Herpes Suffers Get Help:

Dr Sebi Cure For Herpes James Andrew Brian, 101-01-01 More than 100 million people live with the chronic and frequently painful disease according to the World Health Organization Dr Sebi has been in the world longer than the average person and has seen more than they can imagine so you should pay heed when he says that herpes can be healed with just a few herbs Herpes is a disease that we've all heard of but are embarrassed to confess Therefore most of us have no idea how it works or how to treat it We put this book together with the assistance of Dr Sebi diet guidelines who has been utilizing natural cures for herpes and other sexually transmitted illnesses for years and is now ready to share what he has discovered with the rest of the world Dr Sebi is a big fan of natural medicine He has spent his whole career studying plants and how they affect the body What Is Herpes and How Does It Affect You Herpes is one of the most common STDs and is caused by the herpes simplex virus HSV Oral sex anal intercourse vaginal sex and even kissing are all ways to contract it The virus can also be passed from mother to child during pregnancy or childbirth in some situations In most circumstances the person who has been infected with herpes will have no symptoms at first If the virus spreads to the genitals however it can cause skin sores or blisters which can lead to fever headaches sore throats and swollen glands Only about 20 herpes viruses are known to infect people despite the fact that there are over 100 varieties of herpes viruses HSV 1 and HSV 2 are the two most frequent kinds among them While nearly everyone has been infected with HSV 1 at some point in their lives most individuals will only be infected with HSV 2 once It is conceivable for a person to contract herpes twice but this is extremely rare How Is Herpes Detected Taking a blood sample to test for the presence of antibodies is the first step in diagnosing herpes When the immune system senses an infection antibodies are created Herpes can be spread without causing any symptoms since it is transmitted through sexual contact As a result even if there are no obvious symptoms the existence of antibodies might establish the diagnosis If a blood test reveals that the patient lacks antibodies a doctor can examine other samples to see if a specific virus is present What Is Herpes and How Does It Work The virus enters our bodies through our genitals or mouth when we have sex with someone The virus then goes through our circulation to nerve cells in our genitals and brain where it remains dormant This dormant virus remains in nerve cells and produces the glycoprotein C protein The virus then hides in this protein allowing it to avoid being detected by the immune system The virus can still reproduce at this time but it can't because the immune system has discovered it The immune system continues to battle the virus by producing antibodies that bind to it and eliminate it The virus on the other hand always returns and strives to replicate itself This cycle repeats until the virus's immune system can no longer keep up with it This is why herpes can be so difficult to eradicate Is There a Herpes Cure Herpes is usually not lethal but it can bring a slew of issues As a result many people opt to treat their herpes infection using natural remedies Herpes is a virus that can be treated with herbal remedies I also use the same method to treat herpes Numerous studies have confirmed this It also has no negative side effects It's a safe and effective technique to treat and
