Athletic Vision Skills Dan Selin, 2020-01-29. An exceptional player will possess top notch read and react skills when on the ice, anticipating where the puck is going because of their well-developed vision skills. This allows maximum peripheral vision to instantly help decide the next physical movement. Throughout his book *Athletic Vision Skills*, Dan Selin explains the science behind well-developed vision skills as the NEW sports skill. Simply put, a player's expanded field of vision offers more options for the brain to create instant automatic body movements. All good players possess well-developed skating, stickhandling, passing, and shooting skills, but a player's vision skill level, once mastered, will change the way they play the game. Well-developed vision skills lessen body injuries and concussions, creating better skilled and more valuable players on the ice. Terminology including head up, chin up, read and react, what's in your brain, is how you play, five head positions, the 140 factor, etc., help explain how a player can effectively play without looking down and tracking the puck, contributing to safer play. Dan's book presents practical solutions, testimonials from players and sports writers, first person stories, statistics, newspaper articles, medical professionals' opinions, and facts. Empirical data collected through studies is used to support the basis of this new frontier for the training of tomorrow's highly skilled hockey players. **The Hockey Method** BOB DE LA

SALLE, 2014-02-27. Expectations are too high for beginners in hockey. Beginners are simply not ready for team play and systems. What is missing is a transition phase from the first time a player puts on a pair of skates to that first hockey game. The Hockey Method is a methodology to fill in this missing link or gap in hockey development. It identifies skill levels that can be grading to track player proficiency. The Hockey Method consists of two parts: Book 1 Beginner Skating and Book 2 Beginner Puck Control. These two parts present 31 skill concepts that are so simple and easy to learn that you don't need to be a coach to teach them. What is really needed for first timers is one on one direction and instruction. Coaches or parents can do it, but parents are a better choice to instruct beginners because they have the time and vested interest to dedicate the 1 on 1 instruction needed by beginners at this early age. The basic idea is to build confidence by learning to walk before you run, run before you glide, and to be able to turn the toes in and out before you are able to use edges. **Hockey Jane**

*Positive Youth Development through Sport* Nicholas L. Holt, 2016-04-07

Cutting through the political rhetoric about the power of sport as a tool for social change and personal improvement, this book offers insight into how and why participating in sport can be good for children and young people. As the first text to focus on the role of sport in positive youth development (PYD), it brings together high-profile contributors from diverse disciplines to examine critically the ways in which sport can be used to promote youth development. Now in a fully updated, revised, and expanded new edition, *Positive Youth Development through Sport* covers a wider range of disciplines, including sport psychology, development psychology, physical education, sport development, and sport sociology. Its three main sections focus on the theoretical and historical contexts of PYD; quantitative and qualitative methods for assessing PYD in sport; the potential of PYD in sport across different ages and abilities.
