Hobson And Underconsumption America Through European Eyes

Edward R. Tannenbaum

Hobson And Underconsumption America Through European Eyes:

Economics for the Common Good Mark A Lutz,2002-11 This textbook presents an introduction to the central issues of social economics Building on a venerable social economics tradition the book recommends a more rational economic order and proposes new principles of economic policy The issues covered include the inadequacy of individualistic economics in guiding the policy maker a critique of economic rationality rethinking of the modern business corporation a critical look at markets as panacea the harmful effects of international competition environmental problems The book introduces social economic concepts and challenges the reader to look beyond the confines of mainstream economic thinking to find a solution to these critical issues *Hobson and Underconsumption* Erwin Esser Nemmers,1956 *European Civilization Since the Middle Ages* Edward R. Tannenbaum,1971 This book is designed to give the reader an up to date account of the history of European civilization from its medieval origins to the present Its theme is the interplay among individuals groups and cultures within a common civilization Each of these protagonists has shaped the others without losing its identity or autonomy Modern Political Economics Yanis Varoufakis,Joseph Halevi,Nicholas Theocarakis,2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g. calculus and statistics to second guess it The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008 It distinguishes between two major post war phases The Global Plan 1947-1971 and the Global Minotaur 1971-2008 This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond Modern Political Economics is essential reading for Economics students and anyone seeking a better understanding of the 2008 economic crash *The Nation* ,1911

Marx's Capital after 150 Years Marcello Musto,2019-09-23 Faced with a new crisis of capitalism many scholars are now looking back to the author whose ideas were too hastily dismissed after the fall of the Berlin Wall During the last decade

Marx's Capital has received renewed academic and popular attention. It has been reprinted in new editions throughout the world and the contemporary relevance of its pages is being discussed again. Today Marx's analyses are arguably resonating even more strongly than they did in his own time and Capital continues to provide an effective framework to understand the nature of capitalism and its transformations. This volume includes the proceedings of the biggest international conference held in the world to celebrate the 150th anniversary of Capital's publication. The book is divided into three parts: I Capitalism Past and Present; II Extending the Critique of Capital; III The Politics of Capital. It contains the contributions of globally renowned scholars from 13 countries and multiple academic disciplines who offer diverse perspectives and critical insights into the principal contradictions of contemporary capitalism while pointing to alternative economic and social models. Together they reconsider the most influential historical debates on Capital and provide new interpretations of Marx's magnum opus in light of themes rarely associated with Capital, such as gender, ecology, and non-European societies. The book is an indispensable source for academic communities who are increasingly interested in rediscovering Marx beyond 20th-century Marxism. Moreover, it will be of great appeal to students as well as established scholars interested in critique of capitalism and socialist theory.
