Hollow Mountains:

Mountains Graham Park, 2017-11-09 An explanation of how and why mountains are formed The age location life cycle and key features of different mountain types are described **Decisions on Geographic Names in the United States** United States Board on Geographic Names, 1980 **Geological Survey Professional Paper** Geological Survey (U.S.), 1937

Trails and Summits of the Green Mountains Walter Collins O'Kane, 1926 **Geology of the Marathon Region, Texas** Philip B. King, 1937 Democracy's Mountain Ruth M. Alexander, 2023-09-26 At 14 259 feet Longs Peak towers over Colorado's northern Front Range A prized location for mountaineering since the 1870s Longs has been a place of astonishing climbing feats and unsurprisingly of significant risk and harm Careless and unlucky climbers have experienced serious injury and death on the peak while their activities equipment and trash have damaged fragile alpine resources As a site of outdoor adventure attracting mostly white people Longs has mirrored the United States tenacious racial divides even into the twenty first century In telling the history of Longs Peak and its climbers Ruth M Alexander shows how Rocky Mountain National Park like the National Park Service NPS has struggled to contend with three fundamental obligations to facilitate visitor enjoyment protect natural resources and manage the park as a site of democracy Too often it has treated these obligations as competing rather than complementary commitments reflecting national discord over their meaning and value Yet the history of Longs also shows us how over time climbers the park and the NPS have attempted to align these obligations in policy and practice By putting mountain climbers and their relationship to Longs Peak and its rangers at the center of the story of Rocky Mountain National Park Alexander exposes the significant role outdoor recreationists have had as both citizens and privileged adventurers in shaping the peak's meaning use and management Since 2000 the park has promoted climber enjoyment and safety helped preserve the environment facilitated tribal connections to the park and attracted a more diverse group of visitors and climbers Yet Alexander argues more work needs to be done Alexander's nuanced account of Longs Peak reveals the dangers of undermining national parks fundamental obligations and presents a powerful appeal to meet them fairly and fully **The Tombs of Forefathers** Jan Turek, Petr Kršťák, 2025-07-31 This analysis of Neolithic long barrows in Bohemia uncovers new insights into their construction significance and role in spiritual traditions Neolithic long barrows in Bohemia were long neglected by archaeologists due to their destruction by modern intensive agricultural activity This new analysis resulting from a three year interdisciplinary research project of the phenomenon of Neolithic long barrows in Bohemia and Central Europe presents entirely new findings and data and tackles a number of previously unresolved questions New discoveries based primarily on remote sensing and targeted excavations together with the revision of earlier archaeological records allow us to define more accurately the construction and chronological development of these monuments and to advance our knowledge of the southeastern boundary of this phenomenon's spread together with reconstruction of the social and religious significance of these monuments for the agricultural communities of Central Europe

At the sacred places defined by the long barrows ceremonies and rituals took place over millennia that confirmed the cohesion of the living with the ancestors and their faith in the gods. People even many generations later continued to venerate these ancient monuments not as places of final rest for their direct ancestors but as places dedicated to mythical time where the living meet the dead and honour the gods. It is not surprising therefore that people added the burials of their own ancestors to the embankments of ancient barrows and established their own funerary areas nearby even after several millennia. All long barrows excavated within our project contained only one primary burial. In Bohemia these were not collective graves as found for example in the British Isles or Scandinavia. Given the monumentality of barrow construction it can be presumed that the buried individuals represented a form of social elite though not necessarily due to their individual social power. It seems that the primary burial played the role of an initiation sacrifice, a ritual of consecration of the ancestor sanctuary which then no longer served for further burials that may have been taboo. Subsequent activities may have been related to forms of ancestral cult but the primary burial was not followed by other funerary events. All evidence of later burials is at least 1000 years later than barrow construction. In the region around the Czech mythical Mountain p burial monuments from various prehistoric periods including the Late Neolithic abound. Residential and economic activities on the plains appear later. It can be assumed that this area was perceived as a ritual landscape in earlier prehistory in which long barrows played a significant role in structuring the farming landscape and as significant landmarks. Their monumentality initiated a long standing tradition creating palimpsests of funerary and sacred sites near Mount p. The places where the long barrows were built played an important role in the lives of prehistoric communities and their placement and orientation in the landscape was not random indicating significant symbolic connotations with the surrounding landscape. The rituals and festivities held here allowed people to connect with the spiritual legacy of their ancestors thus creating a significant spiritual tradition inscribed in the agriculturally colonised landscape. *The Mountain* Bernard Debarbieux, Gilles Rudaz, 2015-09-10

In *The Mountain* geographers Bernard Debarbieux and Gilles Rudaz trace the origins of the very concept of a mountain showing how it is not a mere geographic feature but ultimately an idea one that has evolved over time influenced by changes in political climates and cultural attitudes. To truly understand mountains they argue we must view them not only as material realities but as social constructs ones that can mean radically different things to different people in different settings. From the Enlightenment to the present day and using a variety of case studies from all the continents the authors show us how our ideas of and about mountains have changed with the times and how a wide range of policies from border delineation to forestry as well as nature protection and social programs have been shaped according to them. A rich hybrid analysis of geography history culture and politics the book promises to forever change the way we look at mountains. **The Edinburgh New Philosophical Journal**, 1838 *The Edinburgh philosophical journal* **Correspondence and miscellaneous writings, 1735-1753** Benjamin Franklin, 1904 **The Works of Benjamin Franklin** Benjamin
