At a time when the Colorado River and all those who depend on it are in peril this urgent book offers both a love song and a paeon of regret to America's most spectacular river. *Denver Post* and a plea to save it before it's too late. *The Wall Street Journal*. From bestselling author, long-time former *National Geographic Explorer* and anthropologist Wade Davis comes the story of America's Nile: how it once flowed freely and how human intervention has left it near exhaustion, altering the water temperature, volume, local species, and shoreline of the river. Theodore Roosevelt once urged us to leave it as it is. Plugged by no fewer than twenty-five dams, the Colorado is the world's most regulated river, drainage providing most of the water supply of Las Vegas, Tucson, and San Diego, and much of the power and water of Los Angeles and Phoenix, cities that are home to more than 25 million people. If it ceased flowing, the water held in its reservoirs might hold out for three to four years, but after that it would be necessary to abandon most of southern California and Arizona, and much of Colorado, New Mexico, Utah, and Wyoming. For the entire American Southwest, the Colorado is indeed the river of life, which makes it all the more tragic and ironic that by the time it approaches its final destination, it has been reduced to a shadow upon the sand, its delta dry and deserted, its flow a toxic trickle seeping into the sea. Yet despite more than a century of human interference, Davis writes, the splendor of the Colorado lives on in the river's remaining wild rapids, quiet pools, and sweeping canyons. The story of the Colorado River is the human quest for progress and its inevitable effects, and an opportunity to learn from past mistakes and foster the rebirth of America's most iconic waterway. A beautifully told story of historical adventure and natural beauty, *River Notes* is a fascinating journey down the river and through mankind's complicated and destructive relationship with one of its greatest natural resources. Published in Partnership with the David Suzuki Institute. *The Grand Canyon Handbook*, Susan Frank, Phil Frank, 2000. A tour guide to the Grand Canyon. Includes the usual vacation guide information and discusses the flora and fauna as well as cultural and historical information. Annotation c. Book News, Inc. Portland, OR: booknews.com

**A Natural History of Nature Writing** Frank Stewart, 2012-07-11 A Natural History of Nature Writing is a penetrating overview of the origins and development of a uniquely American literature. Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries including Henry D. Thoreau, the father of American nature writing; John Burroughs, a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form; John Muir, founder of the Sierra Club who celebrated the wilderness of the Far West as few before him had; Aldo Leopold, a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants; Rachel Carson, a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems; Edward Abbey, an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes. Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view. Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty, nature writers have had a profound effect on American culture and politics. A Natural History of Nature Writing is an insightful examination of an important body of American literature.
