Governing Europe:

Governing Europe Jack Hayward, Anand Menon, 2003-03-20 *Governing Europe* is intended to be the leading advanced survey of politics in Western Europe. It examines in detail all aspects of political life in Western Europe from public protest to core executives, social policy to Europe's place in the world. It brings together a world class team of leading scholars from the United Kingdom, continental Europe and North America. The contributions provide not only a sophisticated introduction to the various issues covered but also a detailed discussion of the major theoretical and empirical debates and developments in the field. The book therefore provides both a comprehensive overview and a series of original contributions to scholarly debate. The focus is on European core executives, public administration, parties and organised interests, democracy and popular participation, public policy and the changing European state. It will be essential reading to scholars and students alike. The volume is intended as a tribute to the late Vincent Wright of Nuffield College, Oxford University. *Governing Europe*

William Walters, Jens Henrik Haahr, 2004-08-02 This book uses post structuralist theories of power and discourse to study European integration and the associated forms of governance. On Governing Europe Andrew Duff, 2018-01-02 Here is the story of the European Union by one of its leading thinkers. Andrew Duff describes how the EU was born at a time when federalism was seen as the only way to lasting peace but how continuing tension between federalists and nationalists has left the Union unable to fulfil its promise. The author argues that the rise of impressive institutions such as the European Parliament, Bank and Court has not been matched by the emergence of a capable democratic executive so the problem of weak governance at the European level must be rectified if the risk of illegitimacy is not to grow. In his career as a noted politician and commentator, Andrew Duff has worked towards the goal of federal union. He regrets Brexit but is not surprised by it and argues that if the remaining EU makes a success of the federal experiment, the British may in due time be back.

Governing Europe's spaces Caitriona Carter, Martin Lawn, 2015-07-20 What do we imagine when we imagine Europe and the European Union? To what extent is our understanding of the EU of its development, its policies and its working processes shaped by unacknowledged assumptions about what Europe really is? The book constructs a case for re-imagining Europe not as an entity in Brussels or a series of fixed relations but as a simultaneously real and imagined space of action which exists to the extent that Europeans and others act in and on it. This Europe is constantly being made in particular spaces through specific actor struggles whose interconnections are often ill defined. We ask how do those concerned with building Europe with extending and elaborating the EU think of where they are and what they are doing? The book captures Europeans in the process of making Europe of performing, interpreting, modelling, referencing, consulting, measuring and de-politicising Europe.

The State Tradition in Western Europe Kenneth Dyson, 2024-10-31 Why have continental European societies developed the idea of the abstract impersonal state as the fundamental institution of political rule Why on the other hand has this idea played a relatively insignificant part in the history of English speaking countries It is to such questions that this major study is addressed With clarity and conciseness Kenneth Dyson examines the fascinating tapestry of thought about public authority that the state tradition represents and identifies the major individual contributions to that tapestry In addition to offering a clear conceptualisation of state he deals with such key issues as the role of the intellectual the social function of state theories and the difficulties of accommodating state and democracy

Democratic Governance and European Integration Ronald Holzhaacker, Erik Albæk, 2007-01-01 As the power and scope of the European Union moves further beyond traditional forms of international cooperation between sovereign states it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision making opinion formation interest intermediation national executive decision making and national parliamentary scrutiny From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system They conclude that more changes are seen within the state centric than in the societal centred processes of democracy thus the public seems to have been left behind in the process of constructing Europe The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union This book will be of great interest to academics and researchers of political science public policy and international relations as well as those interested in European studies and comparative politics
