**Integral Transforms and Operational Calculus** H. M. Srivastava, 2019-11-20 Researches and investigations involving the theory and applications of integral transforms and operational calculus are remarkably wide spread in many diverse areas of the mathematical physical chemical engineering and statistical sciences This Special Issue contains a total of 36 carefully selected and peer reviewed articles which are authored by established researchers from many countries Included in this Special Issue are review expository and original research articles dealing with the recent advances on the topics of integral transforms and operational calculus as well as their multidisciplinary applications *Basic Engineering Mathematics* John Bird, 2013-06-17 Unlike most engineering maths texts this book does not assume a firm grasp of GCSE maths and unlike low level general maths texts the content is tailored specifically to the needs of engineers The result is a unique book written for engineering students that takes a starting point below GCSE level Basic Engineering Mathematics is therefore ideal for students of a wide range of abilities especially for those who find the theoretical side of mathematics difficult Now in its fifth edition Basic Engineering Mathematics is an established textbook with the previous edition selling nearly 7500 copies All students that require a fundamental knowledge of mathematics for engineering will find this book essential reading The content has been designed primarily to meet the needs of students studying Level 2 courses including GCSE Engineering the Diploma and the BTEC First specifications Level 3 students will also find this text to be a useful resource for getting to grips with essential mathematics concepts because the compulsory topics in BTEC National and A Level Engineering courses are also addressed **Mathematical Physics** M. Jamil Aslam, 2007 These proceedings survey the latest developments in a wide area of mathematical physics as presented by internationally renowned experts The fields surveyed are High Energy Physics String Theory Relativity Astrophysics Cosmology Plasma Physics and Formal Aspects of Mathematical Physics Some of the exciting topics discussed in this volume are fundamental questions about black holes and string theory supermassive black holes string theory and the quantum structure of space time AdS space time and holography the cosmological constant non commutative geometry quantum gravity symmetries in general relativity recent developments in neutrino physics and astrophysical plasmas **History and Epistemology in Mathematics Education** Évelyne Barbin, Michael N. Fried, Marta Menghini, Francesco Saverio Tortoriello, 2025-06-12 This book explores the evolving relationship between the history and epistemology of mathematics and mathematics education over the past fifty years Beginning with the international movement that emerged in the 1970s it celebrates the enduring and expanding role of historical and epistemological perspectives in shaping teaching practices Organized into seven thematic sections the volume examines core issues such as how historical and epistemological insights enhance understanding of mathematical concepts interdisciplinarity as a tool for teaching and innovative approaches to teacher training It also delves into the use of historical problems ancient texts and textbooks as teaching resources alongside an analysis of the social and political dimensions of

mathematics education Special attention is given to the impact of the modern mathematics reform and its legacy in rekindling interest in the history of mathematics in education Featuring contributions from diverse geographical and historical contexts this book is an essential resource for teachers researchers and anyone passionate about the rich interplay of history epistemology and mathematics      **Electronic Information and Communication in Mathematics** Fengshan Bai,Bernd Wegner,2003-09-03 This book constitutes the thoroughly refereed post proceedings of the ICM 2002 International Satellite Conference on Electronic Information and Communication in Mathematics held in Beijing China in August 2002 The 18 revised and reviewed papers assess the state of the art of the production and dissemination of electronic information in mathematics Among the topics addressed are models and standards for information and metainformation representation data search discovery retrieval and analysis access to distributed and heterogeneous digital collections intelligent user interfaces to digital libraries information agents and cooperative work on mathematical data digital collection generation business models and data security and protection      Mathematical Analysis and Analytic Number Theory 2019 Rekha Srivastava,2021-04-06 This volume is a collection of investigations involving the theory and applications of the various tools and techniques of mathematical analysis and analytic number theory which are remarkably widespread in many diverse areas of the mathematical biological physical chemical engineering and statistical sciences It contains invited and welcome original as well as review cum expository research articles dealing with recent and new developments on the topics of mathematical analysis and analytic number theory as well as their multidisciplinary applications      **Mathematics Into the Twenty-first Century** American Mathematical Society,1992 In the summer of 1988 in Providence the AMS celebrated its centennial with a wide range of mathematical activities Among those was a symposium Mathematics into the Twenty first Century which brought together a number of the top research mathematicians who will likely have a significant impact on the mathematics of this century This book contains the lectures presented by 16 of the 18 individuals who spoke during the symposium Written by some of the major international figures in mathematical research this group of articles covers a panorama of the vital areas of mathematics at the turn of the 21st century and gives the general mathematical reader a broad perspective on some of the major trends in research      **Mathematical Foundations of Programming Language Semantics** Michael Main,Austin Melton,Michael Mislove,David Schmidt,1988-03-09 This volume is the proceedings of the 3rd Workshop on the Mathematical Foundations of Programming Language Semantics held at Tulane University New Orleans Louisiana April 8 10 1987 The 1st Workshop was at Kansas State University Manhattan Kansas in April 1985 see LNCS 239 and the 2nd Workshop with a limited number of participants was at Kansas State in April 1986 It was the intention of the organizers that the 3rd Workshop survey as many areas of the Mathematical Foundations of Programming Language Semantics as reasonably possible The Workshop attracted 49 submitted papers from which 28 papers were chosen for presentation The papers ranged in subject from category theory and Lambda calculus to the structure theory of domains and power domains to

implementation issues surrounding semantics      *String-Math 2011* Jonathan Block, 2012 The nature of interactions between mathematicians and physicists has been thoroughly transformed in recent years String theory and quantum field theory have contributed a series of profound ideas that gave rise to entirely new mathematical fields and revitalized older ones The influence flows in both directions with mathematical techniques and ideas contributing crucially to major advances in string theory A large and rapidly growing number of both mathematicians and physicists are working at the string theoretic interface between the two academic fields The String Math conference series aims to bring together leading mathematicians and mathematically minded physicists working in this interface This volume contains the proceedings of the inaugural conference in this series String Math 2011 which was held June 6-11 2011 at the University of Pennsylvania

**String-Math 2015** Si Li, Bong H. Lian, Wei Song, Shing-Tung Yau, 2017-11-28 This volume contains the proceedings of the conference String Math 2015 which was held from December 31 2015 January 4 2016 at Tsinghua Sanya International Mathematics Forum in Sanya China Two of the main themes of this volume are frontier research on Calabi-Yau manifolds and mirror symmetry and the development of non-perturbative methods in supersymmetric gauge theories The articles present state-of-the-art developments in these topics String theory is a broad subject which has profound connections with broad branches of modern mathematics In the last decades the prosperous interaction built upon the joint efforts from both mathematicians and physicists has given rise to marvelous deep results in supersymmetric gauge theory topological string M-theory and duality on the physics side as well as in algebraic geometry differential geometry algebraic topology

representation theory and number theory on the mathematics side      **Recent Developments in Complex Analysis and Computer Algebra** R.P. Gilbert, Joji Kajiwar, Yongzhi S. Xu, 2013-12-01 This volume consists of papers presented in the special sessions on Complex and Numerical Analysis Value Distribution Theory and Complex Domains and Use of Symbolic Computation in Mathematics Education of the ISAAC 97 Congress held at the University of Delaware during June 2-7 1997 The ISAAC Congress coincided with a U.S.-Japan Seminar also held at the University of Delaware The latter was supported by the National Science Foundation through Grant INT 9603029 and the Japan Society for the Promotion of Science through Grant MTCS 134 It was natural that the participants of both meetings should interact and consequently several persons attending the Congress also presented papers in the Seminar The success of the ISAAC Congress and the U.S.-Japan Seminar has led to the ISAAC 99 Congress being held in Fukuoka Japan during August 1999 Many of the same participants will return to this Seminar Indeed it appears that the spirit of the U.S.-Japan Seminar will be continued every second year as part of the ISAAC Congresses We decided to include with the papers presented in the ISAAC Congress and the U.S.-Japan Seminar several very good papers by colleagues from the former Soviet Union These participants in the ISAAC Congress attended at their own expense      Multivariable Operator Theory Ernst Albrecht, Raúl Curto, Michael Hartz, Mihai Putinar, 2023-12-21
