Hidden Depths:

Hidden Depths Penny Spikins, 2022-08-23 n Hidden Depths Professor Penny Spikins explores how our emotional connections have shaped human ancestry Focusing on three key transitions in human origins Professor Spikins explains how the emotional capacities of our early ancestors evolved in response to ecological changes much like similar changes in other social mammals For each transition dedicated chapters examine evolutionary pressures responses in changes in human emotional capacities and the archaeological evidence for human social behaviours Starting from our earliest origins in Part One Professor Spikins explores how after two million years ago movement of human ancestors into a new ecological niche drove new types of collaboration including care for vulnerable members of the group Emotional adaptations lead to cognitive changes as new connections based on compassion generosity trust and inclusion also changed our relationship to material things Part Two explores a later key transition in human emotional capacities occurring after 300 000 years ago At this time changes in social tolerance allowed ancestors of our own species to further reach out beyond their local group and care about distant allies making human communities resilient to environmental changes An increasingly close relationship to animals and even to cherished possessions appeared at this time and can be explained through new human vulnerabilities and ways of seeking comfort and belonging Lastly Part Three focuses on the contrasts in emotional dispositions arising between ourselves and our close cousins the Neanderthals Neanderthals are revealed as equally caring yet emotionally different humans who might if things had been different have been in our place today This new narrative breaks away from traditional views of human evolution as exceptional or as a linear progression towards a more perfect form Instead our evolutionary history is situated within similar processes occurring in other mammals and explained as one in which emotions rather than intellect were key to our evolutionary journey Moreover changes in emotional capacities and dispositions are seen as part of differing pathways each bringing strengths weaknesses and compromises These hidden depths provide an explanation for many of the emotional sensitivities and vulnerabilities which continue to influence our world today

The Forgotten Terrorist Mel Ayton, 2019-05 Robert F Kennedy's assassination in 1968 seems like it should be an open and shut case Many people crowded in the small room at Los Angeles's famed Ambassador Hotel that fateful night saw Sirhan Sirhan pull the trigger Sirhan was also convicted of the crime and still languishes in jail with a life sentence However conspiracy theorists have jumped on inconsistencies in the eyewitness testimony and alleged anomalies in the forensic evidence to suggest that Sirhan was only one shooter in a larger conspiracy a patsy for the real killers or even a hypnotized assassin who did not know what he was doing a popular plot in Cold War era fiction such as *The Manchurian Candidate* Mel Ayton profiles Sirhan and presents a wealth of evidence about his fanatical Palestinian nationalism and his hatred for RFK that motivated the killing Ayton unearths neglected eyewitness accounts and overlooked forensic evidence and examines Sirhan's extensive personal notebooks He revisits the trial proceedings and convincingly shows Sirhan was in fact the lone assassin whose politically motivated act was a forerunner of present day terrorism *The Forgotten Terrorist* is the definitive book on the assassination that rocked the nation during the turbulent summer of 1968 This second edition features a new afterword containing interviews and new evidence as well as a new examination of the RFK assassination acoustics evidence by technical analyst Michael O Dell

Hidden depths [by F.M.F. Skene]. Felicia Mary Frances SKENE, 1866

Mind Is Flat Nick Chater, 2018-08-07 In a radical reinterpretation of how the mind works an eminent behavioral scientist reveals the illusion of mental depth Psychologists and neuroscientists struggle with how best to interpret human motivation and decision making The assumption is that below a mental surface of

conscious awareness lies a deep and complex set of inner beliefs values and desires that govern our thoughts ideas and actions and that to know this depth is to know ourselves In this profoundly original book behavioral scientist Nick Chater contends just the opposite rather than being the plaything of unconscious currents the brain generates behaviors in the moment based entirely on our past experiences Engaging the reader with eye opening experiments and visual examples the author first demolishes our intuitive sense of how our mind works then argues for a positive interpretation of the brain as a ceaseless and creative improviser
