Learning Joseph Ben-David,1992-01-01 The universities of Britain France Germany and the United States stem from a common European academic tradition and are today among the most influential and powerful in the world Each has

cultivated a high degree of scientific excellence and intellectual autonomy and has served as a model for world higher education Yet these four systems are structurally distinct and show considerably different patterns of development In

Centers of Learning Joseph Ben David explores these differences and provides insight into the role and scope of

contemporary higher education Although the movement toward modern systems grew out of shared convictions and practical needs Ben David s comparative analysis shows that educational reform had surprisingly different consequences in America

England Germany and France In France higher education became identified with the purposes and authority of the state through specialized training for various professionals In contrast the German reforms consolidated the scholarly disciplines under a highly centralized university system with no special status accorded to the professional faculties In England Oxford and Cambridge adopted the German model but smaller specialized institutions established a tradition of academic diversity and community service The modernization of the American system followed the European reforms in updating the scientific curriculum and following the university model but with a special emphasis on extending higher educational status to a broad strata of the population In assessing the development of these systems Ben David finds their greatest success in extending the prestige and benefits of higher learning to the professions General education while strong in America has suffered in the European systems especially through its slackening ties to research Centers of Learning contains a forceful critique of the politicization of the academy Ben David sees the furthering of social justice and equality as a necessary though controlled part of the university's mission Uncontrolled political criticism will have the potential for disrupting educational functions and undermining the relationship between the university and society In undertaking a historical survey of national education endeavors this volume clarifies the contexts of current problems and inadequacies Its broad ranging analyses and proposed solutions make it essential reading for educators social historians political scientists and sociologists Labor-management Policies for State and Local Government United States.
