Merriman, 2006 Guide to history sites on the web for students teachers and researchers Offers the most current coverage of historical information available on the Internet All sites have been thoroughly checked by specialists in the relevant field of history Covers U S and World history

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does

essential resource for the study of the world's past *Marxist History and Postwar Japanese Nationalism* Curtis Anderson Gayle, 2003-08-29 This book explores the historical writings of postwar Japanese Marxists who were and who continue to be surprisingly numerous in the Japanese academic world. It shows how they developed in their historical writing ideas of radical nationalism which accepted presupposed ideas of Japan's ethnic homogeneity but which they saw as a revolutionary subject creating a sphere of radical political action against the state, the American Occupation and global capital. It compares this approach in both prewar and postwar Marxist historiography showing that in the postwar period ideas were more elaborate and put much more emphasis on national education and social mobilization. It also shows how these early postwar discourses have made their way into contemporary ethnic nationalism and revisionism in Japan today. The book's rich and interesting analysis will appeal not just to historians of Japan but also to those interested in nationalism and Marxism more generally.

Western Historiography in Asia Q. Edward Wang, Okamoto Michihiro, Longguo Li, 2022-02-21 This volume provides a unique and critical perspective on how Chinese, Japanese and Korean scholars engage and critique the West in their historical thinking. It showcases the dialogue between Asian experts and their Euro-American counterparts and offers valuable insights on how to challenge and overcome Eurocentrism in historical writing.

Conceptualizing the West in International Relations Thought J. O'Hagan, 2002-04-09 West is a concept widely used in international relations but we rarely reflect on what we mean by the term. Conceptions of and what the West is vary widely. This book examines conceptions of the West drawn from writers from diverse historical and intellectual contexts, revealing both interesting parallels and points of divergence. It also reflects on implications of these different perceptions of how we understand the role of the West and its interactions with other civilizational identities.

Rethinking World History Marshall G. S. Hodgson, 1993-05-28 Is the history of the modern world the history of Europe writ large? Or is it possible to situate the history of modernity as a world historical process apart from its origins in Western Europe? In this posthumous collection of essays Marshall G. S. Hodgson challenges adherents of both Eurocentrism and multiculturalism to rethink the place of Europe in world history. He argues that the line that connects Ancient Greeks to the Renaissance to modern times is an optical illusion and that a global and Asia-centred history can better locate the European experience in the shared histories of humanity. Hodgson then shifts the historical focus and in a parallel move seeks to locate the history of Islamic civilisation in a world historical framework. In so doing he concludes that there is but one history: global history, and that all partial or privileged accounts must necessarily be resituated in a world historical context. The book also includes an introduction by the editor Edmund Burke contextualising Hodgson's work in world history and Islamic history.
