### Introduction

*M. Masud R. Khan*

Some six months before Dr Winnicott's death in January 1971, a group of young Anglican priests invited him to come to talk to them. He accepted, and in a casual exchange of conversation they told him that what they needed guidance about was how to differentiate between a person who seeks their help because he is sick and needs psychiatric treatment, and one who is capable of helping himself through talking with them. Telling this story to me, Winnicott said that he had been taken aback by the awesome simplicity of their question. He had paused a long while, thought and then replied:

*'If a person comes and talks to you and, listening to him, you feel he is boring you, then he is sick, and needs psychiatric treatment. But if he sustains your interest, no matter how grave his distress or conflict, then you can help him alright.'*

I was deeply impressed by the wisdom of Winnicott's reply, and since then, whenever I see a person in consultation, this statement of his is never out of my mind.

Re-reading Winnicott's 'Fragment of an Analysis' has brought that question into an even sharper focus for me. We have two accounts of this patient from Winnicott, one which he recorded in his paper 'Withdrawal and Regression' (**Winnicott 1954a**, reproduced in the Appendix to this volume), and the other presented in 'Fragment of an Analysis', of which this is the definitive text.<sup>1</sup> It is instructive to compare these accounts in their style, character and content.

For my argument it is important to distinguish between *boring* and *boredom*. The *Oxford English Dictionary* defines the verbal substantive *boring* as 'the practice of annoying and wearying others', and the noun *boredom* as 'the state of being bored; tedium, ennui'. It is my hypothesis here that *boring* has the quality of the 'anti-social tendency' (**Winnicott 1956**) and implies a demand and a hopefulness, whereas *boredom* is an organised and defensive mood and

*Holding and Interpretation* Donald W. Winnicott, 2018-05-01 In his illuminating introduction Masud Khan to whom Dr Winnicott's case notes were entrusted relates this definite text of Holding and Interpretation Fragment of an Analysis to an earlier phase of the treatment of the same patient described by Winnicott in his paper Withdrawal and Regression also included in this volume The case documents the therapeutic care of a highly gifted professional man who suffered a psychotic breakdown with acute depression and who through analysis and hospital treatment was gradually helped to recovery It is remarkable for many things Dr Winnicott's skill at holding the patient in the analytical sessions and providing guidance through sensitive interpretation his ability to re-enforce the patient's sexual and ego functions his instinctive recognition of the value of silence as a way of showing trust and of not destroying by intent his capacity to accept the paradox that verbal communication can be both meaningful and a negation of psychic reality and not least his acute judgment of when to stop the analysis

Holding and Interpretation Donald Woods Winnicott, 2008      Holding and Interpretation Donald Woods Winnicott, 1986-01-01      **Finding Space** Ann Belford Ulanov, 2001-01-01 In Finding Space Ann Belford Ulanov argues that depth psychology in general and the work of D W Winnicott in particular offer vital new ways in which to apprehend religious life especially Christian religious life Her inspiration is rooted in Winnicott's influence on her work as an analyst and how his ideas have enriched her own Christian faith and religious understanding In addition Ulanov feels Winnicott's focus on the intensity of aliveness is an antidote to the plight of contemporary religion that it can be passionless or rote and thereby irrelevant to so many people She expands Winnicott's concept of transitional space between self and other to apply to the space between the human and divine She explores the importance of the illusionist element of God images in creative approaches to the divine Other topics include the paradox transitional reality holds with subjective and objective notions Christians have of God the inclusion of the body specifically sexuality and aggression and the struggle for integration within the self in the search for relationship with God and the importance of the feminine In an especially helpful appendix Ulanov includes Winnicott's thoughts on matters pertinent to religious life and thought      *The Collected Works of D.W. **Countertransference in Psychotherapy with Children and Adolescents** Jerrold R. Brandell, 1992 Countertransference was believed at one time to consist of the subjective reactions of the therapist whose own unresolved conflicts had been reactivated by the patient s transference More recently however it has been recast to include the totality of the therapist s attitudes fantasies and emotional reactions to the patient While this important topic has received increased attention in the mental health literature in recent years little attention has been paid to countertransference encountered in child and adolescent psychotherapy This book focuses on countertransference in the psychotherapy of children and adolescents in detail It offers the child and adolescent therapist an invaluable opportunity to explore countertransference in substantial depth and in a variety of clinical encounters across the wide spectrum of child and adolescent psychopathology Perhaps most importantly it normalizes the topic of transference in the psychotherapy of children and adolescents and in so doing highlights the clinician s subjective experience as central to the process of psychotherapy
