The world is being atomized and individuals are forced to accept the new normal in their routines. In an attempt to combat the virus and minimize its detrimental effects, countries have undertaken different preventive strategies and containment policies. Some have successfully curbed the spread of Covid 19 while many others remain in limbo, doing their best to respond to outbreaks in cases. To gain a better understanding of how to fight Covid 19, it is imperative to evaluate the success and failures of these approaches. Under what conditions is an approach successful? When should it be avoided? How can this information be used to avoid future pandemics? This volume offers informative comparative case studies that shed light on these key questions. Each country case is perceptively analyzed and includes a detailed timeline, allowing readers to view each response with hindsight and extrapolate the data to better understand what the future holds. Taken as a whole, this collection offers invaluable insight at this critical juncture in the Covid 19 pandemic. In the post-truth era, such careful documentation of the facts is especially welcome.
