Government Policies And Deforestation In Brazil's Amazon Region:

Government Policies and Deforestation in Brazil's Amazon Region Dennis J. Mahar, 1989 *Government Policies and Deforestation in Brazil's Amazon Region* Dennis J. Mahar, 1989 *Causes of Deforestation of the Brazilian Amazon* Sérgio Margulis, Annotation This title studies the role of cattle ranching its dynamic and profitability in the expansion of deforestation in Brazilian Amazonia It provides a social evaluation of deforestation in this region and presents and compares a number of different scenarios and proposed recommendations *The Brazilian Amazon Rainforest* Luiz C. Barbosa, 2000 Barbosa sociology San Francisco State University provides a global world systemic analysis of the problem of deforestation of the Brazilian Amazon rainforest He shows how changes in global ecopolitics demanding sustainable development coupled with the onset of democracy in Brazil substantially altered the battle over the future of Amazonia He describes deforestation in the region in the context of an expanding frontier of global capitalism and compares Amazon experiences with those of Costa Rica Malaysia and Indonesia **Government and the Economy on the Amazon Frontier** Robert R. Schneider, 1995 World Bank Environment Paper No 11 Addresses issues of local governance in frontier economies in relation to environmental and political sustainability Covers problems of mining farming and disincentives **Deforesting the Earth** Michael Williams, 2003 Clearing in the deep past Reaching out Europe and the wider world The global forest **Forest Resource Policy in Latin America** Ronnie de Camino, Julio C. Tresierra, Ramón López, Thomas Kelly, Markku Simula, Kari Keipi, Carlos Felipe Jaramillo, Olli Haltia, Jared J. Hardner, Marc J. Dourojeanni, Jan G. Laarman, Richard Rice, 2000-01-01 Forest Resource Policy in Latin America gathers the thinking of a score of experts on sustainable use and management of forests including incentives for investment The authors tackle the thorny social issues of property rights deforestation and forest management and ownership by indigenous people and take a hard look at the trade and environmental issues in forest production that will affect future directions for sustainable forestry development in Latin America Some argue that the main opportunity to conserve natural forests lies in recognizing and paying for the environmental services they provide In addition compensatory measures such as the establishment and better management of strictly protected areas appear to be the best tools to delay the loss of ecosystems and species Alternative forest concession policies and trade and environmental issues in forest production are also analyzed **Global Perspectives on Sustainable Forest Management** Dr. Clement A. Okia, 2012-04-25 This book is dedicated to global perspectives on sustainable forest management It focuses on a need to move away from purely protective management of forests to innovative approaches for multiple use and management of forest resources The book is divided into two sections the first section with thirteen chapters deals with the forest management aspects while the second section with five chapters is dedicated to forest utilization This book will fill the existing gaps in the knowledge about emerging perspectives on sustainable forest management It will be an interesting and helpful resource to managers specialists and students in the field of forestry and natural resources management Security.

the Environment and Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general
