Values and Morals A.I. Goldman, Jaegwon Kim, 2013-03-09 This Festschrift seeks to honor three highly distinguished scholars in the Department of Philosophy University of Michigan William K Frankena Charles L Stevenson and Richard B Brandt Each has made significant contributions to the philosophic literature particularly in the field of ethics Michigan has been fortunate in having three such original and productive moral philosophers serving on its faculty simultaneously Yet they stand in a long tradition of excellence both within the Department and in the University Let us trace that tradition briefly The University of Michigan opened in 1841 Its Department of Literature Science and the Arts at first resembled a typical American college of that period with religious and ethical indoctrination playing a central role in course offerings But when Henry Tappan a Presbyterian clergyman and Professor of philosophy became President in 1852 he succeeded in shifting the emphasis from indoctrination to inquiry and scholarship Though he was dismissed for his policies in 1863 Tappan's efforts to establish a broad and liberal curriculum prevailed Michigan was to take its place among the leading educational institutions in this country and to achieve an international reputation as a research center Several past philosophers are worthy of mention here George Sylvester Morris an absolute idealist joined the Department in 1881 having served from 1870 as Chairman of the Department of Modern Languages and Literature He assumed the Chairmanship of Philosophy in 1884

Consequentialism Reconsidered E. Carlson, 2013-03-09 In Consequentialism Reconsidered Carlson strives to find a plausible formulation of the structural part of consequentialism Key notions are analyzed such as outcomes alternatives and performability Carlson argues that consequentialism should be understood as a maximizing rather than a satisficing theory and as temporally neutral rather than future oriented He also shows that certain moral theories cannot be reformulated as consequentialist theories The relevant alternatives for an agent in a situation are taken to comprise all actions that they can perform in the situation The defense of this idea necessitates certain modifications to the standard consequentialist criteria of obligatoriness rightness and wrongness The problem of whether agents should adapt their actions to their own future actions is also addressed Further a conditional analysis of performability is suggested and it is argued that particular actions should in this connection be regarded as abstract rather than concrete The final chapter sketches a consequentialist theory for collective agents

The Medici Women Natalie R. Tomas, 2017-07-05 The Medici Women is a study of the women of the famous Medici family of republican Florence in the fifteenth and early sixteenth centuries Natalie Tomas here examines critically the changing contribution of the women in the Medici family to the eventual success of the Medici regime and their exercise of power within it and contributes to our historical understanding of how women were able to wield power in late medieval and early modern Italy and Europe Tomas takes a feminist approach that examines the

experience of the Medici women within a critical framework of gender analysis rather than biography Keeping the historiography to a minimum and explaining all unfamiliar Italian terms Tomas makes her narrative clear and accessible to non specialists thus *The Medici Women* appeals to scholars of women s studies across disciplines and geographical boundaries
