populations also often suffered adverse impacts to their health and environment through the large scale and rapid extraction of natural resources and production of goods Through the themes of memory community and place working post industrial landscapes and the de romanticization of industrial pasts this book examines the endurance and decline of these communities the spatial processes of industrial byproducts and the memory and heritage of industrialization and its legacies While based in the traditions of geography this collection also draws upon and will be of great interest to students and scholars of cultural anthropology archaeology sociology history architecture civil engineering and heritage memory museum and tourism studies Using global examples the authors provide a uniquely geographic understanding to industrial heritage across the spaces places and memories of industrial development

Critical Built Heritage Practice and Conservation Johnathan Djabarouti, 2024-01-23 Critical Built Heritage Practice and Conservation Evolving Perspectives supports an alternative point of departure for engaging with the historic built environment by critically questioning the legitimacy of dominant conservation concepts and methods that are often taken for granted within building conservation architecture and adaptive reuse The meaning of heritage is changing From pastness to presentness from preservation to participation and from tangible to intangible heritage is increasingly understood as a dynamic social and intangible process across many disciplines Consequently the role and remit of the built heritage practitioner and in particular the architectural conservationist is becoming progressively complex and in need of a critical gaze Is restoration really a falsehood from beginning to end Should the condition of existing materials determine the conservation method Is authenticity really an inherent quality within old

buildings By engaging with a critical interpretation of heritage this book makes space for practitioners to consider the evolution of their own role within a rapidly changing context of built heritage practice Reinforced by a shift in emphasis from materials to meanings a socio material outlook is proposed which champions an enhanced focus on intangible heritage within the built heritage sector whilst still acknowledging the physical condition of old buildings is a priority for many stakeholders This book has been written with practitioners students and educators of architectural conservation in mind although will also be of relevance to the broader built heritage industry as well as academics researchers and heritage students with a passion for contemporary dialogues in heritage studies
