Heretics And Heroes In Science:

Heretics and Heroes in Science Frederick Goldman, 2001-10 Read the touching story of a young girl's tragic accident The trials tribulations victories defeats during her show career The little horse that was homegrown who became the Amateur 3 year old World Grand Champion defeating all odds Read about the little horse that could Muddy Buddy Written as seen through her father's eyes David E Perry *Science But Not Scientists* Vernon L. Grose, 2006-10 The historic Science Textbook Struggle a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of America's space program writes in the Foreword Vernon Grose in tracing out in *Science But Not Scientists* his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call **Heretics and Heroes** Thomas Cahill, 2014-08-12 The New York Times bestselling author of *How the Irish Saved Civilization* reveals how the innovations of the Renaissance and the Reformation changed the Western world Cahill is our king of popular historians The Dallas Morning News This was an age in which whole continents and peoples were discovered It was an era of sublime artistic and scientific adventure but also of newly powerful princes and armies and of unprecedented courage as thousands refused to bow their heads to the religious pieties of the past In these exquisitely written and lavishly illustrated pages Cahill illuminates as no one else can the great gift givers who shaped our history those who left us a world more varied and complex more awesome and delightful more beautiful and strong than the one they had found [Paranormal Borderlands of Science](#) Kendrick Frazier, 2023-10-17 Headlines and television news reports feature accounts of reincarnation the predictions of astrologers

and psychic miracles Citizens report UFO sightings Police departments call on psychics to provide clues in baffling crimes From every available information source the public is bombarded with unsubstantiated claims of paranormal phenomena How much of the evidence is reliable What is the truth behind these claims *Paranormal Borderlands of Science* is an exciting well informed examination of the most publicized and exotic claims of astrology ESP psychokinesis precognition UFOs biorhythms and other phenomena Written by respected psychologists astronomers and other scientists philosophers investigative journalists and magicians the 47 articles in this superb collection present a skeptical treatment of pseudoscientific claims an aspect often sorely neglected in sensationalized media reports This book is an effort to help readers sort fact from fiction and sense from nonsense among the astonishing variety of assertions labeled paranormal Never before published in book form the essays in this anthology originally appeared in the *Skeptical Inquirer* a leading magazine devoted to the critical investigation of pseudoscience from a scientific viewpoint Among the contributors are Isaac Asimov distinguished science fiction author Martin Gardner *Scientific American* columnist James Randi The Amazing Randi Philip Klass noted UFO skeptic Scot Morris Omni and James Oberg NASA An essential contribution to skeptical literature this book will be of lasting value to all those wishing to balance the case for paranormal claims by reading the dissenting critics

The Azan of Science Mohammad Saqib Al Wadoodi , In a quiet madrasa in the heart of the old city a young boy recites Surah Al Alaq Read in the name of your Lord His voice trembles not from fear but wonder He asks his teacher Why did the first word of Revelation command us to read The teacher smiles but has no answer Centuries ago our ancestors asked the same question and built libraries instead of walls They blended tajweed with geometry hadith with astronomy and faith with fearless exploration Thinkers like Ibn Sina Al Khwarizmi and Fatima al Fihri didn't see a contradiction between Islam and science they saw unity But somewhere along the road the call of knowledge was silenced *The Azan of Science* is a journey to revive that call Through forgotten stories hidden betrayals and visionary minds this book awakens a new generation to seek question and lead with both faith and intellect as their guide Because this time the Azan is not just to pray It is to awaken

Theory of Science George Gale,1979 **The Problem of Disenchantment** Egil Asprem,2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people's everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should

contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprey casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge The Problem of Disenchantment is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio

The Myth of Equality Ken Wytsma,2019-07-23 Is privilege real or imagined Ken Wytsma founder of the Justice Conference unpacks what we need to know to be grounded in conversations about today's race related issues And he helps us come to a deeper understanding of both the origins of these issues and the reconciling role we are called to play as witnesses of the gospel

Smoking Kills Conrad Keating,2016-07-05 At the end of the Second World War Britain had the highest incidence of lung cancer in the world For the first time lung cancer deaths exceeded those from tuberculosis and no one knew why On 30 September 1950 a young physician named Richard Doll concluded in a research paper that smoking cigarettes was a cause and an important cause of the rapidly increasing epidemic of lung cancer His historic and contentious finding marked the beginning of a life long crusade against premature death and the forces of Big Tobacco Born in 1912 Doll a natural patrician jettisoned his Establishment background and joined the Communist Party as a reaction to the anarchy and waste of capitalism in the 1930s He treated the blistered feet of the Jarrow Marchers served as a medical officer at the retreat to Dunkirk and became a true hero of the NHS A political revolutionary and an epidemiologist with a Darwinian heart of stone Doll fulfilled his early ambition to be a valuable member of society Doll steered a course through a minefield of medical and political controversy Opponents from the tobacco industry questioned his science while later critics from the environmental lobby attacked his alleged connections to the chemical industry An enigmatic individual Doll was feared and respected throughout a long and wide ranging scientific career which ended only with his death in 2005 In this authorised and groundbreaking biography Conrad Keating reveals a man whose life and work encapsulates much of the twentieth century Described by the British Medical Journal as perhaps Britain's most eminent doctor Doll ushered in a new era in medicine the intellectual ascendancy of medical statistics According to the Nobel laureate Sir Paul Nurse his work which may have prevented tens of millions of deaths transcends the boundaries of professional medicine into the global community of mankind A well crafted biography of Doll who single handedly saved millions of lives with his findings New Scientist As this fascinating and fair minded biography makes clear while Doll's political instincts were radical he was nevertheless a conservative scientist always cautious in causal inference Impressive and engaging International Journal of Epidemiology

The Middle Ages Winston Black,2019-07-01 This book guides readers through 10 pervasive fictions about medieval history provides them with the sources and analytical tools to critique those fictions and identifies what really happened in the Middle Ages This book is the first to present fictions about the medieval world to serious students of history Instead of merely listing myths and stating they are wrong this volume promotes critical historical analysis of those myths and how they came to be Each of the ten chapters outlines a pervasive modern myth about medieval European history describing What People Think Happened and What Really Happened and illustrating both trends with primary source documents The book demonstrates that historical fictions also have a history and that while we need to replace those fictions with facts about the medieval past we can also benefit from understanding how a fiction about the Middle Ages developed and what that says about our modern perspectives on the past Through this innovative presentation readers are introduced to a wide range of sources from Roman imperial perspectives on the Fall of Rome to songs of chivalry and chronicles of the Crusades scientific treatises on the shape of the Earth and the creation of the universe and early modern stories and textbooks that developed or perpetuated historical myths
