to large scale modifications of the landscape across several states sparked new thinking about the human relationship to the natural world and demanded a reckoning with disability and death on an ecological scale And as the guns fell silent the change continued Browning and Silver show how the war influenced the future of weather forecasting veterinary medicine the birth of the conservation movement and the establishment of the first national parks In considering human efforts to find military and political advantage by reshaping the natural world Browning and Silver show not only that the environment influenced the Civil War s outcome but also that the war was a watershed event in the history of the environment itself
