**The Freedom to Be Racist?** Erik Bleich,2011-09-01

We love freedom We hate racism But what do we do when these values collide In this wide ranging book Erik Bleich explores policies that the United States Britain France Germany and other liberal democracies have implemented when forced to choose between preserving freedom and combating racism Bleich s comparative historical approach reveals that while most countries have increased restrictions on racist speech groups and actions since the end of World War II this trend has resembled a slow creep more than a slippery slope Each country has struggled to achieve a balance between protecting freedom and reducing racism and the outcomes have been starkly different across time and place Building on these observations Bleich argues that we should pay close attention to the specific context and to the likely effects of any policy we implement and that any response should be proportionate to the level of harm the racism inflicts Ultimately the best way for societies to preserve freedom while fighting racism is through processes of public deliberation that involve citizens in decisions that impact the core values of liberal democracies

**Hate, Politics, Law** Thomas Brudholm,Birgitte Schepelern Johansen,2018-06-01

References to hate have become ubiquitous in the modern response to group defamation and violence in liberal democracies Whether expressed in speech acted out in criminal conduct or seen as the fuel of terror and extremism hate is persistently considered a vice an evil and a threat to the modern liberal democracy But what exactly is

at stake when societies oppose hate In *Hate Politics Law Critical Perspectives on Combating Hate* Thomas Brudholm and Birgitte Schepelern Johansen have gathered a group of distinguished scholars who offer a critical exploration and assessment of the basic assumptions ideals and agendas behind the modern fight against hate They explore these issues and provide a range of explanatory and normative perspectives on the awkward relationship between hate and liberal democracy as expressed for example through anti hate speech and anti hate crime initiatives The volume further examines the presuppositions and ideological roots of fighting hate as well as its blind spots and limits It also includes discussions on the definition and meaning of hate the longer and broader history of the concept of hate and when and why fighting hatred became politically salient While most research on hate crime is written and published in order to prevent and combat hate *Hate Politics Law* takes a much needed theoretical historical and exploratory approach to hatred

**The Content and Context of Hate Speech** Michael Herz, Peter Molnar, 2012-04-09 The contributors to this volume consider whether it is possible to establish carefully tailored hate speech policies that are cognizant of the varying traditions histories and values of different countries Throughout there is a strong comparative emphasis with examples and authors drawn from around the world All the authors explore whether or when different cultural and historical settings justify different substantive rules given that such cultural relativism can be used to justify content based restrictions and so endanger freedom of expression Essays address the following questions among others is hate speech in fact so dangerous or harmful to vulnerable minorities or communities as to justify a lower standard of constitutional protection What harms and benefits accrue from laws that criminalize hate speech in particular contexts Are there circumstances in which everyone would agree that hate speech should be criminally punished What lessons can be learned from international case law

*Blasphemy and Freedom of Expression* Jeroen Temperman, András Koltay, 2017-11-16 This book details the legal ramifications of existing anti blasphemy laws and debates the legitimacy of such laws in Western liberal democracies

Comparative Perspectives funded by HERA Humanities in the European Research Area      *Responsibility for negation of international crimes* Patrycja Grzebyk, History is no longer the exclusive domain of historians but is now often used as a tool for politics It is not without reason that the term state historical policy has been coined which must be a kind of aberration for those who believed that the role of history is to objectively determine the course of events The fact is however that the distortion of historical facts the concealment of crimes is now part of the information war Therefore new acts of public international law EU law and national law are introduced in order to combat public condonation denial or gross trivialisation of the core international crimes which are certain forms and expressions of racism and xenophobia States have to determine for themselves how they understand denial or gross trivialization which may lead to abuse In many cases when introducing criminal law provisions States wish to decree historical truth to establish once and for all the general facts and determine who was the victim and who was the perpetrator This does not have to be the result of bad will but of a desire to exclude the possibility of nuance which could turn into dangerous trivialisation The aim of this publication is to specify the reasons for holding accountable for denial of international crimes indicate legal obligations in this respect look at the Polish case both in terms of criminal provisions partly repealed and standards of a civil law nature and compare the Polish regulation with the legal systems of other states which were chosen because of the region Central and Eastern Europe or due to having current problems with denial of crimes or doubts about prosecution on this account      *Memory Laws, Memory Wars* Nikolay Koposov, 2018 A major contribution to our understanding of present day historical consciousness through a study of memory laws across Europe      *Freedom of Expression* Ioanna Tourkochoriti, 2021-11-11 A comparison of French and American approaches to freedom of expression with reference to the historical social and philosophical contexts      **Racism on the Internet** Yaman Akdeniz, Council of Europe, 2009-01-01 Racism was a pressing social problem long before the emergence of the digital age The advancement of digital communication technologies such as the Internet has however added a new dimension to this problem by providing individuals and organisations with modern and powerful means to propagate racism and xenophobia The use of the Internet as an instrument For The widespread dissemination of racist content is assessed in detail by the author The problem of racist content on the Internet has naturally prompted vigorous responses from a variety of agents including governments supranational and international organisations and from the private sector This book also provides a detailed critical overview of these regulatory and non regulatory initiatives      Revisionist Histories Marnie Hughes-Warrington, 2013-07-18 Revision and revisionism are generally seen as standard parts of historical practice yet they are underexplored within the growing literature on historiography In this accessibly written volume Marnie Hughes Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it Revisionist Histories emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history Through study of digital environments graphic novels and reader

annotated texts this book shows that the sides of history cannot be disentangled from one another and that they are subject to flux and even destruction over time Incorporating diverse and controversial case studies including the French Revolution Holocaust Denial and European settlers contact with Native Americans and Indigenous Australians Revisionist Histories offers both a detailed account of the development of revisionism and a new more spatial vision of historiography An essential text for students of historiography
