Beyond Dialogue John B. Cobb Jr., 1998-07-30 Christian Reflection about other religions has often misinterpreted the truth of the other Ways The Roman Catholic Church and the World Council of churches stress that Christians can gain an appreciative understanding of other traditions only through meaningful dialogue with believers of other faiths This book however emphasizes the need for Christians to go beyond dialogue to reach for a mutual transformation of Christianity and other religions By way of example the author explores with originality the Christian encounter with Mahayana Buddhism He offer an original view of how Christianity and Buddhism can appropriately transform one another when both partners are truly respected as equal Both contributing both benefiting John Cobb boldly challenges us to hear in an authentic way the truth which the other has to teach us and to be transformed by that truth

Language Ruth Garrett Millikan, 2005 Guiding the work of most linguists and philosophers of language today is the assumption that language is governed by prescriptive normative rules Many believe that it is of the essence of thought itself to follow rules rules of inference determining the intentional contents of our concepts and that these rules originate as internalized rules of language However exactly what it is for there to be such things as normative rules of language remains distressingly unclear From what source do these norms flow What sanctions enforce them What happens exactly if you don't follow the rules How do children learn the rules Ruth Millikan presents a radically different way of viewing the partial regularities that language displays the norms and conventions of language The central norms applying to language like those norms of function and behavior that account for the survival and proliferation of biological traits are non evaluative norms Specific linguistic forms survive and are reproduced together with co operative hearer responses because in a critical mass of cases these patterns of production and response benefit both speakers and hearers Conformity is needed only often enough to ensure that the co operative use constituting the norm the convention continues to be copied and hence continues to characterize some interactions of some speaker hearer pairs What needs to be reproduced for discursive language forms to survive it turns out is not specific conceptual roles but only satisfaction conditions coupled to essential elements of hearer responses An uncompromising rejection of conceptual analysis as a tool in philosophy results At the same time the distinction between the propositional content and the force of a linguistic utterance comes into very sharp focus force emerging as essential to the creation of content rather than as something added to content The distinction between illocutionary and perlocutionary force the distinction between linguistic meaning and speaker meaning and the semantics pragmatics distinction are each illuminated in new and crisper ways On the model proposed neither the intentionality of thought nor the intentionality of language is derived from the other Processes involved in understanding language are not Gricean but more like direct perception of the world as mediated for example through the natural signs contained in the structured light that allows vision There are also startling implications for pragmatics and for how children learn language

The Art of Joaquín Torres-García Aarnoud Rommens,2016-08-05 Intertwining art history aesthetic theory and Latin American studies Aarnoud Rommens challenges contemporary Eurocentric revisions of the history of abstraction through this study of the Uruguayan artist Joaquín Torres García After studying and painting for decades in Europe Torres García returned in 1934 to his native home Montevideo with the dream of reawakening and revitalizing what he considered the true indigenous essence of Latin American art Abstract Spirit Rommens rigorously analyses the paradoxes of the painter s aesthetic philosophical doctrine of Constructive Universalism as it sought to adapt European geometric abstraction to the Americas Whereas previous scholarship has dismissed Torres García s theories as self contradictory Rommens seeks to recover their creative potential as well as their role in tracing the transatlantic routes of the avant garde Through the highly original method of reading Torres García s artworks as a critique on the artist s own writings Rommens reveals how Torres García appropriates the colonial language of primitivism to construct the artificial image of pure pre Columbian abstraction Torres García thereby inverts the history of art this book teases out the important lessons of this gesture and the implications for our understanding of abstraction today Everywhere and Everywhen Nick Huggett,2010 This book written for the general reader explores the fundamental issues concerning the nature of time and space and quantum mechanics It shows how physics and philosophy work together to answer some of the deepest questions ever asked about the world Mind Sky Jakusho Kwong-roshi,2022-05-10 A collection of talks photos and calligraphy by Jakusho Kwong roshi exploring the profound beauty of Zen history and practice nature and the philosophy of the ancient Zen master Eihei Dogen In Zen meditation anything that comes in your mind will eventually leave because nothing is permanent A thought is like a cloud moving across the blue sky Nothing can disturb that all encompassing vastness This is the Dharma In a collection of talks and anecdotes Jakusho Kwong roshi a Dharma successor of Shunryu Suzuki roshi presents his approach to Buddhist teaching Containing photos of Kwong roshi with his teachers as well as a selection of his vibrant calligraphy Mind Sky explores the profound beauty of Zen history and practice nature and the philosophy of the ancient Zen master Eihei Dogen With an elegant simplicity Jakusho Kwong roshi shows how Zen is experiential rather than intellectual And with persistent practice realization is already yours
