The Politics of Information in Early Modern Europe Sabrina Alcorn Baron, Brendan Dooley, 2005-07-08 First attempt to bring together a range of research on the origins of news publishing Provides a broad ranging comprehensive survey High quality contributors with very good publishing record *Bd. 2 U. 3 Mit Dem Zusatz: 1614 - 1780* Melania Bucciarelli, Norbert Dubowy, Reinhard Strohm, 2006-01-01 *Translation and Translation Theory in Seventeenth-century Germany* James N. Hardin, 1992 *The Dissemination of News and the Emergence of Contemporaneity in Early Modern Europe* Brendan Dooley, 2016-12-05 Modern communications allow the instant dissemination of information and images creating a sensation of virtual presence at events that occur far away This sensation gives meaning to the notions of real time and of a present that is shared within and among societies in other words a sensation of contemporaneity But how were time and space conceived before modernity When did this begin to change in Europe To help answer such questions this volume looks at the exchange of information and the development of communications networks at the dawn of journalism when widespread public and private networks first emerged for the transmission of political news What happened in Prague quickly reached Venice and what happened in Naples was soon the talk of Hamburg Gradually enough became known about daily affairs around Europe for people to begin to think in terms of a shared present An analysis of contemporaneity adds a new dimension to the study of the origins of news and media history as well as to the origins of a European identity For whilst our understanding of the circulation of manuscript newsletters and printed reports has increased in recent years much less is known about the impact of this burgeoning journalism on a pan European scale Each essay in this volume explores the ways in which this international impact helped foster a developing sense of contemporaneity that encompassed not just single countries but Europe as a whole Taken together the collection offers the first panoramic view of the way stories were born grew and matured during their transmission from source to source from country to country The results published here suggest that a continent wide network including manuscript and print for the transmission of stories from place to place existed and was effective

Tradition, History and Utopia in Early Modern German Literature Max Reinhart, 2017-03-02 The most prolific historian of early modern German literature in the twentieth century Klaus Garber has largely remained unknown to English language scholars The seven essays selected here are translated into English for the first time and represent the essence of Garber's work Central to Garber's outlook is a break with the traditional canonization of culture into national categories Moreover he argues that literary history consists not only of intellectual history but also political and social history As he states in his preface to this volume To bring Old Europe to life in all the variety of its cultural landscapes to hear across space and time the voices that praised this multiplicity as a valuable possession to be inspired by the past to respond to our own needs these tasks constitute the noblest goal of early modern literary studies today **War, Religion and Court Patronage in**

MacHardy, 2016-02-02 This case study of the causes of the Thirty Years War suggests an alternative framework to that of Absolutism and views statebuilding as an interactive bargaining process that can engender challenges to political authority It shows how selective court patronage changed the cultural habits of nobles in education manners and tastes but failed to transform religious identities which were intimately tied to noble interests Instead the confessionalization of patronage deepened divisions within the elite providing multiple incentives for the formation of an anti Habsburg alliance among Protestants in 1620 Scholarly Self-Fashioning and Community in the Early Modern University Richard

Kirwan, 2016-04-01 A greater fluidity in social relations and hierarchies was experienced across Europe in the early modern period a consequence of the major political and religious upheavals of the sixteenth and seventeenth centuries At the same time the universities of Europe became increasingly orientated towards serving the territorial state guided by a humanistic approach to learning which stressed its social and political utility It was in these contexts that the notion of the scholar as a distinct social category gained a foothold and the status of the scholarly group as a social elite was firmly established University scholars demonstrated a great energy when characterizing themselves socially as learned men This book investigates the significance and implications of academic self-fashioning throughout Europe in the early modern period It

describes a general and growing deliberation in the fashioning of individual communal and categorical academic identity in this period It explores the reasons for this growing self consciousness among scholars and the effects of its expression social and political desired and real
