Cognitive Phenomenology Tim Bayne, Michelle Montague, 2011-11-24 The central concern of the cognitive phenomenology debate is whether there is a distinctive cognitive phenomenology that is a kind of phenomenology that has cognitive or conceptual character in some sense that needs to be precisely determined This volume addresses the question of whether conscious thought has cognitive phenomenology

Representation and the Mind-body Problem in Spinoza Michael Della Rocca, 1996 This book offers a powerful new reading of Spinoza's philosophy of mind the aspect of Spinoza's thought often regarded as the most profound and perplexing Michael Della Rocca argues that interpreters of Spinoza's philosophy of mind have not paid sufficient attention to his causal barrier between the mental and the physical The first half of the book shows how this barrier generates Spinoza's strong requirements for having an idea about an object The second half of the book explains how this causal separation underlies Spinoza's intriguing argument for mind body identity Della Rocca concludes his analysis by solving the famous problem of whether for Spinoza the distinction between attributes is real or somehow merely subjective

Paradoxes of Emotion and Fiction Robert J.

Yanal, 1999-10-15 How can we experience real emotions when viewing a movie or reading a novel or watching a play when we know the characters whose actions have this effect on us do not exist This is a conundrum that has puzzled philosophers for a long time and in this book Robert Yanal both canvasses previously proposed solutions to it and offers one of his own First formulated by Samuel Johnson the paradox received its most famous answer from Samuel Taylor Coleridge who advised his readers to engage in a willing suspension of disbelief More recently philosophers have argued that we are irrational in emoting toward fiction or that we do not emote toward fiction but rather toward factual counterparts or that we do not have real but only quasi emotion toward fiction generated by our playing games of make believe All of these proposed solutions are critically reviewed Finding these answers unsatisfactory Yanal offers an alternative providing a new version of what has been dubbed thought theory On this theory mere thoughts not believed true are seen as the functional equivalent of belief at least insofar as stimulating emotion is concerned The emoter's disbelief in the actuality of components of the thoughts must be rendered relatively inactive Such emotion is real and typically has the character of being richly generated yet unconsummated The book extends this theory also to resolving other paradoxes arising from emotional response to fiction how we feel suspense over what comes next in a story even when we are re reading it for a second or third time and how we take pleasure in narratives such as tragedy that excite unpleasant emotions such as fear pity or horror [Mail Order](#)
