Hidden Dangers to Kids' Learning Betsy Gunzelmann, 2010-01-16 This book marks a new beginning providing a way for parents to understand and help their academically struggling children Both parents and children should be empowered to recognize the perils and pitfalls of the current educational crisis and take responsibility for and control of education before it is too late Parents have new reasons to believe in their children and new ways to help their children be able to cope in the global community Gunzelmann explains that because schools and classrooms vary greatly uniform policies and standards are hidden dangers that may interfere with optimal learning One school may produce excited students who excel while other schools with the same policies in that district experience student failure and increased dropout rates The solution she offers lies in understanding children s basic needs their learning styles and the need to foster teach resilience optimism and flexibility

Invisible Eugenics Mark M. Rich, Wealthy eugenicist psychopaths have launched a covert eugenics program to reduce the population They are attacking citizens with chemical weapons disguised as medicine which slowly inflict many devastating medical conditions The victims suffer a reduced lifespan and are removed from the breeding pool They have established complete control of the public schools which have been transformed into eugenic laboratories These laboratories are used to identify and destroy any positive values that might foster individual development and to identify those to be attacked The teachers and doctors are on the frontline working together to identify the resisters who are attacked for life with chemical weapons under the guise of medical treatment There is a highly coordinated worldwide coverup of the deaths and injuries caused by these weapons This population control agenda can be traced back to the late 1800s when they vowed to eliminate certain bloodlines to purify the human race
