Recounting Cultural Encounters Marija Knežević, 2009-10-02 Contributions reprinted in this book highlight some of the wide ranging ways in which the issues of culture and identity can be approached in a literary text while focusing on the ways in which cultural encounters have been changing both the world and its reflection in literature The beginning of the twenty first century is an appropriate time to repay careful attention to these issues Understanding how our perception of the Other changes with the concept of the world we inhabit we want to emphasize the rising importance of fostering cultural pluralism and global understanding Having based their research on widespread readings in academia such as deconstruction post colonialism post modernism new historicism and narratology the authors of these papers proceed by addressing the metaphor of travel as one of the strongest metaphors for the evolution of mankind especially if considered under the light of the historically and politically imposed opposition between the progressive western and the static eastern or African societies However as the end of the imperialist era brought about poignant awareness of cultural relativism as well as deconstruction of the great narrative of progress facing the Other as an unconceptualized entity became a major moral concern of a modern traveller It is pronounced that this concern should be textually testified to dramatize the human inability to avoid verbal appropriation of the other The final question we seek to answer is whether the era of advanced technology and globalisation along with a post modern ironical attitude to hyper realities and textual transparencies has rendered the sphere of the text the only available point of concern of contemporary literature and thought in general For its argumentation strongly founded in recent literary studies and humanities in general its interdisciplinary nature and its focus on the actual global problems of abrupt cultural change and exchange its heightened understanding of the necessity of coexistence of differences in a changing world its spirit of tolerance and its international spirit in general we assume this collection will not only attract academic literary scholars but will also appeal to the general reading public

Interpreting in Nazi Concentration Camps Michaela Wolf, 2016-07-28 This significant new study is concerned with the

role of interpreting in Nazi concentration camps where prisoners were of 30 to 40 different nationalities With German as the only official language in the lager communication was vital to the prisoners survival While in the last few decades there has been extensive research on the language used by the camp inmates investigation into the mediating role of interpreters between SS guards and prisoners on the one hand and among inmates on the other has been almost nonexistent On the basis of Primo Levi s considerations on communication in the Nazi concentrationary system this book investigates the ambivalent role of interpreting in the camps One of the central questions is what the role of interpreting was in the wider context of shaping life in concentration camps And in what way did the knowledge of languages and accordingly certain communication skills contribute to the survival of concentration camp inmates and of the interpreting person The main sources under investigation are both archive materials and survivors memoirs and testimonials in various languages On a different level *Interpreting in Nazi Concentration Camps* also asks in what way the study of communication in concentration camps enhances our understanding of the ambiguous role of interpreting in more general terms And in what way does the study of interpreting in concentration camps shape an interpreting concept which can help us to better understand the violent nature of interpreting in contexts other than the Holocaust Bret Easton Ellis G. Colby, 2011-08-15 This book reads the whole of Bret Easton Ellis s oeuvre to date from *Less Than Zero* to *Imperial Bedrooms* and asks to what extent Ellis s novels can be read as critiquing the cultural moments of which they are a part Ellis s work can be thought of as an enactment of a process of underwriting contemporary culture which offers new paths of understanding and ways of critiquing the contemporary author s place in the relations of production **The Oxford Handbook of Music Censorship** Patricia Ann Hall, 2018 Addresses censorship as a worldwide issue from its earliest recorded form to the modern day Includes unique case studies of music censorship unfamiliar to Western audiences Documents censorship through a necessarily intersectional lens Oxford University Press **Memorylands** Sharon Macdonald, 2013-07-18 *Memorylands* is an original and fascinating investigation of the nature of heritage memory and understandings of the past in Europe today It looks at how Europe has become a memoryland littered with material reminders of the past such as museums heritage sites and memorials and at how this memory phenomenon is related to the changing nature of identities especially European national and cosmopolitan In doing so it provides new insights into how memory and the past are being performed and reconfigured in Europe and with what effects Drawing especially though not exclusively on cases concepts and arguments from social and cultural anthropology *Memorylands* argues for a deeper and more nuanced understanding of the cultural assumptions involved in relating to the past It theorizes the various ways in which materializations of identity work and relates these to different forms of identification within Europe The book also addresses questions of methodology including discussion of historical ethnographic interdisciplinary and innovative methods Through a wide range of case studies from across Europe Sharon Macdonald argues that Europe is home to a much greater range of ways of making the past present than is usually realized

and a greater range of forms of historical consciousness At the same time however she seeks to highlight what she calls the European memory complex a repertoire of prevalent patterns in forms of recollection and past presencing The examples in Memorylands are drawn from both the margins and metropolitan centres from the relatively small scale and local the national and the avant garde The book looks at pasts that are potentially identity disrupting or difficult as well as those that affirm identities or offer possibilities for transcending national identities or articulating more cosmopolitan futures Topics covered include authenticity temporalities embodiment commodification nostalgia and Ostalgie the musealization of everyday and folk life Holocaust commemoration and tourism narratives of war the heritage of Islam transnationalism and the future of the past Memorylands is engagingly written and accessible to general readers as well as offering a new synthesis for advanced researchers in memory and heritage studies It is essential reading for those interested in identities memory material culture Europe tourism and heritage

Empathy's Role in Understanding Persons, Literature, and Art Thomas Petraschka, Christiana Werner, 2023-08-03 This volume critically discusses the role empathy plays in different processes of understanding More precisely it clarifies empathy's role in interpersonal understanding and appreciating works of literature and art The volume also includes a section on historical

theories of empathy's role in understanding. When it comes to understanding other persons, empathy is typically seen as a process that enables the empathizer to recognize a target person's mental states, a process which is in turn seen as understanding this person. This volume however explores empathy's role in understanding beyond mere mental state recognition. With contributions on processes of interpersonal understanding and understanding of literature and art, it provides readers with an overview over both differences and similarities regarding empathy's epistemic role in two rather different areas. Since important roots of the debate about empathic understanding lie at the end of the nineteenth and the beginning of the twentieth century, the historical section of the volume focusses specifically on this period. *Empathy's Role in Understanding Persons: Literature and Art* will appeal to scholars and advanced students working in the philosophy of mind, epistemology, aesthetics, and the history of philosophy, as well as in literary studies and art history. Transnational Memory Chiara De Cesari, Ann Rigney, 2014-10-29. How do memories circulate transnationally and to what effect? How to understand the enduring role of national memories and their simultaneous reconfiguration under globalization? Challenging the methodological nationalism that has until recently dominated the study of memory and heritage, this book charts the rich production of memory across and beyond national borders. Arguing for the fruitfulness of a transnational as distinct from a global approach, it places the issues of circulation, articulation, and the scales of remembrance at the centre of its inquiry. In the process, it sheds new light on the ways in which mediation, post-coloniality, migration, and regional integration affect both the way we remember and the role of memory in contemporary societies. In this interdisciplinary collection, humanities and social science scholars examine a rich sample of cases from the nineteenth century, stretching across the globe from Vietnam to Europe and the Middle East to the USA and the Pacific, and involving a wide range of cultural practices from quilting to films, from photography to heritage sites and monuments. In the process, the volume develops a new theoretical framework while proposing new methodological tools and resources for studying collective remembrance beyond the nation-state.
