Heritage Lost:

People-Centred Methodologies for Heritage Conservation Rebecca Madgin,James Lesh,2021-05-17 This book presents methodological approaches that can help explore the ways in which people develop emotional attachments to historic urban places With a focus on the powerful relations that form between people and places this book uses people centred methodologies to examine the ways in which emotional attachments can be accessed researched interpreted and documented as part of heritage scholarship and management It demonstrates how a range of different research methods drawn primarily from disciplines across the arts humanities and social sciences can be used to better understand the cultural values of heritage places In so doing the chapters bring together a series of diverse case studies from both established and early career scholars in Australia China Europe North America and Central America These case studies outline methods that have been successfully employed to consider attachments between people and historic places in different contexts This book advocates a need to shift to a more nuanced understanding of people s relations to historic places by situating emotional attachments at the core of urban heritage thinking and practice It offers a practical guide for both academics and industry professionals towards people centred methodologies for urban heritage conservation *Library of Congress Subject Headings* Library of Congress,2012 Indigenous Engineering for an Enduring Culture Cat Kutay,Elyssebeth Leigh,Juliana Kaya Prpic,Lyndon Ormond-Parker,2022-09-28 For many millennia Indigenous Australians have been engineering the landscape using sophisticated technological and philosophical knowledge systems in a deliberate response to changing social and environmental circumstances These knowledge systems integrate profound understanding of country and bring together knowledge of the topography and geology of the landscape its natural cycles and ecological systems its hydrological systems and natural resources including fauna and flora This enables people to manage resources sustainably and reliably and testifies to a developed contextualised knowledge system and to a society with agency and the capability to maintain and refine accumulated knowledge and material processes This book is a recognition and acknowledgement of the ingenuity of Indigenous engineering which is grounded in philosophical principles values and practices that emphasise sustainability reciprocity respect and diversity and often presents a much needed challenge to a Western engineering worldview Each chapter is written by a team of authors combining Indigenous knowledge skills and academic expertise providing examples of collaboration at the intersection of Western and Indigenous engineering principles sharing old and new knowledges and skills These varied approaches demonstrate ways to integrate Indigenous knowledges into the curricula for Australian engineering degrees in line with the Australian Council of Engineering Deans Position Statement on Embedding Aboriginal and Torres Strait Islander perspectives into the engineering curriculum first published in 2017 The Routledge Handbook of Heritage Destruction José Antonio González Zarandona,Emma Cunliffe,Melathi Saldin,2023-08-10 The Routledge Handbook of Heritage Destruction presents a comprehensive view on the destruction of cultural heritage and offers insights

into this multifaceted interdisciplinary phenomenon the methods scholars have used to study it and the results these various methods have produced By juxtaposing theoretical and legal frameworks and conceptual contexts alongside a wide distribution of geographical and temporal case studies this book throws light upon the risks and the realizations of art and heritage destruction Exploring the variety of forces that drive the destruction of heritage the volume also contains contributions that consider what forms heritage destruction takes and in which contexts and circumstances it manifests Contributors including local scholars also consider how these drivers and contexts change and what effect this has on heritage destruction and how we conceptualise it Overall the book establishes the importance of the need to study the destruction of art and cultural heritage within a wider framework that encompasses not only theory but also legal military social and ontological issues The Routledge Handbook of Heritage Destruction will contribute to the development of a more complete understanding and analysis of heritage destruction The Handbook will be useful to academics students and professionals with interest in heritage conservation and preservation history and art history archaeology anthropology philosophy and law **Library of Congress Subject Headings** Library of Congress. Cataloging Policy and Support Office,2007 **Managing the Unknown** Frank Uekötter,Uwe Lübken,2014-03-01 Information is crucial when it comes to the management of resources But what if knowledge is incomplete or biased or otherwise deficient How did people define patterns of proper use in the absence of cognitive certainty Discussing this challenge for a diverse set of resources from fish to rubber these essays show that deficient knowledge is a far more pervasive challenge in resource history than conventional readings suggest Furthermore environmental ignorance does not inevitably shrink with the march of scientific progress these essays suggest more of a dialectical relationship between knowledge and ignorance that has different shapes and trajectories With its combination of empirical case studies and theoretical reflection the essays make a significant contribution to the interdisciplinary debate on the production and resilience of ignorance At the same time this volume combines insights from different continents as well as the seas in between and thus sketches outlines of an emerging global resource history

Unruly Heritage Bjørnar Julius Olsen,Stein Farstadvoll,Geneviève Godin,2024-10-17 Heritage is almost univocally conceived of as valuable and good something we care for and preserve for ourselves and future generations Although traditionally associated with the unique and monumental heritage has over the last decades been broadened in response to claims to incorporate more diverse and globally representative legacies While such claims are of course welcome they do not embrace the bulging unruly and obnoxious legacies that now haunt us legacies that have become so conspicuously manifest that they are claimed as diagnostic of a new epoch the Anthropocene This book targets this exclusion It claims that the current clash between prevailing conceptions of heritage as something confined wished for and thus worth saving and the unruly legacies ignoring such work of purification urges a reconsideration of strategies and rationales for how to deal with heritage Through multidisciplinary approaches ranging from archaeology and heritage studies to philosophy and

environmental politics the contributions bring heritage into dialogue with a wide range of topics including industrialisation material profusion modernist architectural material coastal reclamations barbed wire and naval mines The result is a volume that profoundly challenges traditional understandings of heritage as an exclusive reserve of things selected and managed by us *The LCSH Century* Alva T. Stone,2014-06-03 The LCSH Century traces the 100 year history of the Library of Congress Subject Headings from its beginning with the implementation of a dictionary catalog in 1898 to the present day You will explore the most significant changes in LCSH policies and practices including a summary of other contributions celebrating the centennial of the world s most popular library subject heading language *Globalisation and COVID-19* Manas Chatterji,Urs Luterbacher,Valérie Fert,Bo Chen,2023-07-10 Globalisation and COVID 19 examines how the simultaneous immobilisation of billions created a temporary hold on the mobility which constitutes the very irrigation of globalisation

Relevance and Application of Heritage in Contemporary Society Pei-Lin Yu,Chen Shen,George Smith,2018-07-06 In the contemporary world unprecedented global events are challenging our ability to protect and enhance cultural heritage for future generations Relevance and Application of Heritage in Contemporary Society examines innovative and flexible approaches to cultural heritage protection Bringing together cultural heritage scholars and activists from across the world the volume showcases a spectrum of exciting new approaches to heritage protection community involvement and strategic utilization of expertise The contributions deal with a range of highly topical issues including armed conflict and non state actors as well as broad questions of public heritage museum roles in society heritage tourism disputed ownership and indigenous and local approaches In so doing the volume builds upon and introduces readers to a new cultural heritage declaration codified during a 2016 workshop at the Royal Ontario Museum Canada Offering a clarion call for an enduring spirit of innovation collaboration education and outreach Relevance and Application of Heritage in Contemporary Society will be important reading for scholars students cultural heritage managers and local community stakeholders **Heritage** Peter Howard,2003-05-01 Heritage and its preservation is a major concern around the world In order to establish identities as well as attracting visitors the natural and cultural heritage is protected conserved managed and interpreted by families by cities by nation states and at international level Environmental and cultural heritage is now accepted as a major feature in business location as the demand for quality of life becomes insistent This major movement has resulted in the development of Heritage as a field of study both on its own and as elements within many other disciplines such as geography art history archaeology ecology and tourism management While the techniques of conservation remains within specialist disciplines Peter Howard offers a textbook for students approaching heritage as a combined field of study for the first time The fields of heritage under review range from the nature trail to the cathedral and from the family album to the national park viewed at a variety of levels including family and local heritage as well as the national and international dimensions Heritage is seen as a demand led activity with interested stakeholders being academics governments owners school children pilgrims and the media as well

as the ubiquitous tourist There is a process by which some things are selected as heritage but others are ignored and it is the practical management of this process which is the focus to which the text constantly returns   Community-based Heritage in Africa Peter R. Schmidt,2017-03-03 This volume boldly shifts focus away from top down community engagements usually instigated by elite academic and heritage institutions to examine locally initiated projects Schmidt explores how and why local research initiatives which are often motivated by rapid culture change caused by globalization arose among the Haya people of western Tanzania This frank appraisal privileges local voices and focuses attention on the unique and important contributions that such projects can make to the preservation of regional history Through a blend of personalized narrative and analytical examination the book provides fresh insights into African archaeology and heritage studies   Heritage as an action word: Uses beyond communal memory Susan Shay,Kelly M. Britt,2024-04-16 There is no limit to what constitutes heritage By definition heritage is the use of the past for present purposes Yet to any given group or population heritage can be a multitude of things and can serve a variety of purposes Based on shared memory heritage can be tangible or intangible boundless in variety and scope it can be for example objects landscapes food or clothing music or dance sites or statues monuments or buildings Importantly however heritage also has many and varied uses and powers It can be used to control to unite to engage and to empower people communities and nations In this interdisciplinary volume authors from around the world explore how different communities nations and groups intentionally and creatively use heritage both tangible and intangible in a wide variety of ways to positively address social and environmental issues Significantly these studies demonstrate how heritage can be an exceptionally valuable tool for political economic and social change Insightful studies are presented pertaining to heritage as social memory including the nationalistic political use of heritage heritage as resistance to political powers traditional knowledge as environmental science heritage for legal and community action heritage for building peace heritage for Indigenous and minority empowerment and heritage for exploring the past through phenomenological methods The goal of this volume is to move beyond seeing heritage as only social memory a mere interpretation of static past events people or places and instead explores critically the variety of ways heritage is engaged in the present and can be in the future   **Southern Crossroads** Walter Conser,2010-09-12 The South has always been one of the most distinctive regions of the United States with its own set of traditions and a turbulent history Although often associated with cotton hearty food and rich dialects the South is also noted for its strong sense of religion which has significantly shaped its history Dramatic political social and economic events have often shaped the development of southern religion making the nuanced dissection of the religious history of the region a difficult undertaking For instance segregation and the subsequent civil rights movement profoundly affected churches in the South as they sought to mesh the tenets of their faith with the prevailing culture Editors Walter H Conser and Rodger M Payne and the book s contributors place their work firmly in the trend of modern studies of southern religion that analyze cultural changes to gain a better understanding

of religion s place in southern culture now and in the future Southern Crossroads Perspectives on Religion and Culture takes a broad interdisciplinary approach that explores the intersection of religion and various aspects of southern life The volume is organized into three sections such as Religious Aspects of Southern Culture that deal with a variety of topics including food art literature violence ritual shrines music and interactions among religious groups The authors survey many combinations of religion and culture with discussions ranging from the effect of Elvis Presley s music on southern spirituality to yard shrines in Miami to the archaeological record of African American slave religion The book explores the experiences of immigrant religious groups in the South also dealing with the reactions of native southerners to the groups arriving in the region The authors discuss the emergence of religious and cultural acceptance as well as some of the apparent resistance to this development as they explore the experiences of Buddhist Americans in the South and Jewish foodways Southern Crossroads also looks at distinct markers of religious identity and the role they play in gender politics ritual and violence The authors address issues such as the role of women in Southern Baptist churches and the religious overtones of lynching with its themes of blood sacrifice and atonement Southern Crossroads offers valuable insights into how southern religion is studied and how people and congregations evolve and adapt in an age of constant cultural change *Critical Approaches to Heritage for Development* Charlotte Cross,John D. Giblin,2022-12-15 This book investigates the relationship between heritage and development from the global visions articulated by UNESCO and the Sustainable Development Goals SDGs to local activism livelihood innovations and political strategies employed in diverse countries of the Global South In recent years as culturally informed approaches to international development have become increasingly important engaging with heritage has been seen as a way to draw on practices and meanings from the past to help build future development This book gathers researchers and practitioners from across disciplines to address important themes such as health the environment sustainability peace security tourism and economic growth In doing so the book asks us to consider whose past and whose future is ultimately at stake in efforts to use heritage for development Key topics explored include histories and legacies of colonialism and calls for decolonisation and related questions of expertise ownership and agency Students practitioners and researchers from across the broad areas of history heritage education archaeology geography and development studies will find this book an invaluable guide to dynamic and contested understandings of heritage and development and the relationship between them *Heritage in Eight Acts* Rodrigo Christofoletti,2024-12-17 Heritage in Eight Acts brings together contributions on cultural heritage at an international level with an emphasis on Latin American and Ibero American studies addressing points of convergence between the local and the global in an accessible and direct way It discusses themes that have gained importance on the heritage preservation agenda signaling how Latin America and Europe have expanded their connections and actions in favor of the multiplicity of heritage Eight scholars from diverse backgrounds bring critical and nuanced understandings of heritage to the context of international relations From architecture to history and

from archeology to art history each contribution displays methodological creativity and analytical depth The result is a synthesis with the impact of showing how points of connection can bring Latin America closer to Europe but not from a relationship of subalternity but of shared protagonism *Heritage Futures* Rodney Harrison,2020-07-28 Preservation of natural and cultural heritage is often said to be something that is done for the future or on behalf of future generations but the precise relationship of such practices to the future is rarely reflected upon Heritage Futures draws on research undertaken over four years by an interdisciplinary international team of 16 researchers and more than 25 partner organisations to explore the role of heritage and heritage like practices in building future worlds Engaging broad themes such as diversity transformation profusion and uncertainty Heritage Futures aims to understand how a range of conservation and preservation practices across a number of countries assemble and resource different kinds of futures and the possibilities that emerge from such collaborative research for alternative approaches to heritage in the Anthropocene Case studies include the cryopreservation of endangered DNA in frozen zoos nuclear waste management seed biobanking landscape rewilding social history collecting space messaging endangered language documentation built and natural heritage management domestic keeping and discarding practices and world heritage site management *The Global Community Yearbook of International Law and Jurisprudence 2022* Giuliana Ziccardi Capaldo,2023-09-05 The 2022 edition of The Global Community Yearbook of International Law and Jurisprudence constitutes the only thorough annual survey of major developments in international courts General Editor Giuliana Ziccardi Capaldo selects excerpts from important court opinions supported by contributors who provide expert guidance on those cases The topical organization and subject index make the thorough comprehensive content easy to navigate Conservation of Architectural and Urban Heritage Tarek Teba,Antonino Di Raimo,2025-08-05 This book peers into the concept of conservation under the framework of sustainability The world s architectural history is in danger due to a lack of understanding expertise and care Some monuments have already been lost and more are under threat Heritage needs to be well understood interpreted defined and managed for future generations as it provides communities and cultures with retrospection and contributes to recorded history Additionally it discusses the relationship between cultural heritage preservation and sustainable development as well as restoration efforts for tangible and intangible cultural heritage assets The book aims to assist professionals working in the field of heritage conservation whether it is cultural rural architectural tangible or intangible It stands to be a valuable resource for architects and engineers as well as for conservators archaeologists environmentalists and policy makers *Islamic Heritage Architecture IV* S. Hernandez,2022-09-13 Islamic architecture has enriched design with a wide variety of structural shapes including among others unique arches a wide variety of vaults and domes which allow for new forms to be developed This volume deals with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausoleums citadels and forts but also houses and gardens engineering works such as

bridges and dams irrigation systems and many others which have also had a profound impact on society There is much to learn from past experiences to arrive at solutions that are environmentally sound and sustainable in the long term As conventional energy resources become scarce the Islamic design heritage can offer invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning Consequently many regions are losing their identity The included research reviews these developments in the light of what the classical Islamic urban designs and architectures have to offer modern society
