Transcultural History of Heritage Michael Falser, 2019-12-16 This book unravels the formation of the modern concept of cultural heritage by charting its colonial postcolonial nationalist and global trajectories By bringing to light many unresearched dimensions of the twelfth century Cambodian temple of Angkor Wat during its modern history the study argues for a conceptual connected history that unfolded within the transcultural interstices of European and Asian projects With more than 1 400 black and white and colour illustrations of historic photographs architectural plans and samples of public

media the monograph discusses the multiple lives of Angkor Wat over a 150 year long period from the 1860s to the 2010s Volume 1 Angkor in France reconceptualises the Orientalist French colonial discovery of the temple in the nineteenth century and brings to light the manifold strategies at play in its physical representations as plaster cast substitutes in museums and as hybrid pavilions in universal and colonial exhibitions in Marseille and Paris from 1867 to 1937 Volume 2 Angkor in Cambodia covers for the first time in this depth the various on site restoration efforts inside the Archaeological Park of Angkor from 1907 until 1970 and the temple's gradual canonisation as a symbol of national identity during Cambodia's troublesome decolonisation 1953-89 from independence to Khmer Rouge terror and Vietnamese occupation and finally as a global icon of UNESCO World Heritage since 1992 until today Congratulations to our author Michael Falser who received the prestigious 2021 ICAS Book Prize in the Ground Breaking Subject Matter category

Candi, Space and Landscape Véronique Degroot, 2009 Central Javanese temples were not built anywhere and anyhow On the contrary their positions within the landscape and their

architectural designs were determined by socio cultural religious and economic factors This book explores the correlations between temple distribution natural surroundings and architectural design to understand how Central Javanese people structured the space around them and how the religious landscape thus created developed Besides questions related to territory and landscape Degroot s book analyzes the structure of the built space and its possible relations with conceptualized space showing the influence of imported Indian concepts as well as their limits Going off the beaten track this book explores the hundreds of small sites that scatter the landscape of Central Java It is also one of very few studies to apply the methods of spatial archaeology to Central Javanese temples and the first in almost a century to present a descriptive inventory of the remains of this region
