The HLA FactsBook Steven G.E. Marsh, Peter Parham, Linda D. Barber, 1999-12-13 The HLA FactsBook presents up to date and comprehensive information on the HLA genes in a manner that is accessible to both beginner and expert alike The focus of the book is on the polymorphic HLA genes HLA A B C DP DQ and DR that are typed for in clinical HLA laboratories Each gene has a dedicated section in which individual entries describe the structure functions and population distribution of groups of related allotypes Fourteen introductory chapters provide a beginner's guide to the basic structure function and genetics of the HLA genes as well as to the nomenclature and methods used for HLA typing This book will be an invaluable reference for researchers studying the human immune response for clinicians and laboratory personnel involved in clinical and forensic HLA typing and for human geneticists population biologists and evolutionary biologists interested in HLA genes as markers of human diversity Introductory chapters provide good general overview of HLA field for novice immunologists and geneticists Up to date complete listing of HLA alleles Invaluable reference resource for immunologists geneticists and cell biologists Combines both structural and functional information which has never been compiled in a single reference book previously Serological specificity of allotypes Identity of material sequenced including ethnic origin Database accession numbers Population distribution Peptide binding specificities T cell epitopes Amino acid sequences of allotypes Key references

The Immunoglobulin FactsBook Marie-Paule Lefranc, Gerard Lefranc, 2001-05-29 The FactsBook series has established itself as the best source of easily accessible and accurate facts about protein groups Books in the series use an easy to follow format and are meticulously researched and compiled by experts in the field The Immunoglobulin FactsBook is the first published reference for all 203 human functional and ORF immunoglobulin genes It is complete and standardized and employs nomenclature approved by the HUGO Nomenclature Committee

The Blood Group Antigen FactsBook Marion E. Reid, Christine Lomas-Francis, 2003-09-08 The second edition of The Blood Group Antigen FactsBook provides key information relating to human red blood cell membrane components carrying blood group antigens the molecular basis of the antigens their serological characteristics and the clinical significance of blood group antibodies The data on this group of molecules has expanded greatly since the previous edition was published five years ago Topics include history and information on terminology expression chromosomal assignment carrier molecule description molecular basis of antigens effect of enzymes chemicals clinical significance disease association phenotypes glycotypes and key references Over 250 fully updated entries on blood group antigens formatted on single pages for easy use Inclusion of RHAG blood group system and over twenty new antigens Basic science paired with clinical applications to give context to information Full color illustrations gene maps and charts Both traditional and ISBT sanctioned naming conventions included

The Leucocyte Antigen Factsbook A. Neil Barclay, Marion H. Brown, S. K. Alex K. Alex Law, Andrew J. McKnight, Michael G. Tomlinson, P. Anton van der Merwe, 1997-06-22 A volume in the popular FactsBook Series the First Edition of The Leucocyte Antigen FactsBook was

hugely successful The new Second Edition has been completely revised updated and expanded by 65% to include new findings and up to date key references The introductory chapters have also been updated especially in terms of nomenclature the role of the World Wide Web and new structural data The Leucocyte Antigen FactsBook Second Edition contains more than 200 entries with approximately 70 new entries on all the molecules specifically expressed in the surface of cells of the haematopoietic system including all characterized CD antigens antigen receptors MHC antigens adhesion molecules and cytokine receptors This FactsBook will be of enormous value to immunologists cell biologists biochemists and endocrinologists Key Features Completely up to date Revised and expanded to include over 70 new entries More than 200 entries in total plus additional introductory material New structural data New nomenclature for CD and related molecules covered *The Complement FactsBook* Scott R. Barnum,1999-10-28 The Complement FactsBook contains entries on all components of the Complement System including C1q and Lectins C3 Family Serine Proteases Serum Regulators of Complement Activation Cell Surface Proteins and Terminal Pathway Proteins Domain Structure diagrams are incorporated to clearly illustrate the relationships between all the complement proteins both within families and between families The FactsBook also includes the cDNA sequences marked with intron exon boundaries which will facilitate genetic studies Includes the cDNA sequences marked with intron exon boundaries facilitating genetic studies Presents detailed structural information including cDNA and gene structure for all proteins Introduces complement function simply described for each function Data is as up to date as possible including unpublished work from many contributors Incorporates domain structures diagrams which beautifully illustrate the relationship between all the complement proteins both within and between families Each chapter has been written by an expert in the field Data is as up to date as possible including unpublished work from many contributors Entries provide information on Alternative nomenclature Physiochemical properties Structure and function Tissue distribution and regulation expression Protein sequence modules Chromosomal location Genomic structure Database accession numbers Deficiency and polymorphic variants Key references *The Cytokine Factsbook and Webfacts* Katherine A. Fitzgerald,Luke A.J. O'Neill,Robin E. Callard,Andy J.H. Gearing,2001-10-09 Completely revised and expanded this second edition of The Cytokine FactsBook is the most up to date reference manual available for all current well characterized interleukins cytokines and their receptors An additional 52 cytokines are included doubling the number of entries from the previous edition The key properties of each cytokine are described and presented in a very accessible format with diagrams for each of the receptors The Cytokine FactsBook includes free online access to the regularly updated Cytokine Webfacts Cytokine Webfacts is a web based comprehensive compendium of facts about cytokines and their receptors that includes a variety of data representations such as text signal pathway diagrams and 3D images This exciting resource is integrated into other databases via hypertext links to provide a unique network and contains a web enabled version of RasMol for viewing structures *The Adhesion Molecule FactsBook* ,2000-08-24 This updated and expanded

Second Edition of The Adhesion Molecule FactsBook has nearly double the number of entries of the First Edition and provides a compendium of the major cell surface adhesion molecules The introductory chapters detail the organization of the data in the entries section provide a background to the main adhesion molecule families and inform the reader how to access information on adhesion molecules on the Internet The entries have been designed to allow the reader to quickly establish the main structure and functional features of each molecule and where to find information Alternative nomenclature Tissue distribution and regulation of expression Ligands Gene organization and chromosomal location Protein structure and molecular weights Amino acid sequence of the most commonly studied organisms PIR SWISSPROT and EMBL GenBank accession numbers Biological function Key references

The Nuclear Receptor FactsBook Vincent Laudet, Hinrich Gronemeyer, 2002 The FactsBook Series has established itself as the best source of easily accessible and accurate facts about protein groups They use an easy to follow format and are researched and compiled by experts in the field This Factsbook is devoted to nuclear receptors The first section presents an introduction and describes the mode of action of the receptors in general The second section of the book contains detailed entries covering each type of receptor Entries provide information on Nomenclature and structure Isolation DNA binding properties Ligands Expression Target genes Knockouts Disease association Gene structure promoter and isoforms Chromosomal location Amino acid sequences Key references

The T Cell Receptor FactsBook Marie-Paule Lefranc, Gerard Lefranc, 2001-07-13 The T Cell Receptor FactsBook contains entries on all the 176 functional variable diversity joining and constant regions of the human T cell receptor including alpha beta gamma and delta loci Introductory chapters summarize information of T cell receptor chain synthesis chromosomal location and an overview of the human T cell receptor loci

The Leukemia-Lymphoma Cell Line Factsbook Hans G. Drexler, 2000-09-04 The Leukemia Lymphoma Cell Line Factsbook represents an essential reference manual for all of the well characterized leukemia lymphoma cell lines currently available It provides the most important facts using the succinct and user friendly format that has made the FactsBooks so popular with scientists and clinical researchers Introductory chapters provide background and perspective for culturing malignant hematopoietic blood forming cell lines These chapters are followed by over 400 comprehensive individual entries Each cell line entry highlights essential clinical immunological genetic and functional features and includes a comprehensive listing of references The full spectrum of malignant cell lines from all hematopoietic cell lineages Sister cell lines and relevant subclones Clinical data patient diagnosis treatment status and specimen source Authentication of derivation and availability Immunophenotype Cytogenetic karyotype Translocations and fusion genes Receptor gene rearrangements and genetic alterations Cell cultures aspects establishment medium doubling time growth Cytochemical profile Cytokine production and response to cytokines Proto oncogene and transcription factor expression alteration Functional features differentiation induction heterotransplantability Special unique features Key references

HLA from Benchtop to Bedside A. Bradley Eisenbrey, 2021-01-05 HLA from Benchtop to Bedside provides

the reader with a comprehensive concise and thoroughly up to date book on all aspects of the HLA system including new techniques and methodologies Each chapter begins with bullet point lists of principle learning points including comprehensive references and validated links to international resources Written by a diverse range of international academics for professionals researchers undergraduate and graduate students this book is ideal for organ and stem cell transplant professionals histocompatibility laboratory professionals and staff medical residents and fellows on transplant services medical students and students in clinical laboratory science The book s author Dr Arthur Bradley Eisenbrey is an experienced transplant pathologist who has held significant academic and leadership positions in the field Reviews current knowledge surrounding the HLA system Covers current methodologies and utilization of histocompatibility testing Authored by a leader in the field of histocompatibility and transfusion medicine

Immunology Guidebook Julius Cruse, Robert Lewis, Huan Wang, 2004-08-05 The Immunology Guidebook provides an easily accessible text reference to the more up to date and difficult concepts in the complex science of immunology It aims to demystify basic concepts and specialised molecular and cellular interactions Its 18 chapters offer a logical and sequential presentation where much of the data is displayed in carefully designed tables This book is intended for immunology students researchers practitioners and basic biomedical scientists Tables provide a quick reference to difficult to find immunology data A distillate of the latest information on immunogenetics of the human MHC associated with tissue transplantation Information boxes feature related web resources

Immunoinformatics Darren R. Flower, 2008-02-07 Immunoinformatics Predicting Immunogenicity In Silico is a primer for researchers interested in this emerging and exciting technology and provides examples in the major areas within the field of immunoinformatics This volume both engages the reader and provides a sound foundation for the use of immunoinformatics techniques in immunology and vaccinology The volume is conveniently divided into four sections The first section Databases details various immunoinformatic databases including IMGT HLA IPD and SYEPEITHI In the second section Defining HLA Supertypes authors discuss supertypes of GRID CPCA and hierarchical clustering methods Hla Ad supertypes MHC supertypes and Class I Hla Alleles The third section Predicting Peptide MCH Binding includes discussions of MCH binders T Cell epitopes Class I and II Mouse Major Histocompatibility and HLA peptide binding Within the fourth section Predicting Other Properties of Immune Systems investigators outline TAP binding B cell epitopes MHC similarities and predicting virulence factors of immunological interest Immunoinformatics Predicting Immunogenicity In Silico merges skill sets of the lab based and the computer based science professional into one easy to use insightful volume

Immunohematology: Principles and Practice Eva D Quinley, 2020-06-15 Immunohematology Principles and Practice Third Edition an ideal text for anyone who wants to master the theory and practices of today s blood banking

Postgraduate Haematology A. Victor Hoffbrand, Daniel Catovsky, Edward G. D. Tuddenham, Anthony R. Green, 2011-07-18 The textbook of choice for trainees and practitioners in haematology Over five editions Postgraduate Haematology has built a reputation as an extremely practical

user friendly reliable source of information for examination preparation and clinical practice Completely revised to reflect the latest research in the field this edition continues to provide trainees with up to date knowledge on the pathogenesis clinical and laboratory features and management of blood disorders It covers the significant advances which have occurred in the application of cytogenetics and molecular genetics in the diagnosis classification and understanding of haematological disorders Coupled with the expertise of 34 new contributors from across Europe the editors have been joined by Professor Anthony Green from the University of Cambridge and they have reorganised the book into 52 accessible chapters Postgraduate Haematology is richly illustrated throughout with over 450 colour illustrations including line drawings photomicrographs of blood cells and tissues and algorithms to help aid treatment decision making It is an indispensable resource for trainees and an essential read for all specialists who are interested in updating their knowledge Companion resources site for this book www.wiley.com/go/hoffbrand_postgraduate with Figures and tables from the book for downloading Interactive multiple choice questions

Immunological Bioinformatics Ole Lund,Morten Nielsen,Claus Lundegaard,Can Kesmir,Søren Brunak,2024-02-06

Using bioinformatics methods to generate a systems level view of the immune system description of the main biological concepts and the new data driven algorithms Despite the fact that advanced bioinformatics methodologies have not been used as extensively in immunology as in other subdisciplines within biology research in immunological bioinformatics has already developed models of components of the immune system that can be combined and that may help develop therapies vaccines and diagnostic tools for such diseases as AIDS malaria and cancer In a broader perspective specialized bioinformatics methods in immunology make possible for the first time a systems level understanding of the immune system The traditional approaches to immunology are reductionist avoiding complexity but providing detailed knowledge of a single event cell or molecular entity Today a variety of experimental bioinformatics techniques connected to the sequencing of the human genome provides a sound scientific basis for a comprehensive description of the complex immunological processes This book offers a description of bioinformatics techniques as they are applied to immunology including a succinct account of the main biological concepts for students and researchers with backgrounds in mathematics statistics and computer science as well as explanations of the new data driven algorithms in the context of biological data that will be useful for immunologists biologists and biochemists working on vaccine design In each chapter the authors show interesting biological insights gained from the bioinformatics approach The book concludes by explaining how all the methods presented in the book can be integrated to identify immunogenic regions in microorganisms and host genomes
