Heresy, Heretical Truth Or Orthodox Error? Joan O'Grady,1985 The Construction of Orthodoxy and Heresy John B. Henderson,1998-04-16 Presents the first systematic and cross cultural examination of ideas of orthodoxy and heresy in a group of major religious traditions *Encyclopedia of Early Christianity* Everett Ferguson,2013-10-08 First published in 1997 What s new in the Second Edition Some 250 new entries twenty five percent more than in the first edition plus twenty five new expert contributors Bibliographies are greatly expanded and updated throughout More focus on biblical books and philosophical schools their influence on early Christianity and their use by patristic writers More information about the Jewish and pagan environment of early Christianity Greatly enlarged coverage of the eastern expansion of the faith throughout Asia including persons and literature More extensive treatment of saints monasticism worship practices and modern scholars Greater emphasis on social history and more theme articles More illustrations maps and plans Additional articles on geographical regions Expanded chronological table Also includes maps Eric Voegelin and the Problem of Christian Political Order Jeffrey C. Herndon,2007 Although some critics of Eric Voegelin s later work have faulted his failure to deal with the historical Jesus and to address the implications of Christianity for social and political life the recent publication of Voegelin s History of Political Ideas has allowed a more complete assessment of his position regarding the Christian political order This book addresses that criticism through an analysis of Voegelin s early work In Eric Voegelin and the Problem of Christian Political Order Jeffrey C Herndon analyzes the development of Voegelin s thought regarding the origins of Christianity in the person of Jesus the development of the church in the works of Paul and the relationship between an immanent institutional order symbolizing the divine presence and the struggle for social and political order Focusing on the tension between a spiritual phenomenon based on Pauline faith and the institutionalization of that experience in the church Herndon offers one of the first examinations of the relationship of the History of Political Ideas to Voegelin s larger body of work In his wide ranging study Herndon explores Voegelin s examination of the problem of Christian political order from the inception of Christianity through the Great Reformation He also presents a clarification of Voegelin s theory of civilizational foundation and of Voegelin s philosophy of history with regard to Christianity and Western political order Herndon addresses not only the nagging problem in Voegelin scholarship regarding his relationship with the historical Jesus but also the Pauline compromises with the world that enabled Christianity to become the instrument by which the West was civilized He also shows that Voegelin s interpretation of the historical pressures released by the Great Reformation is important to an understanding of his later work regarding the negative effect of Christian symbols in the creation of ideological disorder Eric Voegelin and the Problem of Christian Political Order clarifies issues in Voegelin studies regarding the intersection between political theory and Christian concerns addressing the relation of religious experience to the public sphere of political life in the West and helping to explain Voegelin s contention that the death of the spirit is the price of

progress It offers scholars a perspective heretofore lacking in Voegelin scholarship and a clearer view of Voegelin s understanding of the Christian dispensation and its influence on the course of Western development history and philosophy

The Cross Goes North Martin Carver,2005 37 studies of the adoption of Christianity across northern Europe over1000 years and the diverse reasons that drove the process In Europe the cross went north and east as the centuries unrolled from the Dingle Peninsula to Estonia and from the Alps to Lapland ranging in time from Roman Britain and Gaul in the third and fourth centuries to the conversion of peoples in the Baltic area a thousand years later These episodes of conversion form the basic narrative here History encourages the belief that the adoption of Christianity was somehow irresistible but specialists show theunderside of the process by turning the spotlight from the missionaries who recorded their triumphs to the converted exploring their local situations and motives What were the reactions of the northern peoples to the Christian message Why would they wish to adopt it for the sake of its alliances In what way did they adapt the Christian ethos and infrastructure to suit their own community How did conversion affect the status of farmers of smiths of princes and of women Was society wholly changed or only in marginal matters of devotion and superstition These are the issues discussed here by thirty eight experts from across northern Europe some answers come from astute re readings of the texts alone but most are owed to a combination of history art history and archaeology working together MARTIN CARVER is Professor of Archaeology University of York **Patterns Legitimizing Political Violence in Transcultural Perspectives** Bettina Koch,2015-05-19 This volume explores theoretical discourses in which religion is used to legitimize political violence It examines the ways in which Christianity and Islam are utilized for political ends in particular how violence is used or abused as an expedient to justify political action This research focuses on premodern as well as contemporary discourses in the Middle East and Latin America identifying patterns frequently used to justify the deployment of violence in both hegemonic and anti hegemonic discourses In addition it explores how premodern arguments and authorities are utilized and transformed in order to legitimize contemporary violence as well as the ways in which the use of religion as a means to justify violence alters the nature of conflicts that are not otherwise explicitly religious It argues that most past and present conflicts even if the discourses about them are conducted in religious terms have origins other than religion and or blend religion with other causes namely socio economic and political injustice and inequality Understanding the use and abuse of religion to justify violence is a prerequisite to discerning the nature of a conflict and might thus contribute to conflict resolution Blickling Homilies Richard J. Kelly,2010-07-15 The Blickling Homilies date from the end of the tenth century and form one of the earliest extant collections of English vernacular homiletic writings The homiletic texts survive in a composite codex consisting of Municipal Entries for the Council of Lincoln 14th 17th century a Calendar mid 15th century Gospel Oaths early 14th century and the eighteen homiletic texts that are based on the yearly liturgical cycle The Blickling Homilies are an important literary milestone in the early evolution of the English prose The manuscript in the collection of William H Scheide

housed in Princeton University Library MS 71 s x xi was published in facsimile by Rudolph Willard in 1960 as Volume 10 of Early English Manuscripts in Facsimile Copenhagen It is the only Anglo Saxon MS still in private ownership and together with The Blickling Psalter are the only two Anglo Saxon MSS in the Americas The only previous edition of The Blickling Homilies is by Richard Morris published in three volumes in 1874 1876 1880 reprinted as one volume in 1967 This new edition makes a number of corrections where Morris s manuscript reading is in error The English translations are modernized and made more accurate The original text and facing page translation have been formatted into paragraphs which are hoped to further and aid comprehension Finally the text and translation are accompanied by a general introduction textual notes on each homiletic text tables and charts and a select bibliography Theological Foundations John J. Worth, Jr.,2010-06-28 In 100 A D Christianity was practiced only by a small oppressed minority Three hundred years later Christianity had become one of the world s major religions But this change did not happen easily The imperial government of Rome intellectual tradition and battles within the church itself influenced the transformation Every viewpoint had its champions and opponents and whether they were defenders of the faith or those whom history later labeled heretics they were part of the early evolution of Christianity This volume discusses more than 50 figures who played a role in the transformation from primitive Christianity to early Medieval Catholicism As it examines the lives and influence of imperial rulers such as Constantine proponents of the intellectual tradition including Gregory of Neocaesaria and Julius Africanus and early Bible translators such as Tatian Origen and Jerome the work provides a fascinating look at Christian history

Turner,2004-10-29 Walter Bauer s Orthodoxy and Heresy in Earliest Christianity created a stir with its argument that the teachings later condemned as heresy in the later second century onward were in fact dominant in the earliest decades of the church This full scale response by H E W Turner has not enjoyed the attention it deserves Turner s volume represents a learned and

Berkovitz,Mark Letteney,2018-06-14 The historian s task involves unmasking the systems of power that underlie our sources A historian must not only analyze the content and context of ancient sources but also the structures of power authority and political contingency that account for their transmission preservation and survival But as a tool for interpreting antiquity authority has a history of its own As authority gained pride

of place in the historiographical order of knowledge other types of contingency have faded into the background This book s introduction traces the genesis and growth of the category describing the lacuna that scholars seek to fill by framing texts through its lens The subsequent chapters comprise case studies from late ancient Christian and Jewish sources asking what lies beyond authority as a primary tool of analysis Each uncovers facets of textual and social history that have been obscured by overreliance on authority as historical explanation While chapters focus on late ancient topics the methodological intervention speaks to the discipline of history as a whole Scholars of classical antiquity and the early medieval world will find immediately analogous cases and applications Furthermore the critique of the place of authority as used by historians will find wider resonance across the academic study of history
