Lau,Jianjun Mei,2024-09-09 This book explores how and why exchanges across civilizations have come to enrich science today The dialogical dimension of the history of science has long been marginalized by an excessive concern on why modern science emerged in Europe but not in any of the advanced civilizations of the East This focus upon what has been called Joseph Needham s Grand Comparative Question ignores his other project focused on showing how dialogues between civilizations have nurtured science Needham s Grand Dialogical Question if we may call it that by parity has directly or indirectly inspired a vast body of literature showing how interconnections of civilizations over the last three thousand years and exchanges of cosmological mathematical geographical physical biological and medical technologies techniques practices and knowledge have been woven together to produce current science Bringing together scholars whose research range across multiple civilizations and disciplines this book investigates the scope and limits of Needham s dialogical vision for science Historical Dictionary of the Netherlands Joop W. Koopmans,2015-11-05 The Kingdom of the Netherlands is a small but heavily populated country with almost 17 million inhabitants It is one of the last kingdoms in Europe and in 2015 it celebrated its 200 years anniversary The Netherlands became a kingdom after the Napoleonic era During this period it was transformed into a centralized state Before those years it had been one of few republics in Europe for about two centuries That state was a confederacy which emerged in the 1580s during its independence struggle against the Spanish Habsburgs Although the present state is still monarchical the Netherlands functions as a modern constitutional democracy in which the king s position is almost comparable with a ceremonial presidency The majority of the Dutch population however appreciates the hereditary political presence of the House of Orange Nassau regarding this dynasty as a symbol of national unity and connection with the country s past This third edition of Historical Dictionary of the Netherlands contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 900 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about the Netherlands CRC World Dictionary of Medicinal and Poisonous Plants Umberto Quattrocchi,2016-04-19 Written as a reference to be used within University Departmental Public Institutional Herbaria and Arboreta libraries this book provides the first starting point for better access to data on medicinal and poisonous plants Following on the success of the author s CRC World Dictionary of Plant Names and the CRC World Dictionary of Grasses the author provides the names of thousands of genera and species of economically important plants It serves as an indispensable time saving guide for all

Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work. He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences. The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna, flora and fossil remains. Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment. Fragmentary though they often are, these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth, providing us with a window on an ever changing and often vanishing natural world. Without such records of the past we could not track, document or understand the significance of changes that are so important for the study of zoogeography. With this book Troelstra gives us a superb overview of natural history travel narratives. The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions. While no subject bibliography by a single author can attain absolute completeness, Troelstra's work is comprehensive to a truly remarkable degree. The entries are arranged alphabetically by author and chronologically by the year of first publication under the author's name. A brief biography with the scope and range of their work is given for each author; every title is set in context; the contents, including illustrations, are described; and all known editions and translations are cited. In addition, there is a geographical index that cross refers between authors and the regions visited, and a full list of the bibliographical and biographical sources used in compiling the bibliography.
