Heritage Of Western Civilization Vol Ii From Revolutions To Modernity:

Of Revelation and Revolution, Volume 2 John L. Comaroff, Jean Comaroff, 2009-02-15 In the second of a proposed three volume study John and Jean Comaroff continue their exploration of colonial evangelism and modernity in South Africa. Moving beyond the opening moments of the encounter between the British Nonconformist missions and the Southern Tswana peoples, *Of Revelation and Revolution Volume II* explores the complex transactions both epic and ordinary among the various *dramatis personae* along this colonial frontier. The Comaroffs trace many of the major themes of twentieth century South African history back to these formative encounters. The relationship between the British evangelists and the Southern Tswana engendered complex exchanges of goods, signs, and cultural markers that shaped not only African existence but also bourgeois modernity back home in England. We see in this volume how the colonial attempt to civilize Africa set in motion a dialectical process that refashioned the everyday lives of all those drawn into its purview, creating hybrid cultural forms and potent global forces which persist in the postcolonial age. This fascinating study shows how the initiatives of the colonial missions collided with local traditions, giving rise to new cultural practices, new patterns of production and consumption, new senses of style and beauty, and new forms of class distinction and ethnicity. As noted by reviewers of the first volume, the Comaroffs have succeeded in providing a model for the study of colonial encounters. By insisting on its dialectical nature, they demonstrate that colonialism can no longer be seen as a one-sided relationship between the conquering and the conquered. It is rather a complex system of reciprocal determinations, one whose legacy is very much with us today. **The Great**

Revolutions and the Civilizations of Modernity Shmuel N. Eisenstadt, 2006-02-01 This book is the analysis of the civilizational and historical context of the development of the Great Modern Revolutions, their relations to modernity, to the civilization of modernity, and to the development of multiple modernities and the fate of revolutionary symbolism and dynamics in modern regimes in the continually changing civilization of modernity, its dynamics and tribulations.

Revolution and the Global Struggle for Modernity Frank Jacob, 2024-03-12 This book is the first volume of a multiple volume endeavor to analyze several revolutions of the long nineteenth and short twentieth century to show how revolutionary processes evolved. It takes a closer look at the Atlantic Revolutions, that is, the American, the French, and the Haitian Revolution. It will therefore use a comparative ten-step model to emphasize similarities with regard to the revolutionary developments in different parts of the world. The book consequently aims at providing a general but deeper understanding of revolutions as a global phenomenon of modernity while explaining how revolutionary processes evolve and develop and how they could and can be corrupted. *The Routledge Handbook to the History and Society of the Americas* Olaf Kaltmeier, Josef Raab, Mike Foley, Alice Nash, Stefan Rinke, Mario Rufer, 2019-04-12 The colonial heritage and its renewed aftermaths expressed in the inter-American experiences of slavery, indigeneity, dependence, and freedom movements to mention only a few aspects, form a common ground of experience in the Western Hemisphere. The flow of peoples, goods,

knowledge and finances have promoted interdependence and integration that cut across borders and link the countries of North and South America together. The nature of this transversally related and multiply interconnected region can only be captured through a transnational multidisciplinary and comprehensive approach. The Routledge Handbook to the History and Society of the Americas explores the history and society of the Americas placing particular emphasis on collective and intertwined experiences. Forty-four chapters cover a range of concepts and dynamics in the Americas from the colonial period until the present century. The shared histories and dynamics of Inter American relationships are considered through pre Hispanic empires, colonization, European hegemony, migration, multiculturalism, and political and economic interdependences. Key concepts are selected and explored from different geopolitical disciplinary and epistemological perspectives. Highlighting the contested character of key concepts that are usually defined in strict disciplinary terms, the Handbook provides the basis for a better and deeper understanding of inter American entanglements. This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history, sociology, political science, cultural, postcolonial, gender, literary, and globalization studies.

The Wars of the French Revolution and Napoleon, 1792-1815 Owen Connelly, 2012-10-02
Written by an experienced author and expert in the field, *Wars of the French Revolution and Napoleon 1792-1815* provides a thorough re-examination of the crucial period in the history of France for students of history and military studies. Based on extensive research and including twenty detailed maps, this study is unique in its focus on the wars of both the French Revolution and Napoleon. Owen Connelly expertly analyzes them both to provide a broader context for warfare. Examining the causes of the wars and how the practices of warfare during this period were to influence mode of combat throughout the nineteenth and twentieth centuries, Connelly also establishes trends discernable in the First and Second World Wars and examines key issues including the impact of the population explosion on armies and war, the legacy of the ancient regime, impact on revolutionary armies, the impact of the Revolution on leadership, strategy, organization, and weaponry. Was Napoleon's leadership style unique or could another have played his role? Contributions from the governments of the early Revolution, the Terror, the Directory, and the Napoleonic regime: What did twenty-three successive years of war accomplish? Was this era a turning point in the history of warfare?

Jeremy D. Popkin, 2010-02-15 The only truly successful slave uprising in the Atlantic world the Haitian Revolution gave birth to the first independent black republic of the modern era Inspired by the revolution that had recently roiled their French rulers black slaves and people of mixed race alike rose up against their oppressors in a bloody insurrection that led to the burning of the colony's largest city a bitter struggle against Napoleon's troops and in 1804 the founding of a free nation Numerous firsthand narratives of these events survived but their invaluable insights into the period have long languished in obscurity until now In *Facing Racial Revolution* Jeremy D Popkin unearths these documents and presents excerpts from more than a dozen accounts written by white colonists trying to come to grips with a world that had suddenly disintegrated These dramatic writings give us our most direct portrayal of the actions of the revolutionaries vividly depicting encounters with the uprising's leaders Toussaint Louverture Boukman and Jean Jacques Dessalines as well as putting faces on many of the anonymous participants in this epochal moment Popkin's expert commentary on each selection provides the necessary background about the authors and the incidents they describe while also addressing the complex question of the witnesses' reliability and urging the reader to consider the implications of the narrators' perspectives Along with the American and French revolutions the birth of Haiti helped shape the modern world The powerful moving and sometimes troubling testimonies collected in *Facing Racial Revolution* significantly expand our understanding of this momentous event **T&T**

The End of Enlightenment Richard Whatmore,2023-12-07 A brilliant work of intellectual interpretation by our foremost historian of Enlightenment ideas Whatmore rescues the Enlightenment from today s circular debates and places it where it belongs in the pulsing chaotic era of its genesis and demise Christopher de Bellaigue The Enlightenment is popularly seen as the Age of Reason a key moment in human history when ideals such as freedom progress natural rights and constitutional government prevailed In this radical re evaluation historian Richard Whatmore shows why for many at its centre the Enlightenment was a profound failure By the early eighteenth century hope was widespread that Enlightenment could be coupled with toleration the progress of commerce and the end of the fanatic wars of religion that were destroying Europe At its heart was the battle to establish and maintain liberty in free states and the hope that absolute monarchies such as France and free states like Britain might even subsist together equally respectful of civil liberties Yet all of this collapsed when states pursued wealth and empire by means of war Xenophobia was rife and liberty itself turned fanatic The End of Enlightenment traces the changing perspectives of economists philosophers politicians and polemicists around the world including figures as diverse as David Hume Adam Smith Edmund Burke and Mary Wollstonecraft They had strived to replace superstition with reason but witnessed instead terror and revolution corruption gross commercial excess and the continued growth of violent colonialism Returning us to these tumultuous events and ideas and digging deep into the thought of the men and women who defined their age Whatmore offers a lucid exploration of disillusion and intellectual transformation a brilliant meditation on our continued assumptions about the past and a glimpse of the different ways our world might be structured especially as the problems addressed at the end of Enlightenment are still with us today
