Breeden,Meg E. Evans,Terah J. Stewart,Erin R. Weston,Rachel Wagner,2025-04-16 Fat on Campus The Voices and Images of Fat College Students and the Impacts of Fatphobia amplifies the voices of 11 fat college students across the United States Defined as a pathological fear of fatness often manifested as negative attitudes and stereotypes about fat people Robinson et al 1993 p 468 fatphobia like other forms of oppression impacts our students and our campuses Unlike other cultural phenomena fatness is one of the last socially acceptable forms of bias This text sheds light on fat students increasing their visibility in higher education explaining why it is important to recognize and address this critical issue on campuses across America Using rich stories from students who self identify as fat this text honors their experiences and highlights how they have created welcoming spaces for themselves in often unwelcoming collegiate environments The book shares findings from a national photovoice research study including narratives and photographs A methodological technique combining storytelling and photography photovoice is often used to inspire social change Aligned with the idea of transforming the future of higher education this book serves as both a call to action for educators and a love letter to fat students on campus The book is designed to engage educators and amplify the voices of fat students in an accessible way While it may be tempting for readers to flip to the section corresponding with their functional area of interest readers are invited to read the whole book and ask themselves How can I extend this research to my own place of work Perfect for courses such as College Environments Diversity in Higher Education Understanding College Students Arts Based Research and Methodologies Qualitative Research      *Cincinnati Magazine* ,1980-04 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region      *Engagements With The World* Ron Leifer MD MA,2013-05 After fifty years of futile research on mind and behavior trying to find their causes in the brain without success psychiatrists and psychologists are turning their attention to the emotions also looking for their causes in the brain also without success The problem is that there is no generally accepted theory or paradigm for understanding the emotions William James suggested that such a paradigm must meet two criteria 1 it must explain each individual emotion i e anxiety anger depression etc and 2 it must relate all the emotions to each other This book presents such a paradigm It is

based on the accepted biological principle that all organisms from the lowest to the highest function in two biological motives which I call bipolar reactivity All organisms seek pleasure and or that which sustains and promotes life and all organisms seek to avoid pain and or that which threatens or disables life Interestingly this biological principle corresponds to a basic principle of Buddhist psychology that the pain we cause to ourselves and to each other is caused by the Three Poisons desire aversion and ego Desire and aversion link humans to the great chain of being and ego distinguishes humans from all other beings and recognizes our unique capacity for symbolic reactivity I have used this paradigm for fifty years in my practice of psychotherapy and have found it very useful for understanding my patients mental and emotional pain and helping them to understand and heal themselves

**Breast Cancer** Julianne S Oktay, J Dianne Garner, 2013-12-16 I will always and forever feel I have a hole in my life where my mother once existed I think when you have to think about the fact you might have to take care of your parents someday and juggle kids at the same time It's a scary proposition We had open communication during and before the breast cancer But then after the breast cancer I was often afraid to bring things up in trying to protect Mom This insightful book tells the stories of women whose mothers had breast cancer It uses their own voices to express the common fears and expectations of daughters in the periods before and during their mothers illnesses involving genetic risks death and dying and changes in their relationships The case studies tables and figures and two appendices will benefit health professionals and counselors while the poignant narratives will help mothers and daughters better understand their experiences with breast cancer I was kind of surprised to be alive and free of cancer at age 42 when at this point my mother was crippled by metastases When I get to be 43 the age at which my mother died or maybe when I get to 44 it's like what do I do I have this life that I didn't expect to have Breast Cancer Daughters Tell Their Stories presents the results of a qualitative grounded theory study of breast cancer survivors providing in depth information about an aspect of breast cancer that has been previously overlooked The book examines the daughters experiences through four phases the period prior to mother's illness the period during mother's illness and treatment the period following mother's death if mother dies and the long term impact From this study recommendations are compiled for providing or improving services for tomorrow's daughters The radical mastectomy left her scarred and disfigured below her nightgown It was bruised and nasty looking That was kind of scary I think that has terrified me since Sometimes I'll have pains in my left breast and that's what I visualize It's terrifying I'm not really obsessed about dying of cancer I'm more along the line of If this is going to happen to me and there's a chance it's going to I'm gonna survive I'm not going to die from it From an empathetic perspective this book reveals how many daughters react to and deal with their mothers diagnoses depending on their age and family situation at the time of their mothers illnesses It shows how daughters can gain a more accurate idea of their level of risk by providing educational materials and developing new strategies for communication It also helps breast cancer survivors see how their illnesses can shape their daughters future outlook offering new inspiration for resolving and preventing family crises
