Botanische Abhandlungen Pt.5-8 ,1924      **A Translation of Cranz's Textbook of Ballistics (Lehrbuch Der Ballistik: pt. 1-2. Experimental ballistics or theory of methods of measurement, observation and recording in ballistics. 2d ed. (1927)** Karl Julius Cranz,1926      **Fast Solution of Discretized Optimization Problems** Karl-Heinz Hoffmann,Ronald W. Hoppe,Volker Schulz,2012-12-06 Differential equations partial as well as ordinary are one of the main tools for the modeling of real world application problems Pursuing the ultimate aim of influencing these systems in a desired way one is confronted with the task of optimizing discretized models This volume contains selected papers presented at the International Work shop on Fast Solution of Discretized Optimization Problems which took place at the Weierstrass Institute for Applied Analysis and Stochastics in Berlin from May 08 until May 12 2000 The conference was attended by 59 scientists from 10 countries The scientific program consisted of 8 invited lectures presented by H G Bock IWR Heidelberg M Heinkenschloss Rice University Houston K Kunisch University of Graz U Langer University Linz B Mohammadi University of Montpellier J Petersson University of Linkoping E Sachs University of Trier F Troltzsch Technical University of Chemnitz and 28 contributed talks The aim of this workshop was to foster the exchange of ideas between the still comparatively separated disciplines of nonlinear optimization on the one side and numerical methods for differential equations on the other side This is necessary for the successful solution of various current optimization problems in practical applications shape optimization topology optimization process optimization Therefore the organizing committee as well as the speakers have come from both these communities      **A Translation of Cranz's Textbook of Ballistics (Lehrbuch Der Ballistik Von G. Cranz): pt. 1-2. Experimental ballistics or theory of methods of measurement, observation and recording in ballistics. 2d ed. (1927)** Karl Julius Cranz,1945      **In the Cross of Reality** Eugen Rosenstock-Huessy,2017-09-08 This book makes the first volume of Eugen Rosenstock Huessy s Soziologie available in English for the first time since its 1956 publication in German Rosenstock Huessy argues that social philosophy has favored abstract and spatially contrived categories of social organization over temporal processes This preference for space thinking has diverted us from recognizing the power of speech and its relationship to living on the front lines of life Taking speech and the social responsibilities and reciprocities that accompany naming as the key to social reality In the Cross of Reality provides a sociological exploration of play spaces as the basis for reflexivity It also explores the spaces of activity and their correlation in war and peace to the spheres of serious life If we are to survive and flourish different qualities and reciprocal relationships must be cultivated so that we can deal with different fronts of life Arguing that modern intellectuals and their obsession with space have created a dangerously false choice between mechanical and aesthetic salvation Rosenstock Huessy clears a path so that we better appreciate our relationship between past and future in founding and in partitioning time      The Tôhoku Mathematical Journal ,1912

 Optimal Control and Applications took place September 23 27 1996 in Trassenheide on the Baltic Sea island of Usedom  
 Seventy mathematicians from ten countries participated The preceding eleven conferences too were held in places of natural  
 beauty throughout West Pomerania the first time in 1972 in Zinnowitz which is in the immediate area of Trassenheide The  
 conferences were founded and led ten times by Professor Bittner Greifswald and Professor Klötzler Leipzig who both  
 celebrated their 65th birthdays in 1996 The 12th conference in Trassenheide was therefore also dedicated to L Bittner and R  
 Klötzler Both scientists made a lasting impression on control theory in the former GDR Originally the conferences served to  
 promote the exchange of research results In the first years most of the lectures were theoretical but in the last few  
 conferences practical applications have been given more attention Besides their pioneering theoretical works both honorees  
 have also always dealt with applications problems L Bittner has for example examined optimal control of nuclear reactors  
 and associated safety aspects Since 1992 he has been working on applications in optimal control in flight dynamics R Klötzler  
 recently applied his results on optimal autobahn planning to the south tangent in Leipzig The contributions published in  
 these proceedings reflect the trend to practical problems starting points are often questions from flight dynamics      Library
