## **Heroes Of Polar Exploration:**

Heroes of Polar Exploration Ralph K. Andrist, 1960-06-01      Heroes of Polar Exploration Ralph K. Andrist, George John Dufek, 1963 The adventures and heroic deeds of pioneer and recent polar explorers including the I G Y scientists of the present day Grades 7-10      *Imagining the Arctic* Huw Lewis-Jones, 2017-03-13 *Imagining the Arctic* explores the culture and politics of polar exploration and the making of its heroes Leading explorers the celebrity figures of their day went to great lengths to convince their contemporaries of the merits of polar voyages Much of exploration was in fact theatre a series of performances to capture public attention and persuade governments to finance ambitious proposals The achievements of explorers were promoted celebrated and manipulated whilst explorers themselves became the subject of huge attention Huw Lewis Jones draws upon recovered texts and striking images many reproduced for the first time since the nineteenth century to show how exploration was projected through a series of spectacular visuals helping us to reconstruct the ways that heroes and the wilderness were imagined Elegantly written and richly illustrated *Imagining the Arctic* offers original insights into our understanding of exploration and its pull on the public imagination      Heroes of polar exploration Horizon, 1962  
*Safe Return Doubtful* John Maxtone-Graham, 1988      **Heroes Of Polar Exploration** Horizon Magazine, 1962  
Rethinking Geographical Explorations in Extreme Environments Marco Armiero, Roberta Biasillo, Stefano Morosini, 2022-07-14 Focusing on extreme environments from Umberto Nobile's expedition to the Arctic to the commercialization of Mt Everest this volume examines global environmental margins how they are conceived and how perceptions have changed Mountaintops and Arctic environments are the settings of social encounters political strategies individual enterprises geopolitical tensions decolonial practises and scientific experiments Concentrating on mountaineering and Arctic exploration between 1880-1960 contributors to this volume show how environmental marginalisation has been discursively implemented and materially generated by foreign and local actors It examines to what extent the status and identity of extreme environments has changed during modern times moving them from periphery to the centre and discarding their marginality The first section looks at ways in which societies have framed remoteness through the lens of commercialization colonialism knowledge production and sport while the second examines the reverse transfer focusing on how extreme nature has influenced societies through international network creation political consensus and identity building This collection enriches the historical understanding of exploration by adopting a critical approach and offering multidimensional and multi-gaze reconstructions This book is essential reading for students and scholars interested in environmental history geography colonial studies and the environmental humanities      *The Complete Idiot's Guide to the Arctic and Antarctic* Jack Williams, 2003 Now armchair adventurers can find out about the physical geological and climatological conditions of the poles their unique flora fauna and human inhabitants the history of the greatest polar expeditions the exciting scientific research being conducted there and what changing climate conditions might mean to the

future of this vast and fascinating realm      **Before the Heroes Came** T. H. Baughman, 1999-09-01 Although the Antarctic ice pack and some offshore islands had been sighted and even landed upon briefly as early as the 1820s it was not until an eccentric Anglo Norwegian explorer Carsten F Borchgrevink went ashore in 1895 that a human being set foot on the Antarctic continent Borchgrevink snubbed by the British establishment had stolen a march on several planned competing expeditions from Germany and Scandinavia Borchgrevink returned to Antarctica in 1899 with a party that was the first to winter over on the continent Regrettably bad weather and unscalable mountains limited their forays inland Borchgrevink's survival was proof that with adequate supplies the Antarctic winter was survivable and that with a better geographic position the enormous unknown of the continent could be investigated Borchgrevink galvanized the British geographical authorities who had come to consider polar exploration their exclusive province Led by Sir Clements Markham of the Royal Geographic Society the British keenly felt his blow to their national pride delivered by an explorer they regarded as an arrogant upstart The RGS pushed forward with its plans and a tragic competition to be the first to reach the South Pole was set in motion between the British and the Scandinavians This work is an account of the first tentative human gropings in Antarctica concentrating on the coalescing of official and popular attitudes that later resulted in the polar races of Robert Falcon Scott and Roald Amundsen which dominate the story of the Heroic Era of Antarctic exploration from 1901 to 1922      Northscapes Dolly Jørgensen, Sverker Sörlin, 2013-11-08 This book argues that the unique environments of the North have been borne of the relationship between humans and nature Approaching the topic through the lens of environmental history the contributors examine a broad range of geographies including those of Iceland and other islands in the Northern Atlantic Sweden Finland Russia the Pacific Northwest and Canada over a time span ranging from CE 800 to 2000 Northscapes is bound together by the intellectual project of investigating the North both as an imagined and mythologized space and as an environment shaped by human technology The North offers a valuable analytical framework that surpasses nation states and transgresses political and historical borders This volume develops rich explorations of the entanglements of environmental and technological history in the northern regions of the globe      **Antarcticness** Ilan Kelman, 2022-02-08 Antarcticness joins disciplines communication approaches and ideas to explore meanings and depictions of Antarctica Personal and professional words in poetry and prose plus images present and represent Antarctica as presumed and as imagined alongside what is experienced around the continent and by those watching from afar These understandings explain how the Antarctic is viewed and managed while identifying aspects which should be more prominent in policy and practice The authors and artists place Antarctica and the perceptions and knowledge through Antarcticness within inspirations and imaginations without losing sight of the multiple interests pushing the continent's governance as it goes through rapid political and environmental changes Given the diversity and disparity of the influences and changes the book's contributions connect to provide a more coherent and encompassing perspective of how society views Antarctica scientifically and artistically and what the continent

provides and could provide politically culturally and environmentally Offering original research art and interpretations of different experiences and explorations of Antarctica explanations meld with narratives while academic analyses overlap with first hand experiences of what Antarctica does and does not could and could not bring to the world **Heart of the Hero** Kari Herbert, 2013 First published as Polar wives by Greystone Books Vancouver BC 2012 **An Unsung Hero** Michael Smith, 2010-03-03 The story of the remarkable Tom Crean who ran away to sea aged 15 and played a memorable role in Antarctic exploration He spent more time in the unexplored Antarctic than Scott or Shackleton and outlived both Among the last to see Scott alive Crean was in the search party that found the frozen body An unforgettable story of triumph over unparalleled hardship and deprivation **Polar Exploration** Beau Riffenburgh, 2010 Produced in association with the Royal Geographical Society Polar Explorations looks back at a heroic age when explorers ventured forth to conquer nature's last bastions It follows the most incredible voyages in history from the initial navigation of the Northwest Passage to first flights over the Antarctic There are impressive accounts of Shackleton's famed open boat journey Mawson's solo trek across the Polar Plateau Ellsworth's transatlantic flight and more Lesser known stories of cannibalism madness sabotage and mutiny capture the thrill and danger of these amazing missions **Decolonising Imperial Heroes** Max Jones, Berny Sèbe, Bertrand Taithe, Peter Yeandle, 2017-10-02 The heroes of the British and French empires stood at the vanguard of the vibrant cultures of imperialism that emerged in Europe in the second half of the nineteenth century Their stories are well known Scholars have tended to assume that figures such as Livingstone and Gordon or Marchand and Brazza vanished rapidly at the end of empire Yet imperial heroes did not disappear after 1945 as British and French flags were lowered around the world On the contrary their reputations underwent a variety of metamorphoses in both the former metropolises and the former colonies This book develops a framework to understand the complex legacies of decolonisation both political and cultural through the case study of imperial heroes We demonstrate that the decolonisation of imperial heroes was a much more complex and protracted process than the political retreat from empire and that it is still an ongoing phenomenon even half a century after the world has ceased to be painted in red Whilst Decolonising Imperial Heroes explores the appeal of the explorers humanitarians and missionaries whose stories could be told without reference to violence against colonized peoples it also analyses the persistence of imperial heroes as sites of political dispute in the former metropolises Demonstrating that the work of remembrance was increasingly carried out by diverse fragmented groups of non state actors in a process we call the privatisation of heroes the book reveals the surprising rejuvenation of imperial heroes in former colonies both in nation building narratives and as heritage sites This book was originally published as a special issue of the Journal of Imperial and Commonwealth History **Hero Tales of the Far North** Jacob A. Riis, 2019-12-02 In Hero Tales of the Far North Jacob A Riis employs vivid narrative techniques and a lively engaging prose style to recount stories of valor and heroism among Indigenous peoples and early settlers in the northern climates of North America This collection immerses readers in the

landscapes and cultural nuances of the Far North interweaving historical facts with rich folklore to create a tapestry that depicts resilience in the face of adversity Riis's work reflects the broader context of late 19th century American literature characterized by a burgeoning interest in regionalism and the romanticization of frontier life shedding light on both celebrated figures and unsung heroes Jacob A Riis a Danish American social reformer and journalist dedicated his life to improving urban living conditions and giving voice to marginalized communities His own experiences of hardship and poverty in New York City combined with his interest in social justice provided a compelling impetus for Riis to explore the heroism found in less acknowledged areas of American life This background not only informs the thematic elements of the book but also exemplifies his lifelong commitment to documenting the human condition in various cultural contexts Hero Tales of the Far North is a must read for anyone interested in Indigenous narratives frontier history or the evolution of American identity Riis's work serves as both a window into the past and a mirror reflecting the struggles of humanity It invites readers to appreciate the often overlooked stories that shape our rich cultural heritage

**Antarctica in Fiction** Elizabeth Leane, 2012-06-29 This comprehensive analysis of literary responses to Antarctica examines the rich body of literature that the continent has provoked over the last three centuries focussing particularly on narrative fiction Novelists as diverse as Edgar Allan Poe James Fenimore Cooper Jules Verne H P Lovecraft Ursula Le Guin Beryl Bainbridge and Kim Stanley Robinson have all been drawn artistically to the far south The continent has also inspired genre fiction including a Mills and Boon novel a Phantom comic and a Biggles book as well as countless lost race romances espionage thrillers and horror fantasies Antarctica in Fiction draws on these sources as well as film travel narratives and explorers own creative writing It maps the far south as a space of the imagination and argues that only by engaging with this space in addition to the physical continent can we understand current attitudes towards Antarctica

**The Dundee Whalers 1750-1914** Norman Watson, 2003-11-24 This is a study of what was Britain's leading whaling port Today Dundee captains and the city's whaling fleet have a permanent place in the geography of the world Cape Adams Cape Milne Arctic Bay and Eclipse Sound recall an era when the city's stoutly built ships manned by heroic adventurers discovered new routes made new friends but seldom
