MacLellan,2013-02-01 In the first detailed investigation of a legendary belief that can be traced back to the dawn of time the bestselling author of The Lost World of Agharti examines the possibility of an inner world a hollow Earth which could explain some of the greatest mysteries of our time Was this hollow Earth inhabited before mankind set foot on the planet s surface Did the people of Atlantis and Mu take refuge there when catastrophe overtook them Do UFOs come not from outer space from inside our own Earth Bringing together years of painstaking research Alec MacLellan looks not only at the persistent historical tradition but at the work of great scientists such as Edmond Halley and Leonhard Euler infamous figures such as Cotton Mather and Adolf Hitler and extraordinary researchers each of who has devised an explanation for the legend There have been men who claimed to have visited the Hollow Earth and provided eye witness accounts of their journeys Most thought provoking of all is the vast amount of scientific evidence in support of the Hollow Earth concept including explorers reports of polar entranceways backed up by remarkable satellite photographs and evidence from unmanned spacecraft that other planets in our solar system may be hollow too With many rare photographs The Hollow Earth Enigma explains how this extraordinary legend has captivated our imagination and how despite its dismissal by science it is scientifically possible

Hollow Earth David Standish,2007-09-10 Beliefs in mysterious underworlds are as old as humanity But the idea that the earth has a hollow interior was first proposed as a scientific theory in 1691 by Sir Edmond Halley of comet fame who suggested that there might be life down there as well Hollow Earth traces the surprising marvelous and just plain weird permutations his ideas have taken over the centuries From science fiction to utopian societies and even religions Hollow Earth travels through centuries and cultures exploring how each era s relationship to the idea of a hollow earth mirrored its hopes fears and values Illustrated with everything from seventeenth century maps to 1950s pulp art to movie posters and more Hollow Earth is for anyone interested in the history of strange ideas that just won t go away **The Hollow Earth**

Backed My Prophecy of a Polar Hole Shift to Europe Ruth Leedy Carr, 2025-05-14 An approaching Earth axis shift is the most pressing issue of our time and yet scientists have said almost nothing about it and the public is woefully ignorant You will see here why scientists have had so little to say about this coming disaster and also about the growing instability of hollow Mars The pictures of a lighted polar hole on the night side of Mars lighted by an internal sun will shock you The refusal of NASA to say one word about that night side light in response to a congressman's request is truly mystifying The willingness of all news media to sweep this issue under the rug must be seen as a betrayal of the first order Are we all lambs meekly heading for slaughter Isaac Asimov and Carl Sagan have provided a path that can lead us beyond the dismal future that has been marked out for us We are so lucky that they never gave up on us About the Author Ruth Leedy Carr gained some practice at science reporting while studying journalism at Indiana University Her second major was psychology and sociology also interested her and so the careful reporting of facts was central to almost all her college studies She began researching the cataclysmic prophecies of Edgar Cayce in relation to the hollow Earth theory in 1980 Her books of 1981 and 1983 were republished by Gray Barker of Saucerian Press who was the first publisher of Raymond Bernard's classic The Hollow Earth She was proclaimed by noted UFO researcher William L Moore to be the world's foremost proponent of the hollow Earth theory **Authentic Learning** Todd Stanley, 2021-09-03 This book offers teaching strategies that allow

History in Transatlantic Literary Culture, 1860-1935 Richard Fallon, 2025-02-14 By the mid nineteenth century

geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity. Many figures in transatlantic science across subsequent decades however had problems with this narrative: it was too secular, inhuman and evolutionary or controlled too exclusively by elite scientists. Speaking from palaeoscience's unevenly professionalized and controversy-racked borders, Christian fundamentalists, charismatic psychics and respected scholars alike voiced their objections. Until now, no study has brought their work together for detailed comparative analysis. Spanning from the 1860s to the interwar decades, *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience: old and young earth creationism, hollow earth theory, clairvoyant time travel and sunken continent catastrophism. Innovatively combining methods from literary studies with the history of science, this book attends not just to the conceptual content of these strange sciences but also to their proponents' communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem. By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience, this volume throws into relief the variant conceptions of audience, evidence and method that jostled and competed in wider scientific culture during this period. It also demonstrates that for all their diversity, authors of borderline palaeoscience shared the desire to shift the balance of power, creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away. These conjurors of lost worlds often captivated wide audiences and many of their bizarre, astonishing and iconoclastic ideas remain with us to this day. Some even inspired early science fiction by the likes of H.P. Lovecraft and Edgar Rice Burroughs. Hijacking geologists and palaeontologists' longstanding effort at making the prehistoric past visible, authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes.
