as relevant research on the subject It also contains two wholly new chapters one of them devoted to the expanding web of behaviour controls the other on Scotland which provides an alternative to the enforcement oriented approach evident in England and Wales complementing the wider coverage in the book of developments in North America and Europe South, 1999-02-23 This authoritative overview of drugs and society today examines whether a process of normalization of drugs and drug use is under way the debate over prohibition versus legislation drugs and users as other or dangerous drugs and dance cultures drug use among young women images of race and drugs medical responses to drugs policing strategies and controlling drug users drug control and sport and the question of prohibition versus liberalization Mischief. Morality and Mobs Dick Hobbs, 2016-08-05 Geoffrey Pearson who died in 2013 was one of the outstanding social scientists of the post second world war era His work spanned social work social theory social history criminology and sociology In particular his work has had a huge impact upon studies of youth youth culture and drugs This collection is made up of contributions from scholars producing empirical work on some of the key areas upon which Geoff Pearson established his reputation All of the writers in this collection have been profoundly influenced by his scholarship This collection focuses on urban ethnography race and ethnicity youth and drugs It includes chapters on women working in male boxing gyms understanding the English Defence League Black male adults as an ignored societal group drug markets and ethnography and sex drugs and kids in care The result is a cutting edge collection that takes readers into social worlds that are difficult to access complex yet utterly normal Overall this is an exciting and fittingly challenging tribute to one of the UKs most important scholars This volume will appeal to scholars and students of criminology sociology social history and research methodology in particular ethnography Bibliographie Internationale de Sociologie 1987 British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences

**Drug Control Policy** William O. Walker,2004-05-01 A detailed look at drug control policy as it has been shaped historically in the United States and other countries most notably in China and East Asia Drug policy has emphasized

suppressing drugs at their source by curtailing their distribution but few policy makers have considered legalization as a remedy On the other hand much of drug policy has been a record of bureaucratic infighting and aggrandizement At the same time it has reflected nativistic and racial biases. These essays suggest however that alternative strategies would not necessarily be any more successful David Courtwright argues that legalization of drugs would create its own problems Given the nature of federal policy institutional structures and social mores the authors question whether drug policy could have been otherwise constructed William O Walker has brought together leading scholars writing in the field to contribute essays that offer broad perspectives on the history of drug policy They provide a comparative and historical lens through which to view the current debate over drug policy in the United States AIDS: Women, Drugs and Social Care Nicholas Dorn, Sheila Henderson, Nigel South, 2005-07-28 Examines the circumstances experiences and needs of HIV positive people in Britain and Ireland and particularly focuses on female drug users and ex drug users Begging questions Dean, Hartley, 1999-09-16 Begging is widely condemned but little understood It is increasingly visible yet politically controversial Recent changes in British social security housing and mental health provision can be seen to have exacerbated the extent of begging in the UK and its persistence is an indictment of the failures of social policy throughout the Western world Though begging is intimately linked to issues of street homelessness mental health substance abuse and social exclusion this book specifically focuses on begging as a distinctive form of marginalised economic activity. It looks at the significance of face to face contact between beggars and passers by the preoccupation with the classification of beggars the stigma associated with begging and judgements required by the passer by the place of begging in the spectrum of informal economic activity. The book provides a comprehensive overview and will stimulate theoretical policy and methodological debates driving forward the research agenda It is important reading for researchers academics and students in social policy social work sociology politics and socio legal studies and also for social work practitioners and particularly policy makers HIV/AIDS in Bangladesh Alak Paul, 2020-10-13 This book aims to show the conditions and behaviors of vulnerable and marginalized people in Bangladesh which put them at risk of HIV AIDS infection and what their adopted coping strategies are and how these play out In addition the book seeks to gain an understanding of the perceptions of civil society and policy planners with respect to vulnerability to HIV and the necessary mitigation measures While there is much published literature on the epidemiology and etiology for the most at risk groups in the region there has not yet been any in depth research concerning the socio cultural and geographic impacts of HIV issues in Bangladesh Almost all of the literature shows HIV as an epidemiological problem rather than investigating it from a social or cultural point of view and still less using qualitative methods. The present work is an endeavor to fill these gaps by providing valuable qualitative field data to demonstrate the causes of HIV risk and vulnerability and to examine the nature of the social and locational context of HIV AIDS in Bangladesh and to assist with health care policy planning The book will be of use to students and researchers studying public health health geography medical sociology

medical anthropology social psychology and social epidemiology and to professionals in the fields of development community medicine health management and social policy The Politics of Addiction S. Mars, 2012-08-20 The Politics of Addiction examines power and policy making in the context of a bitter conflict between private and publicly employed doctors treating addiction Regulation was used by both the profession and the state to shape the treatment of addiction and who could provide it with the media feeding into the process **Cocaine and Crack** Philip Bean, 2016-07-27 The recent surge in the use of crack cocaine in Britain has rightly been a cause for concern In this book the first to be written on the subject in Britain for many years Philip Bean has brought together some of the most respected authorities on the subject to report on their recent research This is an important book for all interested in the subject Criminology Yvonne Jewkes, Gayle Letherby, 2002-05-29 This reader provides a comprehensive introduction for students studying criminology at undergraduate level Not only does the book include 34 essential readings but also editorial commentary with section introductions study questions and suggestions for further reading The reader will provide a thorough grounding in issues related to the study of crime the criminal justice system and social control In their selection the editors have sought to indicate crime s varied and conflicting history as well as its current debates. The mixture of historical and more recent readings shows a variety of perspectives The Reader will be an essential sourcebook for students and teachers in the fields of criminology criminal justice studies the sociology of crime and deviance socio legal studies social policy criminal law and social work
